These Springs are in Camberland County, 12 miles west of Carlisle, and are now open for the reception of visitors. The valuable improvements which have been made since last season, and the recent discovery of the Chalybeats Spring, add greatly to the inducements presented for the present season. " ANALYSIS OF THE WHITE SULPHUR AND CHAL

VBEATE SPRINGS.

The odor of Sulphuretted Hydrogen, per ceived at some distance from the Springs, im-parts to this water the peculiar properties of Sulphur Springs. Beside this ingredient, I und that the water contains Carbonate of So-da had of Magnesia, Glauber's Salt, Epsom Salt, and Common Salt; ingredients which give it an increased value. After removing the excess of carbonic acid which it contains, the excess of carbonic acid which it contains, fud that the water contains Carbonate of So-da had of Magnesia, Glauber's Salt, Epsom Salt, and Commou Salt; ingredients which jive it an increased value. After removing the excess of carbonic acid which it contains, it gives an alkaline reaction. The Chalybeate water readily yields a pro-opinite after tbullition or continued exposure has expelled the excess of carbonic acid.
