TIMES A DAY. A correspondent of the Ohio Farmer thinks that sheep and cattle should not be fed three times a day. He says a cow when turned in to good grass, will ent with avidity for ar hour or so; the ruminating process is ther commenced, and continued for two or three hours more. The food is in this way tho roughly masticated and mixed with saliva he

on by the gastric juice and digested. The digestive process will coupy four or five hours. We have, therefore, "allowing two and a half hours for eating, one hour for rest, four hours for ruminating, and four or five hours for digestion, eleven or twelve hours between the times when an animal would naturally need feeding." He thinks from this that "feeding three times a day is not only un

fore it enters the second stomach, to be actor

necessary, but positively injurious." If the animal is fed at six A. M., and again at noon, the ruminating process is not completed, and if fed at five P. M., it will not give the animal time to musticate the food, even by keeping its grinders in constant motion, so that, at the best, there must be forced on the digestive organs a portion of the food improp. erly masticated, causing an extra amount of labor for these organs, and at the risk of engendering disease.

His practice was conformed to this thenry, and he thinks his stock at least as good as his neighbors who feed three times a day. He asks those who think differently to give a reason for their belief, and also to try a lot fed twice a day, against a lot fed three time a day.

We have always considered it advisable to feed animals three times a day, and have observed animals so fed, on an occasion when the noon's feed has been omitted, manifested all the symptoms of real hunger, eating substances which under ordinary circumstances, they would not touch. But perhaps we are wrong at all events, let us have the experiment .- Rura

EXPERIMENT WITH POTATOES. -- It has frequently been a subject of discussion among farmers, whether better potatoes and larger crops could be raised by planting small ones or by cutting the largest and best into several pieces, having the sprouting eye in each .-Many have contended, and very justly, we think, that the best seed invariably produce the best crops of every grain or root crop, and, consequently, the same rule must hold good with regard to the valuable esculent al luded to above.

In the Patent Office Report for last year, we find the result of an interesting experiment with this vegetable, which cannot fail to throw some light on the subject.

Four rows of equal length were manured a nearly alike as practicable, and planted, as follows:

No. 1 With large petatoes, produced ..... 75 2 With very small ones, do ......67 8 Medium size, cut in two, do......76

4: Medium size, quartered, do.......70 From these results it will be readily seen which methods are most advisable for our far mers to employ in the raising of this vegetable which forms such a prominent feature on every one's table and which properly cooked, is one of the most nutritious .- Charlestown Free Press.

HILLING CORN.-At a late meeting of the New Hampshire Legislative Agricultural Society, all the speakers objected to hilling corn One farmer who had experimented by hilling and leaving the earth level, found no apparen difference in the product, but found the hilledportions more likely to be broken down by storms. The other stood more firmly: or, if bent sooner recovered itself. Was not this owing to the better maturing and hardening

COAL ASHES. -Farmers are beginning to pu a proper value upon anthracite ashes. They find that they possess fertilizing quantities for particular soils, of no mean importance. On low, heavy, or clay soils, which are deficient in silex, coal ashes are undoubtedly of great benefit. But they contain, besides silex, alu mine, carbon, and iron, in a soluble form nearly to the amount of 20 per cent,, and there fore must be of value to many others, but es o pecially to these soils.

### HARDWARE.

A LARGE SPRING ARRIVAL! WHICH surpasses in quantity quality and prices any that has ever yet been opened in Carlisle, consisting of the greatest-variety of all kinus of Hardware, such as, Shoe Findings, Saddlery, Coach Trimmings, Paints Oils, Varnish, Glass, Nails, Files, Anvils, Vices, Bellows, Springs, Axels, Bows, Fellows, Veneers, Cedarware, Farming Utensils, Bar and Rolled Iron, Steel, &c., with a thousand more articles unmentionable.

more articles unmentionable.

