DR. MoltsE, the inventor of MoltsE's INDIAN RUOT PILLS, has spent the greater part of bis life in traveling, having tisted Europe. Asia and Africa, as well as North America—has spent three years unoug the Indians of our Western country—It was in his way that the Indian Root Pills were inret discovered. well as North America—bas spent three years among the Indians of our Western country—H was in his way that the Indian Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all discasses arise from IMPURITY OF THE BLOOD—that our strongth, bealth and life depended upon this vital. When the various passages become clogged, and do not act in perfect ha miony with the different functions of the body, the blood loses its action, becomes thick, corrupted and discassal: thus causing all pains, sick-mess and discress of every name; our strength is exhausted, our health we are deprived of and if nature is not assisted in throwing off the stagmant humors, the blood will become choked and cease to act, and thus our light of life will for ever be bown out. How important then that we should keep the various passages of the body free and open. And how pleasant to us that we have it in our power to put a medicine in your reach, namely. Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountamous cliffs in Nature's garden, for the health and recovery of diseased man. One of the roots from which these Pills are made is a Sudoitie, which opens to port of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expectorant, that opens and uncleas the passage to the lungs and thus, in a soothing manner, perform its duty by throwing of phiegm, and other humors from lungs by copious spiriting. The third is a Diurcie, which gives case and double strength to the kidneys' thus encouraged, they draw large announts of impurity from the blood, which is then thrown out bountifully by the arinary or water passage, and which could not hirve been discharged in any other way. The fourth is a Calhartte, and accompass porting and the blood, in the properties of the Pills while engaged in purifying the blood; the coarse particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed of in
