comparatively steril, except along the river courses. If so, the tide sweeping westward must ere long be checked, or else it must surge over the Rocky Mountains, and only stop at the shores of the Pacific.

We are hallding up a mighty empire on this continent, rich, -- powerful and free. But there never was a civilized nation whose people manifested so little attachment for home, or were so restless and unsatisfied with the present, and so eagre to be suddenly rich. And it seems to be the general impression that to get rich quick you have only to "go West." A great proportion of those who are preparing to go now may, at no remote day, find out that this is a mistake.

Woman in the Garden.

Wo find the following proper article in the Ohio Valley Taymer. Transfer it to this department of the Advocate Much in these days is said about the sphere of woman. Official read question we have nothing now to say. The culture of the soil the body and the soul are our themes. Rich soils, healthy bodies, pure, cultivated souls, these are what we are aiming at. And to this end we recommend that every country woman have a garden that she kneps and drosses with her own hand, or at least that she supervises and manages. The culture of strawberries, currants and garden vegetable are as delightful and profitable as any thing in which woman can be engaged. She may sprinkle her garden well with flowers.-All the better for that. A snowball in this corner, a rose in that, a dahlia bed there and a moss border here will not be out of place. Only, let the substantial and useful constitute the chief part. A touch of the ornate like a ribbon on a good bonnet, is not the least objectionable. In all the schools the study botany. In all families the women ought to practise botany. It is healthful, pleasing and useful. The principles of botany put into practico.—Parmers study agriculture, why should not their wives and drughters study-horticulture? If any employment is fominine, it would seem that this is. If any is healthy this strawberrics, a bush of blackberries. or currants, a border of flowers produced by one's, own hand, what can well afford a

more rational satisfuction? We say te all our country sisters, have a garden, if it is only semall one, and do your best with it. Plant it with what pleases you best, with a good variety, and see what ou can do with it. What woman cannot raise heets, tomatoes melons, onions, lettuce and furnish her own table with them? What woman cannot plant a ras-berry bush or currant, or gootberry, and attend it wil? Come, good w men, study themr W nak woman connot plant a ras-berry bush or currint, or goosberry, and attend it will. Come, good w mon, study your health, your usefulness and Lappi-ness and your children's also.
