Educational

To the Teachers of Cumberland County.

The office of County Superintendent was created for the purpose of aiding the teach-

studies now required, should remember that our common schools are progressing and ere long more advanced studies will be re-

quired. The teacher should not only employ his leisure hours in the study of the different branches, but more particularly should he prepare himself for the daily exercise of the school-room.

To know the nature and disposition of pupils, is indispensable for the progress of a school, and by close observation, with some reflection on the part of the teacher, he will arrive at that form of school government which will secure to him the respect

That there is more interest manifested in the cause of education than formerly, needs , no proof; and if so, no one should appreciate it more than the teacher: if parents, guardians, nd citizens generally manifest increased laterest, the teacher who would refuse to exert himself, should not be con-

sidered worthy of a place in a school-room.

There is a want of uniformity in teaching and to remedy this evil, teachers should form institutes in every district at as early a day as possible; to do this, they must divest themselves of all selfishness, and with the sole aim to assist each other, enter into the matter in good faith; inviting the directors and other citizens to join with them, assuring them that their object is to qualify themselves more fully for a faithful discharge of the duties of teacher.

A teacher to be successful must be "one of the people" and he who feels himself above this, can never succeed; visit as frequently as you can those who send children to you; but remember that noble hearts and bright intellects dwell in log cabins as well as in brick mansions.

Many of our teachers keep a record of the daily progress and conduct of their pupils, which is always open to the inspection of the directors and patrons of the school; this seems to have a salutary influence and should be universally adopted.

In submitting your monthly reports be very candid in giving the deportment of your pupils; if they are good, say so, and if they are bad be not afraid to report them as such. The disposition to report favorably of every scholar appears to be prevalent; in some schools the teachers are constantly complaining of the bad conduct of their scholars, and yet when the reports are

I think I may safely say that the schools of our county are not a whit behind those of other counties in the State, and yet there is considerable room for improvement in many of them and a little in the best of them.

In conclusion, permit me to thank you most singerely for your becoming conduct at the several examinations, and for the many acts of kindness shown to me since my election to office.

Very respectfully, your ob't serv't, DANIEL SHELLY,

County Superintendent.
N. B. In a short time I will publish a county report, in which I will try to exhibit our educational condition more minutely.

OST IMPORTANT TO THE LADIES.—Dr. Gelssner's celebrated MENSTRU.
PILLS have been long and widely known as invariably certain in removing any stoppage, irregularity, or suppression of the menses.

In the Female Hospitals in Vienna, Paris, and Berlin, they have entirely superseded the use of all other remadies; because, where a cure is attainable by medicinal agencies, they are certain of success. Their astonishing efficacy would be almost incredible, if not vouched for by indubitable testimony, in numerous instances producing returns of the monthly period after all hope had been abandoned.
