CANAL COMMISSIONER; THOMAS E. COCHRAN, of York C-AUDITOR GENERAL, DARWIN PHELPS, of Armstrong Co.

SURVEYOR GENERAL, BARTHOLOMEW LAPORTE, Bradford

Our thanks are due to the Hor Lemuel Tod ; for Congressional dock

The acknowledgement of Walker government in Nicaragua is now the ex citing subject in Washington. The Cabinet is divided on the point.

MR. BUCHANAN'S PROSPECTS.—The presses in the Buchanan interest, throughout Pennsylvania, are filled, say a contemporary, with stirring appeals in behalf of the " favorite son." Pathetic addresses in favor of Mr. Buchanan, are sent abroad to influence their brethren in other States, and long editorials are written, showing how patiently the Democracy of Pennsylvania have waited for an opportunity to furnish to their brethren of the Union a candidate for the Presidency. A sort of biography of Mr. Buchanan, intended for Southern market, proving that he has been true to the interests of Slavery, on all occasions, has been published and is sent abroad in every direction. This desperation of the Buchanan journals does not augur favora bly for the "man of their choice." Obsoure and insignificant men have hereto fore, by the aid of the two-thirds rule been nominated over the heads of their great men, and this may be the case a gain, by the Cincinnati Corvention. An under current is at work, intended to damage the prospects of Buchanan .-President Pearce, aided oy his Cabinet, is working for a re-nomination, while Hunter of Virginia, Rusk of Texas, Douglas, and many other lesser lights, in case Buchanan is driven out of the field, have hopes of being successful in obtaining a nomination. The head of Mr. Buchanan is by no means resting upon a bed of roses.

GEN. CASS .- A Washington letter mriter says that as the meeting of the Cincinnati Convention draws near, new combinations are formed, new schemes \_ hatched, and new\_programmes arranged. It is a great mistake to suppose that either Gen. Cass or his friends consider him out of the ring. They are not only watching the chance for a decided demonstration, but they are planning with reference to contingencies in which he may be presented as a compromise candidute. A part of the expectation of success is predicated upon a reversionary interest in Mr. Buchanan's strength, af. ter he has been disposed of. The home organ of Gen. Cass says he will not and shall not be abandoned, and, it is not uncharitable to suppose, there is at least one distinguished person who is of the same way of thinking.

NORTH CAROLINA .- An active can vass for Governor was, at the latest accounts, progressing in North Carolina. On the 8th instant the rival candidate were to commence "stumping" the Stat having eleven appointments in all.

Leslie's Illustrated Newspaper, comes to us regularly and continues t improve in its appearance. It is not decidedly the best illustrated paper pullished in the United States.

#### PHILADELPHIA ELECTION.

The Locofocos of Philadelphia made a clean sweep at the election for city officers last Tuesday. They elected their Esq.) City Solicitor, City Controller, Receiver of Taxes and City Commissioner. The majority for Vaux over Henry D. Moore, the American candidate for Mayor, was some 4,000. The new Select Council stands, Locofocos 15, Ameria cans 8, Whigs 1.-Common Council, Locofocos, 66, Americans 19. The Board of Guardians for the Poor, Board of condense the following particulars: Health, Board of Prison Inspectors, have also been carried by the Locos by corresponding majoriti's.

This result is not an unexpected one, nor can it be claimed as a democratic most approved kinds; an aqueduct of six victory. Even in the address of the inch cast iron pipe, from the creek to the Mayor elect to his evu ting friends on the night of the election, it is not claimed as such. The City Councils were accused-of extravagance in the administration of affairs and the charge was generally believed. Thousands of Whigs and Americans desired a change of administration and to effect the change voted with their opponents. In so doing, however, they were actuated by the spirit of local reform alone, without any intention of permanently abandoning their old cherished party organization. When national measures and a national election comes. up, things will be very different. A defeat is sometimes an advantage to a party. It causes men to reflect, and if they have gone wrong, to retrace their steps. We have confidence in the majority of ble of distilling and registering 50,000 cubic voters in Philadelphia, and believe that feet of gas every twenty four hours. The when their votes are wanted, they will receipts and expenditures of the company are be on the right side.

## CREDIT FULLY GIVEN.

Congressman Orr, of South Carolina, has published a letter to the Hon. C. W. Dudley, upon the subject of the Cincinnati Democratic Convention, in which in behalf of the South and of Slavery, he gives the Democratic Party the following eredit for sérvile "work and labor dong and performed:"--

"The northern Democrats aided us to bring into the Union Texas, a magnificent slave-holding Territory-large enough to make four slave States, and strengthened us more in that peculiar interest than was ever before done by any single act of the Federal Government. Since then, they have amended a very imperfect fugitive slave law, passed in 1793, and have given us now a law for the recovery of fguitive slaves, as stringent as the ingenuity of man could devise. Since, then they have aided us by their votes in establishing the doctrine of non-intervention with Slavery by Congress in the Territories. Since then they have actually repealed the Missouri restriction, opened the Territories to settlement, and enabled us, if the South will be true to herself, and aid in peopling Kansas, to form another State. In 1843 a man would have been pronounced insane, had he predicted that slavery would be introduced there by the removal of Congressional restrictions."

