THE FIRST PREMIUM DRILL. THE FIRST PREMIUM DRILL.

The Farmers of Cumberland county are invited to call at the Carliele Foundry and examine the above Drill, which we are now manufacturing. WILLOUGH. BY'S INDIA RUBBER SPRING INRILL is unquestionably the very best Drill now in use. It was awarded the First Premium at the Pennsylvania State Fair held in Philadelphia in October, 1857. It was awarded the First Premium at the Cumberland County Fair last fall, and has received the First Premium at every Fair where at has been exhibited, with but one exception. He superiority above all others is so apparent as to only need an examination.

ips superiority anove in others is so apparent as countering need an examination.

For seeding on fields containing stones or other obstructions it is, peculiarly adapted. The depositing tubes of this Drill are so connected with India Rubber Springs, that when they meet with any obstruction they will spring back, pass over the obstruction and im-Springs, that when 'they meet with any obstruction they will spring back, pass over the obstruction and inmediately regain their former position. Any rock or stump not qver 18 inches high can be conveniently passed over without stoppage or injury to the Drill. The feeding appearatus of this Drill is also entirely new, being composed of Volcanized India Rubber Rollers, by means of which the seed is not discharged intermittingly but in a constant stream, and no irregularity of ground or change of speed will vary the amount sowed on the acre. It will sow wheat, rye, outs and barby equally well, and in any desired quantity, without the possibility of choking or breaking the grain. It also sows grass seed. But without further enlarging upon the merits of this Drill we would prefer to have Farmers all at our establishment and examine it, confident that after seeing they will be satisfied as to its superiority and find it the very machline to suit the farmer and the field.

DOES DISEASE ORIGINATE IN This is a question of vital importance, and one which has never been satisfactorily disposed of by the professors who teach the healing art. Some maintain—and expecially the old school Physichna-that life lives in the blood, and therefore all diseases originate in it—but modern science avers that altheuts have their origination to both the solids and fluids of the body. That the latter preponderate, however, is a fixed fact, and medical skill bas clearly demonstrated that at least two-thirds of the fils that human flesh is heir to, have their source in an
