but no great anxiety. In places where winter wheat had failed, and a backward spring had prevented putting in as much corn or potatoes as could have been planted in a more favorable senson, great fields of buckwheat and turnips were sown, and the hope of a teeming supply of food for the coming winter was almost universal.

At first the reports of the drouth came from some of the western and northern counties of this State, but they recently became more extensive and more alarming; and now, whoever has read our extended reports in the present number of the Tribune, must be convinced that the drouth now prevailing is more wide spread and more destructive than any heretofore known in America. The corn in many of the best counties of Illinois and Indiana, that premised an average yield of sixty bushels per acre, will, in many fields, not produce a single bushel, and the product cannot possibly equa one-half the usual avarage, if indeed it equals one-fifth. As we have before stated, this drought is no longer confined to a few isolated localities: it extends from Maine to Missouri ; it has not only cut off Indian corn, but potatoes, turnips and buckwheat, and the fall feed for cattle. In some places the poor brutes are literally starving. Some feed them out of their winter tore, and some drive them to the woods to browse ; all sell them as fast as they onn, and many are sent to the shambles, though only fit for the knacker's yard. Now what is the prospect? for we may as well look it in the face at once. It is undeniable that the greatest of all American crons-Indian Corn-will be woefully below our act tual wants. The consequences will be, that Western pork cannot be made at such prices as have prevailed for many years, and our supply of Western beef cattle, though it may not fall off in number, will be like Pharoh's Jean kine --- sadly deficient in tallow ; and if we SUPER PHOSPHATE OF LIME. have grumbled at what we have heretofore received, we shall groan at what we are likely to get hereafter. The loss of the corn crop must be felt by all classes of society, whether they eat corn bread or wheat bread, or whether they are consumers of meat or vegetables .--The flattering prospect of abundance of cheap food next winter, is now to be counted among things past .. Let all who read and think, hus band their resources. There is no danger of famine, but there is need of economy.

This deited of article combines so many meri-torious qualities that it has now become a stan-card favorite with the citizens of New York, Philadelphia and Baltimore. Dentists pre-scribe it in their practice moet successfully and from every source the most flattering laudations are awarded it. Inflamed and bleeding gums are immediate-ly benefitted by its use; its action upon them is mild, scothing and effective. It cleanes the teeth so thoroughly, that they are made to ri-val bear! in whiteness; and diffuses through the mouth such a delightful freshness that the breath is rendered exquisitely sweet. It disin-fects those impurities which tend to produce decay, and, as a consequence, when these are removed the teeth must always remain sound. Read the following from Dr. J. A. Carman; -Mr. F. Zerman—Sir : Having used and re-commended your Tooth Washim my practice for some time, I find it the most effectual Dentifrice in use, and therefore recommend it to the pub-lic. Dr. J. A. I have fully tested the merits of your valuable Tooth Wash, and can, without hesitation, recommend it as the best that has come under my notice during an experience as Dentist, of more than sixteon years. It clenees the Teeth, soothes and har-dens irritated Gume, and imparis a delicious fragrance to the Breath. From the mouths of thosi who make use of it, however it will cer-tainly epeak for itself. GEO. P. Schwerzy. Surgeon, Dentist, 279 South Tenth street Phil'a. It is used and recommende by all the emi-nent Dontists in New York, Philadelphia, Bal-timore, and other cities where it has been in-troduced.
