

Farmers' Department.

English and French Agriculture.

An article, in a late number of the Edinburgh Review, gives some curious and instructive facts in reference to the agriculture of France and Great Britain. The former country, in spite of having the finest climate, actually produces less per acre, than the latter, for while the average yield of wheat in France is thirteen and a half bushels to the acre, in the United Kingdom it is twenty-eight bushels.

The cause of this inferiority is the comparatively slovenly farming of France. Though Great Britain has one-fourth less population and soil, the number of cattle in that kingdom is nearly equal to those in the empire. The results are two fold. Firstly, a much smaller proportion of the soil in France is laid down in those pastures, roots and artificial grasses, used in raising cattle; and, secondly, the supply of natural and artificial manures is much less abundant than in Great Britain. Moreover, the rotation in crops being less perfectly understood and practical, about one-eighth of the arable land is left fallow each year. In the British isles out of about forty-six millions of acres under cultivation, thirty-six millions are devoted to growing food for live stock, and but ten millions to food for man; but in France, twenty millions only are given to the ameliorating crops, while the exhausting crops, or those which give food to man, occupy forty millions. With fewer acres under cultivation, therefore, France could raise more wheat, if her agriculture was more scientific.

France, taken as a whole, produces about eight dollars an acre; England, sixteen. The annual produce of an English farm is equal to the total yield of a French farm of similar size. The value of land in England averages two hundred dollars per acre; in France it averages only about one hundred. The consumption of animal food in France, including fowls, fish, eggs, and cheese, as well as meat proper, is but one-sixth of a pound daily, or barely one-third of that in England. There is no doubt that the climate requires less animal food in the former country than in the latter; but still this disparity is excessive. Two hundred years ago, the agriculture of France was far more advanced than that of England. During the seventeenth century, the former country constantly exported corn to the latter. But from the time of the great wars of Louis XIV, the agriculture of France has stood comparatively stationary, while that of Great Britain has been improving ever since the close of her civil wars. Unsettled governments, the drain of men for the army, and the impoverishment caused by long wars, have produced the evils in the one case, as their absence has led to this vast material progress in the other.

Louis Napoleon, now apparently seated firmly on his throne, at least for life, may do much to redeem France from this inferiority. He has proclaimed himself the friend of material progress, and, to do him justice, has really stimulated French industry in many directions. It remains to be seen if he will assist, as much as he might, the development of French agriculture. If he can raise the product of wheat, per acre, from thirteen and a half bushels, to twenty-eight, he will have done more for his country than if he had conquered Moscow, subjugated Turkey, or annexed Naples. The hundred victories of his uncle, the glories of Marengo and Austerlitz, will be as nothing, compared with such a reform in the farming of France.

How to Start Melons.—A correspondent of the Country Gentleman gives the following plan for starting melons: "My plan for obtaining early plants is, to construct a rude basket or wickerwork of willow or other twigs, something like a bird's nest, without the inside filling up. Make a hole in the soil of the hot bed of sufficient size to admit the basket, fill up, plant and cover the seeds, rake and smooth the surface. When the weather is warm enough, and sufficiently settled to admit of outside planting, I make my hills, and lift the little baskets containing the plants, and carefully remove them to their places, where they quickly strike through the open net work of the basket into mother earth, and soon repay all trouble for giving them 'a start in the world.'"

To Agriculturists.—In her increase the moon supplies more electricity to the atmosphere; hence all vegetation which depends upon the atmospheric electricity for nourishment should be sown then.

Blossoming shrubs, or plants, should be sown, planted, or set, just after the new moon. If sown, planted, set, or pruned near the second quarter, they grow thrifty but seldom bear much flowers or fruit—to yield best, seed should be sown, fruit trees set or pruned, some four to two days before the full moon. If such vegetables or trees are sown, &c., after the full, they seldom realize expectation; but esculent roots, potatoes, onions, beets, &c., depending for nourishment on terrestrial magnetism instead of atmospheric electricity, do best when sown or planted in the decreasing moon.—*Monthly Rain-bow.*

Education.