Col. A. K. McChure is recom mended in a recent number of the Frankof the counties of Franklin and Adams. We heartily endorse all that the writer says in regard to Col. McCLURE, and would be pleased to hear of his nomina-

The official majority for Vaux, for Mayor of Philadelphia, is 4,089, and for Ambruster, for Tax Receiver, 5,026.

ACCIDENT.—We regret to learn from the Meadville Journal that the Rev. R. Chaig-HEAD, the esteemed pastor of the N. S. Presbyterian church in that place; had a leg broken on the afternoon of the 6th inst. on the Eastern Plank Road, about a mile from town. He was returning from an appointment at Titusville on horseback, when his horse stumbled and fell. Through his physician, Dr Bell we learn that it is a simple fracture, and that Mr. C. is not otherwise injured.

ANOTHER STEAM BALLOON .- A. M. Tippet, in Washington, D. C., is at work on a steam balloon, and it is stated in some of the papers, for in the Secute, to enable him to construct ly true. The impulse given to improvement one to-carry the mails to Cal fornia. 

### Cown and County Matters.

GARLISLE GAS AND WATER WORKS. The second annual report of the Carlisle Gas and Water Company, signed by the Hon. candidate for Mayor, (Richard Vaux, FREDERICK WATTS, President of the Company has just been published in pamphlet form .-Both works are now near completion. For the last year our citizens have been enjoying the benefits of a copious supply of pure and wholesome water from the Canedoguinet creek, and in a few days more the brilliancy of gas light will be added. The report states many interesting facts in relation to the construction and cost of the works, from which we

The Water Works consist of a frame dam, 186 feet in length, across the Canedoguinet, about a mile and a quarter north of the bor ough; a brick water house, enclosing two pumps, water wheels and machinery of the reservoir, a distance of 6,140 feet, which raises the water 187 feet; two reservoits. each 110 by 128 feet on the bottom and 11 leep; an aqueduct from the reservoir 420 feet, of ten inch pipe, and 8,500 feet of eight inch pipe to the centre of the borough. The amount of pipe laid to and through the borough exceeds nine miles in length, all of which is laid three feet below the surface of

the ground. The Gas Works consist of a retort house 80-by- 42-feet, containing four benches of three retorts each; a purifying house, 25 by 42 feet, containing four purifying boxes; lime room, meter room and office, with a large workshop on the upper floor; a coal house 25 by 42 feet. These buildings are all of brick, the retort house having an iron frame and slate roof, and the coal house an iron roef. The Gasometer is 50 feet in diameter and 18 feet deep. The whole work is enpagiven as follows:

#### \$54,656 00 Cash received for stock, 19,185 42 on Permanent Louns, 15,500 00 or F. Watts, Esq., (broken pipe) Water rents, of F. Watts, President, 1,498 97 474.84 " Water rents,

\$91,867 86 standing liabilities not yet matured and work yet to be done which may amount to about \$7,000. The entire cost of the work, however, it is estimated will not exceed \$82,008. The report expresses the belief that works of a like kind have never before been erected at so low a cost. When the works were projected, and proposals for their construction invited from various contractors, the lowest offer involved an expenditure of \$130,000. Impressed with the conviction that the work could be done at a far less cost, the energetic President and Directors of the company, with a public spirit as creditable to themselves as it has proved profitable to the stockholders, determined to lin Repository as the Union candidate take the construction of the work chiefly into for State Senator in the district composed their own hands. The result fully vindicates the propriety of their course. Our borough now enjoys the inestimable advantages of Water and Gas works of the most perfect character at a cost unprecedentedly low. The skill and energy of the two principal officers employed by the Board are alluded to in warm terms of eulogy. "To A. F. SMITH, the superintendant of the Cumberland Valley Rail Road," says the report, "we are entirely indebted for the original plan of the Water Works and all the machinery, and for his constant advice and direction in its execution. And to THEODORB IRISH, our own engineer, for the admirable, judicious and economical manuer in which that work was executed. To Mr. Irish also belongs the credit of having planed and executed the Gas Works in a style so preditable to himself and profitable to you, as exidenced by the fact that in the laying of nine miles of pipe it has not yet been discovered that there is a single leak of gas or water." The Board may well congratulate the stockholders that in two years an enterprise has been achieved which has done more to enhance the value of property and promote the comfort of the citizens of Carlisle than any previous public improvement. This is strict-HANNON, in the 72d year of her age.

progress is at work at last and our ancient borough is awakening from the sleep of years to new life and prosperity. With the comple tion of the Water and Gas works a new era has dawned upon our borough, and to the President and Directors of the company, who have at great personal sacrifice devoted their time and energies 30 the work, our citizens certainly owe some substantial token of their appreciation and regard.

