Farmers' Department.

Agricultural Progress.

Half a century ago agriculture, the mother of all industry, the basis of all the pursuits of civilized life, had scarcely risen above the level of Chinese immobility. For a thousand years, nay, as far as history carries us back into the dark recesses of antiquity, the labor of the fields had been entrusted to the rudest and most unskilled hands. Their direction and guidance and the cultivation of the soil were supposed to require no higher attainments than a knowledge of farm routine, such as had been handed down from father to son and from generation to generation. Implicit reliance was placed upon certain astronomical signs for the success of certain operations, without those who depend on them in the least knowing, or caring to know, the why and the wherefore.

At the commencement of the 19th century, and much later even, progress in agriculture, the most important sphere of human activity, was by many regarded as out of the question. That implements evolved from and recommended by so many hundred years of experience which had done good service to the remotest ancestry, and whose form and management had, like the pyramids, withstood the changes, should be capable of any alteration, except for the worse, seemed to be a settled conviction in European countries. And as to the idea of a practical application of the higher branches of science, of chemistry and natural philosophy, to agriculture, whoever would have ventured to express it would have been looked upon as a visionary. However, light gradually broke through the murky clouds. Labor, which had never received its due reward recognized its own importance and advanced its claims. New exigencies presented themselves. Consumption increased, and the old means of production were found inadequate to meet the growing demand.

It was then that science came to the assistance of labor, and after struggling hard and long, undaunted by the ridicule and taunts which attended its generous failures, a great victory was achieved. Chemistry was invoked to aid in promoting the movement. Graham, in England, did great things for its advancement, as has been gratefully acknowledged by Liebig in the preface of one of his popular works. Vast changes have taken place in the last fifteen years. The intimate relation between chemistry and agriculture has been clearly demonstrated in a manner comprehensible even to intellectual mediocrity. In 1840, Leibig published his Organic Chemistry, in its application to agriculture, and soon after, in 1842, his Animal or Organic Chemistry, in its application to physiology and pathology. These works were eagerly seized upon by the public, and translated immediately into various languages. In 1846, six editions of the former and three of the latter had already been issued and sold in Germany. His letters on chemistry also contributed largely to popularize that science, as well as natural philosophy, and to render them a favorable study of all classes. These lettres are less remarkable in a purely scientific point of view, than for the concise and popular style in which they present the subject of which they treat, and in this consists their chief merit. Chemistry has proven by this time its importance to agriculture and all other industrial arts. But another problem also presented itself, which it fell to the lot of the United States to solve in the most practical manner. Europe could no longer, under the increasing demands for comforts by the million, supply their wants, and the annual ballance had to be drawn from America.—The additional work to be performed by the latter exceeded the laboring force at her disposal and a triumph of intellect over physical exertion—the greatest in this era of progress—was achieved by the inventive genius of the nation.—Reaping, and thrashing, and mowing machines, have turned already, in America alone, a million of hands from the labors of the field and barn to other employment, which though necessary, would otherwise have been left undone. The entire value of the work produced by this million, while the newly created machinery prepares the materials for their sustenance, is a clear annual gain to the country, and to society at large.—In the invention and construction of labor saving machinery, and the application of chemistry to farming purposes, consists the progress of the middle of the nineteenth century in agriculture, and wonderful as the results appear, we stand as yet only upon the threshold of the new era of reform and improvement.—For, though science has performed miracles, it has failen to dispel entirely certain popular prejudices. All theory, in the eyes of some men, is the reverse of that which is practical, while in reality true theory is eminently so. When Liebig asserted that the ingredients of which plants are composed, are absorbed from the atmosphere and more particularly the soil upon which they grow, and that unless the same quantity of these engredients be restored in some form or other to the soil, it must gradually become exhausted and barren, he advanced a theory deduced not from observation, but from the similitude between the results of a chemical analysis of vegetable matter and the contents of the soil which produced it. The observation of centuries had not detected the truth of this axiom apparently so simple. Observation, only verified the truth of the theory, while the latter was in its origin eminently scientific. Chemical analysis now determines the nature of the fertilizer required for certain soils and certain plants thus obviating the necessity and expense of years of mere experiment. Nor is this all. It teaches which of the ingredients of an immense bulk of material constitute its fertalizing essence and the most economical modes of extracting them. The advantages derived from this are incalculable and obvious. It is now not only practicable but easy, to fertalize lands removed hundreds of miles from the shores of the sea and the banks of rivers, which would otherwise remain wild and unproductive. Fertilizing materials are chemically prepared or even imported from distant islands in such a condensed form that then transportation and distribution over the lands are both cheaper and easier that the old cumbrous and expensive method of manuring.

Miscellaneous.