WHITE HALL ACADEMY.—Three miles west of Harrisburg. The eleventh session of this Institution will commence on Monday, the 6th of May, next. Parents and Guardians are requested to inquire into the merits of the Institution. The location is retired, pleasant and healthy, and the course of instruction embraces the ordinary and higher branches of an English Education; together with the Latin, Greek, French, and German languages, and vocal and instrumental music. Terms, boarding, washing, and tuition in the English branches, and vocal music per session (21 weeks), \$80.00. For circular containing particulars address:
D. DENLINGER, Harrisburg, Pa.
March 12, 1866.

CARLISLE FEMALE SEMINARY.—MR. and MRS. CLARK, who have been for several years engaged in teaching, respectfully announce to the citizens of Carlisle and vicinity, that on the 1st of April, 1866, they will open, in Leathur Street, in the house lately occupied by J. H. Smith, a SEMINARY FOR YOUNG LADIES. The Institution will be both a boarding and day school, in which all the branches necessary for the complete education of young ladies will be taught. The aims of the highest character for piety, qualifications and morality will be employed in accordance with the wants of the Institution. The government will be conducted on strictly Christian principles, while sectarianism will be scrupulously excluded. The principal duties themselves that their long and successful experience as teachers, as testified by the recommendations in their possession, will enable them to establish an Institution of the highest character for young ladies. They are fully persuaded that such an Institution will be sustained here by the citizens and neighboring country, and hope that their confidence may not be disappointed. A department for younger children will be immediately added. TERMS PER SESSION OF FOUR MONTHS: Boarding, including fuel, lights, and washing, \$50 00; Primary Instruction, 8 00; High School, 12 00; Ancient Languages, each, 6 00; Modern, 8 00. Ornamental branches at professor's charges. No deduction for absence after entrance, except in case of protracted illness. REFERENCES: Hon. FREDK. WATTS, Rev. C. P. WING, J. H. PARKER, Esq., A. H. KREMER, JAMES HAMILTON, Esq., JACOB FREY, Dr. C. E. WILMOT, Esq., " " BELLS, Rev. J. B. MOORE, March 19, 1866—1 year.

COMMERCIAL COLLEGE.—Removed to the commodious building, No. 99 and 101 BALTIMORE STREET, Baltimore, Md. O. K. CHAMBERLAIN, Principal and Lecturer upon Mercantile Science. E. K. LORER, in charge of Writing Department. G. W. KIRBY, Instructor in Mercantile Calculations and Associate in Book Keeping Department. J. M. PHILLIPS, Teacher in Book Keeping. A. J. WILLIAMS, Lecturer on Commercial Law. Three years have not yet elapsed since the establishment of this Institution, during which time upwards of eight hundred students have been in attendance, (representing nearly every State in the Union) among whom are numbers in Baltimore and elsewhere occupying prominent positions as business men and accountants.

COURSE OF STUDY.—The Principal has the utmost confidence in assuring the public that after an experience of fourteen years in qualifying young men for the Counting Room and other important stations, and an extensive acquaintance with the management of business, he is enabled to give a course of training in this department which is eminently practical and well adapted to the various pursuits of Commerce and Trade, including Individual, Partnership, Mercantile, Manufacturing, Commission, Exchange, Banking, Shipping, Steamboat, Compound Company operations, &c. PEASBURY.—The exercises under this head are of a most interesting and practical character, and are conducted with beauty of construction, thus enabling the student to write an elegant business hand on completion of the course. MERCANTILE CALCULATIONS in all their various bearings are taught by the most accurate and expeditious method. Daily lectures are delivered upon the Science of Accounts, Mercantile Customs, &c., these in connection with the practical exercises, are of the highest importance to all aspiring to occupy prominent positions in the business community. The time necessary for an industrious student to complete the course is from 8 to 12 weeks. Being no vacation, applicants can enter at any time, and attend both day and evening. Examinations are held at stated periods, and diplomas awarded to those who graduate. For terms, etc., write and have a circular forwarded by mail. [Oct. 3.]

