 Preparatory department and particular states and the state and the Drill, which we are now manufacturing. W[J_J10(i1]-BY S INDA RUBBET SPRING DRILL is disquest ionably the very lest Drill now in nse. It was award-ed the First Premium at the Pennysyltania State Fair-held in Philadelphia in tech her, 1857. It was award-ed the First Premium at the Cumberland County Fair has fail, and has received the First Premium at every Fair where it has been exhibited, with hat one avception. Its superiority above all others is so apparent as to only need an examination. For seeding on fields containing stones or other ob-structions It is peen tablety displayed. The depositing tables of this Drill are so connected with had one sception. Springs, that when they meet with aby obstruction they will spring back, pass over the obstruction and im-mediately regain their former position. Any teek or stamp not over 18 inches high can be convented by passed over without stoppage or lejury to the Drill. The feeding apparatus of this Drill is also entry in the sould be include in a constant stream, and to irregularity of ground or change of peed will yary the amount see on the act. It will now wheat, research and larley equally well, and in any desired quantity, without the possibility of choking or bracking the grain 14 also sows grass seed. But without further onlarging upon the morits of this Drill we would prefer to have Parm-ers call at our establishment and examine 1, ecoufdent, that after seeing they will be satisfied as to its superi-ority and field it the very inachine to suit to purc-changers in any part of the Unit will be states and the field. The Second this Drill we would prefer to have farm-ensers all and the devery inachine to suit the farmer-end the field. my2058. F. GARDNER & CO.
