In connection with the above z large stock of FAMLY GROCERIES, trees are tapped in the same manner that the New Englanders tap maple trees. The trunk having been perforated, a yellowish liquid, resembling cream, flows out, which is caught in small clay cups, fastened to the tree. When these become full, their contents are emptied into large earthen jars, in which the liquid is kept until desired for use.

"The operation of making the shoes is a simple as it is interesting. Imagine yourself, dear reader, in one of the sering groves of Brazil. Around you are a number of good looking natives, of low-stature and olive complexions. All are variously engaged. One is stirring with a long wooden stick the contents of a cauldron, placed over a pile of blazing embers. This is the liquid as it was taken from the rubber tree. Into this a wooden "last," covered with clay, and having a handle is plunged. A coating of the liquid remains. You will perceive that another native then takes the 'last,' and holds it in the smoke arising from the ignition of a species of palm fruit, for the purpose of causing the glutinous substance to assume a dark color. The 'last' is then plunged again into the cauldron and this procees is repeated, as in dipping candles, until the coating is of the required thickness. You will, moreover, notice a number of Indian girls making various impressions, such as flowers, &c., upon the soft surface of the rubber; by means of their thumb nails, which are especially pared and cultivated for this purpose. After the final operation, the shoes are placed in the sun to harden, and large num-

## GRUBS AND FRUIT TREES.

A New England paper recommends the following method to protect peach, pear, apple and other fruit trees against the attacks of the grub or worm at the roots :

Také a piece of canvass from six to ten in ches in width, and length sufficient to fold twice around the trunk of the trees, at two inches beneath the surface of the ground; place a string loosely around the middle of the belt and fill the top of the belt with soot, lime of ashes. This should be renewed every spring, in the month of Anril. Trees treated in this manner will not be attacked by the grul Worm.

The Germantown Telegraph has a bette mode than this, having used for some year the canvass, alone, and have thus far found i effectual; but then apply it the latter part of February, or the early part of March, (as the insects commence early to lay their eggs, some six inches above the soil, ) and take it off about the 1st of June. The constant bandage might injure the tree. An equally certain mode i to handage or not, but to bowl out the ground about six inches in depth, round the trunk, heaping the dirt up so as to make the top of the "bowl" an inch or two higher than the surface, and fill this with slacked lime about the consistency of mush. . It can't fail. We apply it to our Mountain ash, and we think it is the only protection for them. When stems of young trees are bandaged, as before men tioned, stiff paper, tied firmly in several pla ces, and let run at least an inch into the ground will answer quite as well as canvass,

WONDERFUL CURE .- The following wonder ful effect of one of the cure all patent mediicines, advertised so extensively in many of the papers of the day, is about as well authenticated as most of the remarkable cases which are backed up by a long array of bogus certificates:

"A boy had swallowed a silver dollar. None of the faculty could devise any alleviation, whereupon the inventor of the cure all medicine was sent for. , 'It is evident,' said he, "that so considerable a coin can never be foroed up by any emetic known to science. How ever, let him take this pill, and flattering consequences will be likely to ensue.' An hour afterwards, the boy threw up the dollar, but in small change-principally five cent pieces

A Rhode Island clergyman lately il lustrated the necessity of corporal punishment for the correction of juvenile depravity, with the remark that "the child, when once started in a course of evil conduct, was like a locome tive on the wrong track-it takes the switch to get it off." When the reverend gentleman delivered himself of this piece of waggery, with all becoming gravity, a general smile lit up the countenance of many an attentive hearer.