HERRING'S PATENT, CHAMPI-ON FIRE PROOF SAFES, with Herring's Patent Powder Proof Locks, which were awarded separate Medals at the World's Fair, London, 1861, and also at the World's Fair, New York, 1863 and '64. The subscribers are the sole manufacturers and proprietors in this State of the above unequalled Safes and Locks. The reputation of the "Herring's Safe" is world wide, and for the last thirteen years the mercantile community have witnessed and borne testimony to their never failing fire proof qualities. More than 12,000 of these Safes have been actually sold, and several hundred have passed triumphantly through accidental fires. The public are assured that all Safes manufactured by the subscribers are not only guaranteed to be fully equal, but in many respects even superior to those which have so severely tried by fire. They will forget their services in the burning of the "Tribune establishment," New York, and at the Great Fire in Strawberry street, at the large fair last July, opposite the Girard House; and still more recently, in the fire at Fifth and Chestnut sts., in the city of Philadelphia, in which these Safes came forth the acknowledged CHAMPION, when many other securities failed. FARRER & CO., 34 WALNUT STREET, Philadelphia. Chilled Iron Safes, with Powder Proof Locks, manufactured expressly for Banks, Brokers, Jewelers, and others requiring security from rogues. Bank Vaults, Doors, &c. on hand and made to order. All the most celebrated brands of safe manufacturers' prices. Second hand "Safes," "Salamanders" and "Iron Chests" of other makers have been taken in part payment for Herring's for sale at half price. apr

HOWARD ASSOCIATION, PHILADELPHIA. IMPORTANT ANNOUNCEMENT. To all persons afflicted with Sexual diseases, such as SEMINAL WEAKNESS, IMPOTENCE, GONORRHOEA, GLEET, SYMPHILIS, &c., &c. The HOWARD ASSOCIATION of Philadelphia, in view of the awful destruction of human life and health, caused by sexual diseases, and the deceptions which are practiced upon the unfortunate victims of such disease, by quacks, have directed their consulting Surgeon, as a permanent and reliable source of information, to give MEDICAL ADVICE GRATIS, to all persons thus afflicted, (Male or Female), who apply by letter, (post-paid), with a description of their condition, (age, occupation, habits of life, &c.) and in extreme poverty and suffering to FURNISH MEDICAL ADVICE GRATIS.

The Howard Association is a benevolent Institution, established by special endowment, for the relief of the sick and distressed, afflicted with "Venereal and Epidemic diseases," and its funds can be used for no other purpose. It has a surplus of means, which the Directors have voted to advertise the above notice. It is needless to add that the Association commands the highest Medical skill of the age. Address, (post-paid), Dr. J. R. CALHOUN, Consulting Surgeon, Howard Association Philadelphia, Pa. By order of the Directors, EDWARD H. HEARTWELL, President. GEO. FARRER, Secretary. april 11.

DOLLARD, Premium Artist in Hair Dressing.—Inventor of the Celebrated Gossamer Ventilating Wig and Elastic Band Toupees. Instructions to enable Ladies and Gentlemen to measure their heads with accuracy. For Terms, see circular. No. 1. The round of the head; No. 2. From forehead over the head to the neck; No. 3. From ear to ear over the top; No. 4. From ear to ear round the forehead. Toupees and scalp, inches—No. 1. From forehead to back of the head; No. 2. Over forehead as far as required; No. 3. Over the crown of the head. DOLLARD has always ready for sale a splendid stock of Gents' Wigs, Toupees, Ladies' Wigs, hair Wigs, Frisettes, Braids, Curis, &c., beautifully manufactured and as cheap as the market. DOLLARD'S Hair Tonic, prepared from South American Herbs and Roots, the most successful article ever produced for preserving the hair from falling out, or changing color, restoring and preserving it in a healthy and luxuriant state. Among other reasons why DOLLARD'S hair cutting saloon maintains its immense popularity is the fact that his Tonic is applied to every head of hair, cut at his establishment, consequently it is kept in better preservation than under any known application. It being thus practically tested by thousands, offers the greatest guarantee of its efficacy. Sold wholesale and retail at his Old Establishment 177 Chestnut street opposite the State House, Philadelphia. DOLLARD has at last discovered the no plan ultra of HAIR DYE, and announces it for sale with perfect confidence in its surpassing every thing of the kind now in use. It colors the hair either black or brown, (as may be desired) and is used without injury to the hair or skin either by state or country. It can be washed off in ten minutes after application, without detracting from its efficacy. Persons visiting the city are invited to give him a call. Letters addressed to D. DOLLARD, 177 Chestnut st., Philadelphia, will receive attention. Jan. 25-'71

