An Eccentric Doctor.

Dr. Joshua Caldwell, who lived for many

years in the town of Florence, out on the Western Reserve in Ohio, was a most skilful doctor, but one of the most eccentric and absent-minded men in the world, except Margaret, his wife, who was fully his equal. One summer morning the Doctor got caught in a tremendous shower, which drenched him to the skin. It soon cleared off, however, and Dr. Josh, rode into his own yard, where he took the dripping saddle from the horse, and let him go adrift in the pasture. The saddle he had placed on a stout log of wood, which was elevated some four feet from the ground on two posts, where the Dector had begun tobuild a platform to dry peaches on. After having got his eaddle all fixed so that it would dry he took the bridle, and putting the bits over the end of the log, he stretched out the reins, and hitched them to the horn of the saddle, and went in to change his wet clothes and get breakfast. Joshua, junior, was from home on a visit, and so the seniors sat down together to the morning's meal. When they were about half through, Jim Atwood, a farmer, who lived about eight miles distant, came in, telling the doctor he wished he would hurry and go over to his house, as he reckoned he might be wanted there before night. The Doctor promised to be there, and Jim went off in a hurry to the village for the necessary fixins. When the Doctor had finished his breakfast he took the saddle bags, and out he went into the yard, where he deliberately mounted the saddle, and set out in imagination for Jim Atwood's. For a considerable length of time he rode on in the most profound silence, with his eyes intently fixed on Buchanan's Practice, which lay there open on the saddle before him. At length he began to feel the effects of the ferce rays of the midday-sun, and looking up from his book, he discovered a comfortable little house close to him, upon which he sung out lustly for a drink of water. Aunt Margaret, who had been for the last two hours, very busy in the garden, made her appearance with a pitcher of milk, and after the thirsty stranegr, had taken a long draught, the two enterel into an animated conversation, the Doctor launching out into rapturous praises of the scenery about the place, the neatness of, the building, the fine orchard of peach and apple trees, and the lady, who had got a glimpse of the saddle bage, made a great many inquiries about the health of the neighborhood, and things in general. The Doctor finally took leave of the lady, assuring her that he would call on his return and have some further conversation with her; as she reminded him so much of his wife, who, he was sure, would be happy to become acquainted with lier,.
