Farmers' Department.

Bone Manure.

Bone Manure, in England, is considered one of the most healthy and efficient fertilizers known. It has been in use there from the earliest times, it being related that a Welsh king in the 5th century, slaughtered an immense number of Romans, whose bones were afterwards used in cement to build a prison, and crumbling to the earth enriched the land, so that it bore astonishing crops of wheat and barley for many years. Whether the record be true regarding Roman soldiers' bones thirteen hundred years ago or not, the fact bas been noticed on all buttle fields for centuries, even down to the Crimean campaign. British farmers more than others, use bones to enrich their lands, and they have collected them from many battle fields of continental Europe for such purposes, not forgetting even Waterloo, for the last remains of the soldiers that fell there, contributing so much to England's glory, have been gathered, ground up, and scattered in dust, bushel to the acre, to contribute also to Englands grannaries.

Some writers estimate that \$10,000, -000 worth of bones have been imported into England in a single year; and as this has been going on largely for at least eighty years lack, it has in a great measure produced the fertility of English fields. Great quantities are imported from Germany, the English saying that one ton of German bone dust, saves the importation of ten tons of German) corn. But not from Germany alone, · but from all parts of Europe, and from South America and the United States, have they been an article of trade. They are especially adapted to light and sandy soils, and the permanency of their effects which are perceptible for seven or eight years, are vastly better than guano.

Bones are a great acquisition to any country where they can be produced, but we have failed to put them to their best uses. Everybody knows they are of some value; no gardener or farmer would waste them, and their effects are witnessed around thousands of trees and vines where they are thrown. Indeed the trees and vines know their value better oftentimes than the agriculturists, and they will shoot their roots to great distances to reach them, and from the main roots will send numerous little suckers around to feed upon, and absorb them; but they are seldom pulverized and properly prepared for the soil; and in the cities and towns they are thrown away in tons, as of no account.

LIGHTNING.—According to Mr. Mer. riam, no case of loss of life by lightning has ever occurred in -a railroad car, a steamboat, ocean steamer, iron ship, iron house, or warehouse filled with bar iron, or in a vessel having lightning rod con ductors, or in a house having lightning rod conductors, with the exception of the case at Little Prairie, Wisconsin. -- These facts are sufficient to dispel the very general belief that metals are dangerous, from a supposed attraction for lightning. Steamboats have been in use more than lifty yeras, railroad cars more than thirty, and iron ships and iron buildings more than twenty years. Millions on millions of persons have, during that time, been in steamboats, railroad cars, iron ships, iron buildings and in vessels and buildings furnished with metalic conductors during thunder storms and their exemption during so long a period is the most convincing testimony in favor of protection that can be desired. Persons who suffer from fear during thunder storms may, therefore, rest in safety and confidence if they can reach a railroad car, steamboat, iron ship or iron house, or a building or vessel furnished with metalic conductors.

The ships of the line and frigates of the United States Navy are furnished with conductors made of five-sixteenths of an inch iron wire, and sloops of war of one fourth in diameter iron wire.

Rods for dwellings or other buildings, made of this kind of wire in a single piece, cost less than one cent per footless than one dollar for a rod one hundred feet long, Any mechanic of ordinary capacity can put up a rod. Glass insulators can be had of the hardware and glassware dealers for about twelve shillings a dozen.

SHORT CHAPTER ON SEEDS .- True, a seed is a seed; but it is a good deal more than a seed. It is a history, and it is ready for another hislory. A whole summer is wrapped up in that pea. A whole summer is wrought to form that bean. A whole summer spent its time about that ear of corn. It came forth small as a needle. It stood tremulous and yellow for weeks, it waxed apace in June, it rusticated in July, it stood up the noblest of all the grasses in August, with a many-fringed band of flowers on its lap, and with a little baby car at its breget, with silken hair hanging down uncombed yet untangled, and spotted and powdered with pollen. This is the time to wander in the corn! You are hidden at six steps." It is a pet forest. People ride post and wagons roll within a few rods of you, and you are unseeing and unseen. The wind comes in gentle puffs, and sets all the pliant sword leaves a-quake. Little birds that do not know that you are there, fly in and alight within hand reach, but at a glance, seeing their mistake; fly as if the tassel was hot and burned their feet! We see all that, in those barrels of Tuscarora corn, in that white flint corn, and in that yardlong ear of yellow flint .- H. W. BEECH-ER.