FRENCH TRUSSES.—Hernia or Rupture successfully treated, and comfort insured, by use of the celebrated French Trusses, imported by the subscriber, and made to order expressly for his sales. All suffering with Rupture will be glad to learn that the occasion now offers to procure a Truss combining extreme lightness, with ease, durability and correct construction, in lieu of the cumbersome and uncomfortable article usually sold. An extensive assortment always on hand, adapted to every variety of Rupture in adults and children, and for sale at a range of price to suit all. Cost of Single Trusses, \$3, \$4 and \$5; Double, \$4, \$5, \$6, \$8 and \$10. Persons at a distance can have a Truss sent to any address by retaining the amount, sending measure around the hips, and stating side affected. For Sale Wholesale and Retail by the Importer, CALBET H. NEEDLES, 3 S. W. cor. of Twelfth & Race Sts., Philadelphia. Depot for Dr. Bauman's Improved Patent Body Braces, Chest Expanders and Erector Braces; Patent Shoulder Braces; Suspensory Bandages; Spinal Props and Supports. Ladies' Rooms, with competent lady attendants. april 11.

DRUGS—Patent Medicines, Fine Chemicals, Instruments, Essences, Oils, Syrups and Extracts, Spices, Condensed and whole, Essences, Perfumery, &c. Cod Liver Oil—warranted genuine. DYE-STUFFS—Indigoes, Madders, Samse, Alum, Log and Gum Woods, Oil Vitriol, Copperas, Lac Dye. PAINTS—Weathered & Brother's Pure Lead, Chrome Green and Yellow, Paint and Varnish Brushes, Jersey Window Glass, Linseed Oil, Turpentine, Copal and coach Varnish, and Red Lead. All of which will be sold at the very lowest market prices, at the cheap Drug Store and Fancy Store of the subscriber on North Hanover street. S. W. HAVESTICK.

Agricultural.

AGRICULTURAL IMPLEMENTS.—PENROCK'S CELEBRATED WHEAT DRILL. Adapted also for sowing oats, grass seeds and guano. Kratzer's Portable Gleaner-Mill, the best in the market. Halliday's patent Windmill. Horse Power's and Thresher's, Lime and Guano Spreaders, Daniel's Hay, Straw and Fodder Cutter. Churn. The above Superior Implements of all others, for the use of the farmer or gardener, for sale Wholesale and Retail by PASCHALL, MORRIS & CO., Agricultural Warehouse and Seed Store, corner 7th and Market streets, Philadelphia. July 25, '66.

LANDRETH'S AGRICULTURAL WAREHOUSE. Nos. 21 and 23 South Sixth Street PHILADELPHIA. AGRICULTURAL IMPLEMENT MANUFACTORY, Bristol, Pa. Seven Grounds (370 Acres) Bloomfield, near Bristol, Pa.

PATENT SELF-SHARPENING YANKEE FRED CUTTERS, manufactured for ADRICH & SARGENT, No. 410 Market street, Philadelphia. This cutter is superior to any now in use, for strength, durability, and simplicity of construction; it cuts fast, and is the only self-sharpening Hay, Straw and Corn Stalk Cutter ever made. It has but ONE ADJUSTABLE KNIFE, which any person can grind and set with ease, but in ordinary case, is ground in the machine. Thousands have already been sold, and the demand is daily increasing. In most cases an examination is sufficient to convince one of its superiority. No one after a short trial would part with it for any other. All sizes of the above constantly on hand and for sale by J. P. LYNE, Sole Agent for Cumberland county. oct1