BOOTS AND SHOES.—The subscribers respectfully inform their friends and the public generally that they have removed their BOOT AND SHOE manufactory to the store-room in North Hanover street, recently occupied by Mr. Shuchman, two doors below Haverstick's Drug Store, and immediately opposite Monyer's Confectionary, where they are prepared to make Boots and Shoes to measure in every variety, with a good assortment of stock, and competent workmen. They will spare no effort to give satisfaction. J. & G. TAYLOR.
Carlisle, April 16, 1856—3t

G. W. SLAGLE & CO., PRODUCE AND COMMISSION MERCHANTS, No. 118 North Street, Baltimore, Md., Would inform the public that they have entered into the above business, and will pay particular attention to the sale of FLOUR, GRAIN OF ALL KINDS, CLOVER SEED, WHISKEY and COUNTRY Produce generally, and will remit proceeds of sales promptly. Consignments solicited. CHARLES W. SLAGLE.
J. V. HOSHOUR, G. D. KLINEFELTER, } York County, Pa.
April 23, 1856—3m.

TO CARPENTERS, BUILDERS, &c.—The undersigned has been appointed an agent for supplying MOULDINGS of any design, or Patterns for buildings at a much less rate than they can be made here—said by our most experienced mechanics. [March 26'56] HENRY SANTON

WHITE HALL ACADEMY.—Three miles west of Harrisburg. The eleventh session of this Institution will commence on Monday, the 5th of May, next. Parents and Guardians are respectfully requested to inquire into the merits of the Institution. The location is retired pleasant and healthful, and the course of instruction embraces the ordinary and higher branches of an English Education, together with the Latin, Greek, French, and German languages, and vocal and instrumental music. Terms, boarding, washing, and Tuition in the English branches and vocal music per session (21 weeks) $60,00. For circular containing particulars address.
D. DENLINGER.
March, 12, 1856.] Harrisburg, Pa.

CARLISLE FEMALE SEMINARY.
MR. and MRS. CLARK, Who have been for several years engaged in teaching, respectfully announce to the citizens of Carlisle and vicinity, that on the 1st of September, 1856, they will commence the second session, in Louther Street, near the German Reformed Church, of their
SEMINARY FOR YOUNG LADIES.
The Institution will be both a boarding and day school, in which all the branches necessary for the complete education of young ladies will be taught. Assistants of the highest character for qualifications and morality will be employed in accordance with the wants of the institution. The government will be conducted on strictly Christian principles, while sectarianism will be as rigidly excluded.
The Principals flatter themselves that their long and successful experience as teachers, as testified by the recommendations in their possession, will enable them to establish an Institution of the Highest character for young ladies. They are fully persuaded that such an Institution will be sustained here by the citizens and neighboring country, and hope that their confidence may not be disappointed.
The Scholastic year will consist of four terms (eleven weeks each), beginning on September 1 and ending on second Wednesday in July.
TERMS PER QUARTER (11 weeks).
Boarding, including fuel, lights, and tuition in English branches, - $35 00
Primary Department, - - - - 6 00
Higher English, - - - - 8 00
Ancient and Modern Languages, each, - - 5 00
Ornamental branches at professor's charges.
No deduction for absence after entrance, except in case of protracted illness.

O. K. Chamberlin's COMMERCIAL COLLEGE, removed to the new and spacious Hall, No. 9 and 10 BALTIMORE STREET, Baltimore, Md.
O. K. CHAMBERLIN, Principal and Lecturer upon Mercantile Science.
E. K. LOCKE, in charge of Writing Department.
H. W. KAVE, Instructor in Mercantile Calculations and Associate in Book Keeping Department.
J. M. PHILLIPS, Teacher in Book Keeping.
S. T. WILLIAMS, Lecturer on Commercial Law.
Three years have not yet elapsed since the establishment of this institution, during which time upwards of eight hundred students have been in attendance, (representing nearly every State in the Union,) among whom are numbers in Baltimore and elsewhere occupying prominent positions as business men and accountants.
COURSE OF STUDY.
BOOK KEEPING.—The Principal has the utmost confidence in assuring the public that after an experience of fourteen years in qualifying young men for the Counting Room and other important stations, and an extensive acquaintance with the management of business houses of every description, (assisted as he is by two scientific accountats,) the course of training in this department is eminently practical and well adapted to the various pursuits of Commerce and Trade, including Individual; Partnership, Mercantile, Manufacturing, Commission, Exchange, Banking, Shipping, Steamboating, Compound Company operations, &c.
PENMANSHIP.—The exercises under this head are free, easy and graceful, combining rapidity of execution with beauty of construction, thus enabling the student to write an elegant business hand on completion of the course.
MERCANTILE CALCULATIONS in all their various bearings are taught by the most accurate and expeditious methods.
Daily lectures are delivered upon the Science of Accounts, Mercantile Customs, &c., those in connection with a series of lectures on Commercial Law, are of the highest importance to all aspiring to occupy prominent positions in the business community.
The time necessary for an industrious student to complete the course, varies from 8 to 12 weeks. There being no vacation, applicants can enter at any time, and attend both day and evening. Examinations are held at stated periods, and diplomas awarded to those who graduate. For terms, etc., write and mark all letters forwarded by mail. Oct. 3.

Stores and Shops.