Miscellancous.

DOOTS AND SHOES.—The subscribers respectfully inform their friends and the public generally that they have removed their BOOT AND SHOE manufactory to the store-room in North Hanover street, recently occupied by Mr. Shuchman, two doors below Haverstick's Drug Store, and immediately opposite Monyer's Confection have where they are prepared to make thosts and Shoes to measure in every variety, with a good assortment of stock, and competent workmen. They will spare noeffort to give satisfaction.

March, 12, 1856.] MARLISLE FEMALE SEMINARY MR. and MRS. CLARK, who have been for several years ongaged in teaching, respectfully announce to the citizens of Carlisle and vicinity, that on the lat of Societomber, 1850, they will commence the second session, in Louther Street, near the Gorman Reformed Church, of

Louther Street, near the Gorman Reformed Church, of their

SEMINARY FOR YOUNG LADIES.

The Institution will be both a boarding and day school, in which all the branches necessary for the complete education of young ladies will be taught. Assistants of the highest character-for qualifications and morality will be employed in accordance with the wants of the institution. The government will be conducted on strictly Christian principles, while sectarianism will he averigidly excluded.

The Principals flatter themselves that their long and successful experience as teachers, as testified by the recommendations in their possession, will enable them to establish an Institution of the highest character for young ladies. They are fully persuaded that such an Institution will be sustained here by the citizens and neighboring country, and hope that their confidence may not be disappointed.

The Scholastic year will consist of four terms (eleven weeks each), beginning on September 1 and ending on second Wednesday in July.

Third Scholastic year will consist of four terms (eleven weeks each), beginning on September 1 and ending on second Wednesday in July.

The Scholastic year will consist of four terms (aleven weeks each), beginning on September 1 and ending on second Wednesday in July.

COTT'S LITTLE GIANT CORN AND COB MILL. PATENTED MAY 167H, 1854.
The Lattle Giant, though but recently introduced from the Wist, now stands The MILE Key as the most SI PLD EFFICIENT, and popular Farm MILL of the age, ur Manuracronies are probably the only ordes in the Wrld—exclusively devoted to making Metalic Mills, thorefore processes unpublication. therefore possess superior advantages in preparing such an admixture of metals, as best adapted to making a

an admixture of metals, as best adapted to making a strong and durable article.

The Livitz Giarr has been awarded the First Promisum at the principle Fairs of the Nation, as the most complete and convenient Mill now in use.

These Mills are not only guaranteed superior to all others in their construction and quality of material, but in the smount and quality of work they perform with any given power; and warranted has all cases to spit, or the purchase money refunded on return of the mills.

They are offered to Farmers and the trade complete, at \$28, \$32 and \$36, for No. 1, No. 2 and No. 3, and \$2 extentor sweeps. Warranted to grind from 8 to 15 hashels per hour according to size.

SCOTT'S NIMBLE GIANT GRAIN MILL (CAVEATED MAY, 1855.)

This Mill is a most complete and important article for l'infers, Farmers and others, having horse-power or other conveniences for running a belt. They can be worked advantageously with one, two or more horses, wherever a speed of from four to six hundred, revolutions per minute can be obtained upon a 14-inch pulley, with a 37/4 inch belt.

with a 3½ inch belt.

These Mills are adapted to any kind of work, grind ing cearse feed from corn, cats, &c., or fine meal from corn, wheat or rye; and corn & cob in the meal satisfactory manner, and with a vast saving of power, over all other mills, the Cob being cut with sharp cast-stool.

The first premium was awarded these Mills at the late Pairs of New Jersey, Pennsylvania, and the Industrial Exhibition at Boston.

The Nimble Giant weighs about 300 pounds, occupying a space of 30 inches square. It is peculiarly simple, strong, and durable: requiring no skill to run it, or se keep it in order.

keep it in order.

They are offered complete, ready for attaching the belt, at \$50; with cast steel cob attachments, \$05. Warranted to give the most perfect astisfaction.

Please call at the Little Glant Works, and witness thir operation. Manufactured by