SCOTT'S LITTLE GIANT CORN AND COB MILL, PATENTED MAY 16th, 1864. "LITTLE GIANT," though recently introduced from the West, now stands pre-eminent as the most SIMPLE, EFFICIENT, and popular Farm Mill of the age. Our MANUFACTORY are probably the only ones in the World—exclusively devoted to making Metallic Mills, and producing superior advantages in preparing such an admixture of metals, as best adapted to making a strong and durable article. The LITTLE GIANT has been awarded the First Premium at the principal Fairs of the Nation, as the most complete and convenient Mill now in use. These Mills are not only guaranteed superior to all others in their construction and quality of material, but in the amount and quality of work they perform with any given power; and warranted in all cases to give, or the purchase-money refunded on return of the mill. They are offered to Farmers and the trade complete, at \$28, \$32 and \$36, for No. 1, No. 2 and No. 3, and \$2 extra for freight. Warranted to grind from 8 to 15 bushels of corn per hour according to size of mill. SCOTT'S NIMBLE GIANT GRAIN MILL (PATENTED MAY, 1865).

This Mill is a most complete and important article for Planters, Farmers and others, having horse-power or other conveniences for running a belt. They can be worked advantageously with one, two or more horses, wherever a speed of from four to six hundred revolutions per minute can be obtained upon a 14-inch pulley, with 100 lbs. of belt. These Mills are adapted to any kind of work, grinding coarse feed from corn, oats, &c., or fine meal from corn, wheat or rye; and corn & cob in the most satisfactory manner, and with a vast saving of power over all other mills, the cob being separated with sharp cast-steel. The first premium was awarded these Mills at the late Fairs of New Jersey, Pennsylvania, and the Industrial Exhibition at Boston. The Nimble Giant weighs about 300 pounds, occupying a space of 30 inches square in its compact, simple, strong and durable; requiring no skill to run it, or to keep it in order. They are offered complete, ready for attaching the belt, at \$55; with cast steel attachments, \$65. War-bushels of corn, the most perfect satisfaction. Please call at the Little Giant Works, and witness their operation. Manufactured by ROBERT SCOTT & CO., Cor. 17th & Coates St., Phila. Feb. 13, 3mo—pd.

RAKES! RAKES! RAKES! FARMERS, ATTENTION! SANDERS' IMPROVED HOUSE-RAKE. Patented June 7, 1865. The subscriber, having purchased the interest of his partner, Moses C. Eberly, is prepared to manufacture the above Rake on reasonable terms, at the old stand opposite the Steam Sawmill. This Rake is simple in construction and not liable to get out of order; it is well adapted to the raking of hay or grain, and works well in rough or stony ground, having metallic spring teeth. Its operation is most easy and simple—the operator, instead of operating the rake with his hands, rides, and controls it with his feet. Even a lame or lazy person can earn good wages with one of these rakes without much exertion; or a gentleman wishing to amuse himself can get on his rake, ride about his fields as he pleases, do as much work as any of his hands, and ride back to tea. Persons who have tried this, consider it the cheapest, simplest, and best House Rake now in use, and all sold last season gave general satisfaction. It was exhibited at the State County Fairs, and at the State Fairs of Pennsylvania and Michigan, and drew the First Premium at each. Having met with reasonable encouragement last season, the subscriber would, return thanks for past favors and solicit all persons in want of a good rake to give him a call at the Park Foundry, Mechanicsburg, Pa., at the manufactory. Any person having light wagon wheels, about four feet high, can have a rake made to order by sending a list of wheel, length of hub, and size of horse. Terms EASY—Price \$20 with wheels, and \$12 without. Orders addressed to the undersigned, at Mechanicsburg, Pa., will receive prompt attention. March 26, 1866—Gm.] G. W. MILLER.

MACKEREL, SALMON, HERRING, POIK, TUNA AND SIDES, BRIOULEERS, LARD AND CHEESE. Constantly on hand and for sale by J. PALMER & CO., Market St., Wharf, Philadelphia. April 1, 1866—Sm.