NEW STORE & NEW GOODS!—The subscriber has just returned from the East, and is now opening, next door to Chas. Magaughlin's hotel, in North Hanover street, a splendid assortment of new and cheap DRY GOODS, comprising a variety of Ribbons, Cloths, Cassimeres, Cashmeres, Vestings, Delaines, Muslins, Checks, Tickings, Hosiery, Gloves, white and colored Carpet Chain, &c.
GROCERIES of all kinds, and best quality. Also a large stock of superior BOOTS AND SHOES. All of which he will sell as cheap as any house in town.
Butter, Eggs, Rags, Soap and Dried Fruit taken at Market prices. N. W. WOODS, Agt.
Carlisle, April 16, 1856.

1855.—FALL NOTICE.—The undersigned has just replenished his Stock of GROCERIES AND QUEENSWARE, and is prepared to supply his friends and customers with almost anything required in domestic use, at prices which he hopes will prove satisfactory. His stock consists of every variety of goods suitable for town and country use. He has also on hand a general assortment of HARDWARE, such as may be needed by farmers and mechanics for every day use. His stock of WINES, BRANDIES AND OTHER LIQUORS is large and embraces an excellent assortment of choice qualities. All for sale Wholesale and Retail, South East corner of Hanover and Louther streets, Carlisle, Pa.
Country Produce taken in exchange for goods.
nov. 21, '55. SAMUEL C. HOYETT.

REMOVAL.—DRY GOODS, &c.—The subscriber has removed his store to the house recently occupied by Dr. H. W. Cauffman, next door to Charles Maghanghlin's Hotel, where he has a general assortment of DRY GOODS, GROCERIES, BOOTS and SHOES, and will be happy to have his friends and customers come and see him. Thankful for past favors, he hopes by strict attention to his business to merit a share of public patronage.
April 9, 1856.] N. W. WOODS, Agt.

ATTENTION DYSPEPTICS—Those of you who have been afflicted for years with this bothersome disease, and who have been using almost every Nostrum before the public without relief, we say to you try "Kieffer's Anti Dyspeptic" and you will soon be convinced of its great superiority over every other preparation. We could give you many certificates of cures performed by our assertions, but a single trial is worth more than all. This remedy is prepared and sold at the Drug Store of H. L. KIEFFER, South Hanover street a few doors south of the Court House, Carlisle.

Banks.

CARLISLE DEPOSIT BANK.—FIVE PER CENT.

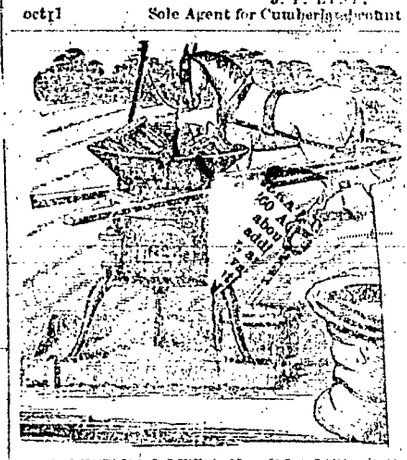
PATENT SELF-SHARPENING VANKEE FEED CUTTERS, manufactured at ALDRICH'S AGENCY, No. 40 Market street, Philadelphia.
This cutter is superior to any now in use, in strength, durability, and simplicity of construction. It cuts fast and is the only self-sharpening Hay, Straw and Corn Stalk Cutter ever made. It has but ONE KNIFE, which any person can grind and set with ease, but in ordinary case, is ground in the machine. Thousands have already been sold, and the demand is daily increasing. In most cases an examination is sufficient to convince one of its superiority. No one after a trial would part with it for any other. A number of above constantly on hand and for sale by
J. P. LYNE,
oct 1 Sole Agent for Cumberland county.



SCOTT'S LITTLE GIANT CORN AND COB MILL PATENTED MAY 1856.
The LITTLE GIANT, though but recently introduced from the West, now stands UNRIVALLED IN THE STEAM, ELEVATOR and popular Farm Mills in the MANUFACTORIES are probably the only ones in the World—exclusively devoted to making Mills, and therefore possess superior advantages in perfecting an admixture of metals as best adapted to the most strong and durable article.
The LITTLE GIANT has been awarded the first premium at the principle Fairs of the Nation, and is the most complete and convenient Mill now in use.
These Mills are not only guaranteed superior to others in their construction and quality of work, but in the event and quality of the meal, and will be sold on the purchaser taking it to the mill.
They are offered to Farmers and the trade at $28, $32 and $36, for No. 1, No. 2 and No. 3, with extra for sweeps. Warranted to grind from 15 to 25 bushels per hour according to size.
SCOTT'S NIMBLE GIANT CORN AND COB MILL (CAVEATED MAY, 1856.)
This Mill is a most complete and important one for Planters, Farmers and others, having steam or other conveniences for running a belt. It possesses advantages over any now in use, in the most important points of durability, and simplicity of construction. It cuts fast and is the only self-sharpening Hay, Straw and Corn Stalk Cutter ever made. It has but ONE KNIFE, which any person can grind and set with ease, but in ordinary case, is ground in the machine. Thousands have already been sold, and the demand is daily increasing.
