The steamship Atlantic reached New York yesterday from Liverpool, bringing news from Europe one week later. The Queen of Sardinia is dead. Lord John Russell has resigned his post as leader of the ministeral party in the House of Commons, and the opinion seemed to prevail that the ministry

Almost the only intelligence of interest brought by this arrival is to be found in the proceedings of the British Parliament, in which the conduct of the war has been discussed in a spirit very much the reverse of avorable to the Government. Lord John Russell has resigned, and other changes amounting to a total breaking up of the Ministry, are talked of. From the seat of war we have nothing new. The Vienra Conference will not meet until the middle of February. Most of the nations of Europe are placing their armies on a war floting Opin on changes several times a die as te the prospects of an early peace. As hopeof a speedy settlement recede, fears of asextension of the area of hostilities increase and in Paris it is a common remark that Spring will see a French arm marching on the Rhine.

Affairs before Sebastopol are unchanges. The British army is in a wretched condition from mismanagement. The Swedish army is immediately to be placed on a war footing. Numerous failures are reported in Liverpool, but the amounts were exaggerated. edunts from various parts of Spain indicate an approaching Carlist insurrection. A despatch from St. Petersburg announces that the parrise, of Sebastopol made two successful nigh. sorties on the 13th and 15th, killing a cor siderable number of men, and taking four teen prisoners. The large Russian force mustering at Perekop, is said to be for a: attack on Eupatoria.

A COLD NIGHT.—A gentleman who was travelling between Syracuse and Canandagua, N. Y., on Tuesday night, relates that the stove in the car was heated "red hot." He stood three feet from it, and his breath, as well as that of all the other passengers in the car, was as plainly visible to the eye as eig r smoke-having the same effect upon t'o atmosphere in the car (where there had by na fire for two or three hours) as is observed out doors any cold, frosty morning. In numerable ears, noses, toes and fingers were frozen. The gentleman referred to, urgloving his hands at the suggestion of the conductor of the train, touched the "br a' iron' of the car; it produced the same effect as concluing a red hot iron, leaving the pain and mark of a burn.
