of Pennsylvania have never derived any ad-

have been made by the Legislature to the sev-

eral Colleges of the State. The price of an education at those Institutions has always

been beyond their means : and the quality o

it, when obtained, has added comparatively

little to benefit them. What we now propose

is to establish a school where practical farm-

ing, and all the knowledge which pertains to a right understanding of that subject shall be

taught, and that the product of the labor of the

pupil shall be appropriated to his education

and maintenance, to such an extent as to bring

the price of learning within the reach of those

whose business and habits require the study

of economy. How many are there who, know-

ing the value of an education, feel desirous

that their sons should have its benefit, and yet

look around in vain for an Institution whose

teachings are so practical as to prepare youth

With a determined purpose that this design, which promises such important results, shall not fail for want of an effort, and auticipating thefavorable action of the Legislature at its next session we have been instructed to examine in to the subject of where the "Farmers High School" shall be located. It is very certain that its location will confer great advantages on the community around it. The example which it will afford-the knowledge it will im part-the expenditure it will annually makeare matters worthy of consideration and will probably induce individual exertion to have it located at different points in the State. We are instructed to solicit and receive propositions on this point, to be submitted to the Board of Trustees as soon as the institution shall have been organized. And communications on this subject, aderessed to either member of the

Committee, will recive a right direction. FREDRICK WATTS, GEO. W,WOODWARD, A. L. ELWIN.