TAVERN LICENSES. The special Court for granting licenses attracted a considerable number of persons to town yesterday and warm interest was manifested. The Court was occupied the whole day in examining the applications, and the difference beween procuring license under the old and present law was strikingly demonstrated. Each applicant found it necessary to have one or more Attorneys and each application had to be accompanied by a bond with sufficient security. A-good-deal of unensiness was perceptible on the part of many of the applicants until their claims were decided. The cost of licenses will average about \$40 each and amounted to about \$1700.

The application of Thomas Costamagna, keeper of " Our House," in Carlisle, was held over to the Angust sessions. No remonstrance was presented but upon the interrogation of the court it was admitted by his counsel that he would not, under the naturalization laws, be a citizen until the month, of August. In connexion with this application the court remarked that "Our House" under the former landlord had a bad reputation, being a place of riesort for private soldiers from the garrison and other disorderly persons. The court then gave notice in emphatic terms that the public houses of the borough were licensed for the purpose of entertaining strangers and travellers and not to sell liquor to soldiers, and that hereafter the fact of any landford selling a single glass of liquor to a soldier would be held as sufficient ground for refusing a renewal of license. A remonstrance was presented against the application of Isnac l'arsons for license of the Mansion House in Carlisle. This remonstrance was met by a petition from a large number of citizens, setting forth the merits of the house and earnestly urging the granting of the li-78 121 cense. The application was warmly contested but after a patient hearing the court de-467 21 cided that the objections were not sustained by testimony and that the license should be granted. Objections were also made to the application of Wm. Moudy, of Carlisle, and the case was held over to the August sessions. In Shippensburg there were six applications, while only three were granted. But one license was granted in Hogestown. Two of the applications in East Pennsboro were refused. The list of licenses granted is as follows:

The proprietor in calling the attention of the public

The proprietor in calling the attention of the public to this preparation, does so with a feeling of the utmost confidence in its virtues and adaptation to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American pecple, and its reputation and sale is unrivalled by any similar preparations extant. The testificony in its favor given by the most prominent and well known Physiciaus and individuals in all-parts of the country, is immense.

DERANGEMENTS OF THE LIVER AND STOMACH. DEMANUSCIENTS OF AIR INVERTIGATION ACTIONAL ATTENUATES OF AIR INVESTIGATION AT SOURCES OF INSANITY. From disorder or obstruction, a morbid action of the sympathetic and other nerves follows, and the functions of the brain are impaired and deranged: derangement there will also produce diseases of the heart, skin, lungs and kidneys. It is owing to the same cause that thousands dis with Cholera, Billous of Yellow Fever, and that most baneful disease, Consumption.

Billious of Yellow Fever, and that most baneful disease, Consumption.

The general want of success in treating diseases of the liver and stounch, has not been a deficiency of pathological knowledge of their functions—but of a suitable compound that would act upon the disease and all the sympathetic affections. That has been gained in these Bitters: and they can be used by persons with the most delicate stomach with perfect safety—as they at no time debilitate the patient, but give strength and increase the netwous energy. They can be taken at all times, and under all circumstances. No ordinary exposure will prevent thom having a, salutary effect, and no had effect can result from an over dose.

If patients will persevere in the use of this remedy, and use it strictly according to directions, it will cure the foregoing diseases in every instance, if not beyond the power of medicine; it has caused many to enjoy the blessing of renewed health, and it many desporate and abandoned cases, a purfect and rudical cure:

PERSONS ADVANCED IN LIFE,

and abandoned cases, a perfect and ridical care.

PERSONS ADVANCED IN LIFE,

And feeling the hand of Time weighing heavily upon
them, with all its attendant ills, will find in the use of
the Bitters an Elixer that will instil new life into their
veins; restore, in a measure the energy and ardor of
more youthful days; build up their shrunken forms,
and give health and happiness to their remaining

and give health and happiness to their remaining years
It is a well established fact, that fully one half of the female portion of our population, are seldom in the early means and the female portion of our population, are seldom in the early means are seldom in the early means are seldom in the early extremely nervous, and have no appetite. To this class of invalids, these Bitters are especially recommended. Their peculiar tonic and invigorating properties render them invaluable in such cases.

Persons visiting districts harrassed annually with FEVER AND AGUE, or ANY FEVER OF A BILIOUS NATURE, will find that by the timely use of one or two bottles, they will not in one instance take the disease, as the Bitters will renevate and strengthen the system, and carry the bile off in its natural channel.

Prevention is botter than cure.

Prevention is better than cure.

THEY ARE ENTIRELY VEGETABLE
And free from Alcoholic Stimulant, and all injurious ingredients; are pleasant in taste and smell, mild in their operation, will expel all morbid secretions from the body, give bloom to the pallid cheek, and health and vigor to the fasme.

Price 75 cents per bottle.

Principal Office, No, 96 ARCH street, Phil'a, Pa. Sold by Druggists and Storekeepers in every town and village in the United States and Canadas, and by all Druggists in Carliale.
