MARVELLOUS REMEDY FOR

HOLLOWAY'S OINTMENT.

THE GRAND EXTERNAL REMEDY. By the sid of a "microscope, we see millions of little openings on the surface of our bodies. Through these this Cintment, when rubbed on the skin, is carried to any organ or inward part. Diseases of the Kidneys, disorders of the Liver, affections of the heart, Inflamation of the Lungs, Asthmas, Coughs and Colds, are by
its means effectually cured. Every housewise knows
that salt passes freely through bone or heat of any
thickness. This healing Ointment far more readily
penetrates through any bone or fleshy part of the living
body, curing the most dangerous inward complaints,
that cannot be reached by other means.

The combination of ingredients in these Pills is the re The combination of ingredients in those Pills is the result of a long and extensive practice; they are mild in their operation, and certain of restoring nature to its proper channel. In every instance have these Pills proved successful. They invariably open those obstructions to which Females are liable, and bring nature into its proper channel, whereby health is restored and the pale and deathly countenance changed to a healthy one. No female can enjoy good health unless she is regular; and whenever an obstruction takes place, whether from extyposure, cold or any other cause, the general health inmediately begins to decline, and the want of such a remedy has been the cause of sq many consumptions among young females. To ladies whose health will rife termit of an increase of their family, these pills will prove a valuable acquisition, as they will prevent pregnancy.—Headache, pain in the side, palpitation of the heart, losting of food; and diturbed sleep do most always arise from she interruption of nature; and whonever that is the case, the pills will invariably remedy all thert evils. Nor are the less affleadous in the care of Leucorrheea, commonly called the "Whites." These pills should never be taken during pregnancy, as they would be sure to eause a miscarriage. If you have contracted the terrible disease which, once seated in the system, will surely go down from one generation to another, undermining the constitution and sapping the very vital fluids of life, do not trust yourself in the hands of Quacks, who start-up-every day in a city like this, and fill the papers with glaring false hoods, too well calculated to deceive the young, and those not acquainted with their tricks, Xou cannot be too careful in the selection of a remedy in those cases.

The Fluid Extract Buchn has been pronounced by eminent physicians the greatest remedy ever known.—It is a mediciue perfectly pleasant in its taste, and very innocent in its action, and yet so therough that it annihilates every particle of the rank and poisonous virus of this dreadful disease; and, unlike other remedies; does not dry up the disease, which has brought thousands of the huffan race to untimely graves, thus blasting the brilliant hopes of parents, and blighting in the bud the glorious ambition of many a mobile youth, can be cured by this Infallible Remedy. The Yankee and his Turkeys.

Walk in, gentlemen, walk in? Come in and see that turkeys dance! It's cur'ous = real cur'out. You wont wish you hadn't if you du sec it once, but you will wish you had thousand times, if you don't see it!"

'Turkeys dansing? Fact, and no mistake ?' 'Sarting Come in and see, if you don't beieve it. If 'taint so, you can have back your wo shillin' Perhaps them other gentlemen that's with you would like tu come in, tew. Its only tew shillin', any heow!' -

This was a dialogue which I heard before the door of a shanty at a General Training'an October gathering in one of the interior towns of the Empire State, in one of its midland counties.

I was one of 'them other gentlemen' referred to, and I-disbursed the 'two slillin',' referred to, and entered, as did many others, " who, similarly attracted, followed us into the shanty.

'Wal, gentleman,' said the exhibitor, who was an out-and-out Pankee, expect we might as well begin. You see that ere long coop of turkeys. Wal, I shall feed 'em fust; and pretty soon-arter, when they begin to feel their onts (but that's a joke, 'cause we give 'ein forn,) you'll see 'em, as soon as the music strikes up, you'll see 'em begin to dance.'

The coop, which ran along the end of the shanty, furthest from the door, was about fifteen feet long, and must have contained ... some twenty or thirty turkeys; heavy fellows they were, too, most of them-perfect streasures for a Christmas or New Year's table -Into this coop our exhibiter threw perhaps a peck-or at least half a peck-of corn. ...

This was soon gathered up, not without much squabbling and fighting on the part of the feathered recipients, who wanted to see fair play-that kind of fair play meaning which would give up to the complainants the urgest half of the provander. ...

Presently it was al! devoured; and the audi-

ence called for the performance promised. 'Yes, yes,' said the exhibiter, 'don't be in tew big a stew. give us time, if you please.

Strike up music-Give 'em a lively teewn !! At this a cracked flute, an old black, greasy fiddle, manned by a thicklipped negro, and au ear piercing fife started off with Yankee Doodle,' at very quick time; and sure enough, every Turkey in the coop began to dance, ropping from one leg to another, crossing over..... batancing, chasseing-doing everything, in short, known to the saltatory art, except joining hands' and turning partners."

"Well, that is curious!' exclaimed the auditors, simultaneously. __I_never saw anything like it before ! . . .

"No,' said the exhibitor I expect you didn't. 'It's all in edication,' as the poet says. I edicated them turkeys; and there ain't one on. 'em that hasn't a good ear for music.' Hereupon he turned to the audience, and added:

'Wal, you've seen it and see how natural hey do it; now we want you to vacate the room; and give them a chance that's on the outside. There's new customers out there a watin', and if you only tell 'em outside what' you've seen with your own eyes, you'll be doin a service to me, and give to them a equal pleasure with what you have enjoyed.'.

This was soon done; the audience retired and another took their place-including one, however, who had been an auditor at the last exhibition. The same scene was gone through with; the same feeding, 'music and dancing,' only it was observed that the motion of the turkies was even livelier than before.

It struck the twice-observer that just before the music-began a man was seen to leave the oom on both occasions, and, aunoticed, he stopped out himself the last time and saw the, man busying himself with putting some light kindling wood under an opening beneath the shauty."

The mystery was now out. The turkey-cage rested over a slow fire, with a tin floor, and when the music struck up the fire had become so hot that the turkeys hopped about, first on one leg, then on the other, and changed positions, 'seeking rest and finding none, until the fire had gone down and they were ready for another feed!

. It is proper to add that the author of thisinvention was a Yankee of the first water the Orpheus of Turkeydom.

Bes Lieut, Maurly has demonstrated that by wind and wave it is down stream from our country to all the world; and that all nations must ascend to reach it. With an ocean on either hand, its power descends with colerity to every country on the sphere, and that, too, from even the deepest interior of the

Wiggings, what era of the world's, history do you regard with the deepest ing the second state of the second horror?'

'The chol-aral' gasped Wiggins, with a spasmodic abudder.