#### depression of spirits, DR. HOOFLAND'S CELEBRATED GERMAN BITTERS. DR, C. M. JACKSON,

No. 120 Arch Street, Philadelphia. Their power over the above diseases is not excelled, if equalled, by any other preparation in the United States, as the cures attest, in many cuses after skilful physicians had failed. These Bitters are worthy the attention of invalids. Possessing great virtues in the rectification of diseases of the Liver and lesser glands, exercising the most scarching power in weakness and affections of the digestive or-gans, they are withal safe, certain and pleas-

READ AND BE CONVINCED. Testimony of the highest character! HON. GEO. STROOP, Judge of the District Court in Perry county, Pa., Nov. 18th, 1852 said: "your 'Hoofland's German Bitters' has been in use in our place over a year past, and to the astonishment of many has performed wonders. We ment of many has performed wonders. We may notice a few instances that have come under own immediate notices—almost every person who has stopped at the hotel of Wm. Lackey, one year since, predicted from his emaciated countenance and debility, that he could not live much longer. He was unable to attend to his buiness, and for the greater part of the time confined to his room. We recommend to the counter the counter of the time confined to his room. perform manual labor. The case of Henry Asper a stone mason, whom no one supposed would ever recover from the debility of his system, but was looked upon as fast approaching the grave, took eight or nine buttles of the Bitters during the last winter, and this sumer he has been 'fto the surprise or all who knew his case] following his trade. The case of William Murphy is no less astonishing.— He too was so fur reduced as to induce the general belief that the grave alone would be his only remedy. Mr. Lackey recommended him to try the Hoofland's German Bitters; he is now apparently a well man, and able to do a hard day's work. We could mention many other cases of a similar character, if it were other cases of a similar character. If it were necessary. I myself derived much benefit from their use. I have given considerable of it away, not for your benefit alone, but to relieve suffering humanity, and let me assure you I am pleased to see the happy result. To the afflicted we say, try them fairly and I will warrant relief."

These Butters are worthy the attention of

These Bitters are worthy the attention of invalids, possessing great power in the resto-ration of a healthy action of the liver and the lesser glands, giving tone to the stomach and nervous system, and bringing the system gen erally to u high state o, health. ### "PANKORITE." MYERS' EXTRACT OF ROCK ROSE.

An Invaluable Remedy for all Scrofulous Discases, Indigestion, Salt Rheum, Sick Head ache, Cancer, Nursing Sore Mouth, and General Debility, and as a Purifier of the Blood it is Unequalled.

The Rock Rose has gained a reputation at home and abroad, which no other medicine has ever done in the same length of time. According to the opinions of eminent Physi cians, the Rock Rose Plant is unequalled in Curing Scrofula in its Various Forms!

STATEMENT OF REV. E. R. WARREN (Pastor of the 2d Bantist Church, New London Ct...) relative to Myers' Extract Rose.

To The American Public.

As my name has been used in connection with recommendations of Mr. Myers' Rock Rose Syrup, in various advertisements by the mattufacturer, I beg leave to make the following statement with reference to my acquaint, ance with the remedy and tests to which I have subjected it, and the reasons for having introduced it to the notice of private friends in the community in which I reside, long before the medicine was advertised. I make this statement freely, because I have, as a principle, withheld my name from all patent medicines, and sedulously abstanced from recommending them to the public, believing them frequently the spawn of quackery and humburg, and as kending to increase, instead of lessening human disease and suffering. Such, I tear, is the disease and suffering. Such, I tear, is the character of a large portion of the patent panaceas of this medicine making age. "Their name is legion," and from their influence, sa from the demoniacal spirits, we have reason to pray for a safe deliverance.

to pray for a safe deliverance.

The First Test.—I had myself suffered occasionally with sudden attacks of Sick Headache, and Billious Diarrhea, and I had sought a great variety of curative agents to but little purpose; and suffering from this disease (diarrhea) at this time, I determined to test the new Syrup first upon myself. The results were beyond my expectations. It was a powerful was changed, and the functions of secretion were restored to a healthy state. It gove tone and elasticity to my system, and corrected the derangement of the digestive organs, and gave me that inestimable blessing—health. This test was not determined in a week, or a month; but I took four or five bottles in perhaps as many months. Since that time I have suffered but slightly from these derangements. My Sick Headache is entirely Cured.

Other Tests.—Finding this medicine so useful to five the myself, I at once gave it to several invalid times in the consult with the consult with myself, I at once gave it to several invalid times in the consult with myself, I at once gave it to several invalid times in the consult with myself, I at once gave it to several invalid times in the consult with myself, I at once gave it to several invalid times in the consult with myself, I at once gave it to several invalid times it is a value of the digestic or gans, and gave the medicine has or will work a perfect cure. I also gave the medicine has or will work a perfect cure. I also gave the medicine has or will work a perfect cure. I also gave the medicine has or will work a perfect or cased, and I believe the medicine will have the desired effect. Much money has been expected by the friends of the above patients for doctoring, all to no purpose. The cure was left for your medicine to perform, and I can cheerfully recommend it as a value discovery. Respectfully yours.

