PROFESSOR O. J. WOOD—

Data Em:—Uncolleted, I send viu this certificate. After being nearly baid for a long time, and having no list in any, I was induced, on hearing anyours to give rived all the hair restoraives extant, and having no list in any, I was induced, on hearing anyours to give rived the restorative then applied and well rubbed with the restorative then applied and well rubbed with the restorative then applied and well rubbed with the restorative the name of a berbar, and the restorative the present time, and is now thick, black, and storage—soft and pleasant to the touch whereas; before, it was harsh and wiry, what little there was of it, and that little was disappearing very rapidly. I still use your restorative about two a week, and shall seen hitherto any case where any person's hale was readily benefitted by any of the hair tonics, etc., of the day; and it really gives me pleasure to record the result of my experience. I have recommended your preparation to others, and it already has a large and generous sale throughout the Territory. The beople here know its effects, and have confidence in it. The supply you sent us, as wholesale agents for the Territory, is nearly exampled and dily inquiries are undee for it. You deserve credit for your discovery, and I for one, returns you my thanks for the benefit it has done me, for I certainly had despaired long ago of ever affecting any such result.

INVALIDS BETREAT. Author of "Letters to Invalids" is coming See following Card. FERRUARY APPOINTMENTS. DR. HARDMAN, PHYSICIAN FOR disease of the Lungs, (formerly Physician to Cincinnati Merine Hospital,) will be in attendance at his rooms as follows:

Garlisle, Mansion House, Friday, Feb. 19.
Bloomfield, Thursday, February 18.
Shippensburg, Saturday, February 20, Shippensburg, Saturday, February 20.

Dr. Hardman treats Consumption, Brouchitis, Asthmal Larryngittis, and all diseases of the throat and iungs, by medical Inhalation, lately used in the Bromton Hoppital. London. The great point in the freatment of all human maladies is to get at the disection of the direct manner. All medicines are estimated by their action upon the organ requiring relief. This is the important fact upon which Inhalation is based. If the important fact upon which Inhalation is based. If the stomach is diseased we take medicine directly into the stomach. If the lungs are diseased, breather or inhale medicated vapors directly, into the lungs, Medicines are the antidotes to disease and should be applied to the very seat of disease. Inhalation is the application of this principle to the irratument of the hungs, for it gives us direct access to those intricate air cells and tubes which lie out of reach of every other means of administering medicines. The reason that Capsumption, and other diseases of the lungs, have heresofore resisted all treatment-has them because they had uvers been approached in a direct manner by medicine. They were included to a local, and yet they were so administered that they should act constitutionally, expending immediate and principal action upon the unoffending atomach, whilst the foul ulcers within the lungs were numelseted, Inhalation brings the medicine in direct conjucts sith the disease, without the disadvantage of any violent action. Its application is so simple that it can be surployed by the youncest infant or feelbest invalid. It does not derange the stomach, or interfere in the least degree with the strength, comfort, or business of the patient.
