This i repeated every morning, and in three weeks the young hair appeared and grew rapidly from shi aglow. This is a person time, and is now thick, black, and strong—soft and pleasant to the touch whereas, before, it was harsh and wiry, what little there was of it, and that little was disappearing very rapidly. I still use your rostorative about twice a week, and shall seen hairs a greed and perfect crop of hair. Now, I had read of these things—and who has not? but have not seen hitherto any case where any person's hair was really benefitted by any of the hair tonics, etc., of the day; and it really gives me pleasure to record the result of my experience. I have recommended your preparation to others, and it already has a large and generous sale throughout the Torritory. The people here know its effects, and daily inquiries are made for it. You descreve credit for your discovery, and I for one, returnyou my thanks for the bonefit it has done me, for I certainly had despaired long ago of ever affecting any such result.

What the Farmers say:

A late writer says that "the various species of vermin are multiplying at a fearful rate throughout the land. Their ravages have become a matter of serious dread." A Postuaster in Illinois, writing to "Coctar," bepot says, "The country is literally overrun with them (rats, mice, &c.") Another from the same State, says, "The rats positively snaw the halters-off my horses while in the stable." An Ohio Correspondent romarks. "They (the rats) are everywhere—in the house, the barn, and under every stump in the field." In the South it is still worse, A late order from the Navy Yard at Mobile was for thirty pounds of the lat Externinator alone.