Superintendent Ashtabula Co. Infirmet. Sold, by S W Haverside Contents to have the circumstance of the digestic part of the digestic part of the digestic part of the digestic part of

ful to myself, I at once gave it to several inva-lid friends. About this time, I was carnestly solicited to give advice in reference to a child, rome eight years of age. This child was severely afflicted with a Scrofula humor, of a severely afflicted with a Scrotula huraor, of a very severe type, the humor showing itself on all parts of the surface, and then suddenly dis-appearing. The child was very sick, and it was thought doubtful whether she would live, The humor resembled black specks of mortified flesh. In addition to some other remedies, a gave the child this Syrup for about six weeks, when she had sufficient strength to go out to school occasionally. The swelling of her limbs ceased, and she was restored to heatth. The family feel that they owe her life, with G d's

family feel that they owe her life, with G.d's blessing, to my remedies.

This test satisfied me that the Rock Rose possessed specific powers for Scrofulous humors. I then tested it in cases of Cutaneo's Eruptions, in Measles, Chicken Pox. Cane x, Sore Mouth, Erysipelas, Salt Rheum, Piles, &c. In all these cases with perfect success. After testing this Syrup for more than a year, I wrote Mr. Myers (October 7th, 1850) enthusiantically, not expecting my letter would be published, that his Syrup was a "Pankorite," all-healing, and I gave him the result of its operations in several instances. I stated in that letter that "it was invaluable as a remedy in Cutaneous Eruptions, Erysipelas; Salt Rheum, and other disorders, included in the varied family of diseases known as Scrofula, &c.: that in Dyspepsia it acted with wonderful efficacy." My opinion of its value for the &c.: that in Dyspepsia it acted with wonder-ful efficacy." My opinion of its value for the above named discuses, remain nuchanged, and the same as when I wrote Mr Myers in Oct. 1850. I do not recommend it for all the ills of our suffering humanity; but I unhesitating ly say, that as a remedy for Scrofulous affective agent.

It has been sufficiently tested by domestic practice to establish its adaption to extensive usefulness in mitigating human suffering and

### removing diseases

But What is the Rock Rose?

The following history of the Rock Rose plant and its medicinal proporties, we take from the New Haven Palladium, March 1852.

"The increased interest manifested in the Rock Rose plant, in consequence of the many wonderful cures effected by Myers' Compound Extract of Rock Rose,' calls for a brief-history of it, in order to correct any errone is spin ion that may have been entertained pincerning it; and also to set in a true light the nation.

"The following history of the Rock Rose is the Rock Rose of the Rock Rose is the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose in the Rock Rose is the Rock Rose in the Rock Rose in the Rock Rose in the Rock Rose is the Rock Rose in ion that may have been entertained; oncerning it; and also to set in a true light the na-

"'It is entirely different from the commo Rose. It is a red-stemmed, oblong leat plant, having a bitter taste. In addition to remarkable peculiarity of the plant, of bearing two crops of flowers in one season, it also has another interesting and beautiful property.
Dr. Eaton says, that in the months of Nosvember and December, he has seen hundredof these plants, sending out near their costs, broad, thin, curved, ice-crystals, about an inch in broadthr which melted during the day, and were renewed in the morning. For a more minute and authentical description of it, the ender is referred to Torrey and Gray's Botan-

ical works. Its Medical History and Properties Are far the most important, since upon these depends its value to the community. Dr. Loudon says that in 1799, it was so valuable in England, that it was cultivated from seeds. Ever since 1806, Professor Ives of Yale College, has habitually used it with great success n Scrofula and Chronic diseases, and through him its virtues were made known, until, as Dr Tyler says, "It is now in this section (New Haven) a common article in domestic practice for the cure of Scrofula and Cutaneous dis-

nases."
Dr. Whitlaw, a Scotch Botanist of notoriety, while travelling in America in 1814, learned its use in Canada. Returning to England, he employed it in medicating his baths, which became greatly celebrated for the cure of simi

Dr. J. H. Thompson, of the same place, preat Wills' Hospital. His success attracted the attention of senior physicians. He reports the following remarkable case of white swelling of the hip, in February, 1814:—The lad was seven years old, and had the disease three years. The bone was dislocated both upward end outward. There was a large opening in the hip leading to the bone; into which I could three ulcers. He had been under several physicians, who had given him up. I ordered a decoction of Reck.

The two days his night awents canad.
