"For the last twelve years I have been more or less troubled with Inflammatory Rheumatism, commonching early in the spring, and lasting until cold weather set in, when I would be relieved for a while, only to be at tacked again in the Spring. All my joints would swell and be very sore, attended with the most scute pain. My feet, sho-idiers, arms, and hands troubled me most, so much so that I civil scarcely walk, and almost always required assistance in dressing. During this time I would try everything I could hear often the hope of finding a cure. I slice tried several physicians, but nothing sceme to help me the least in the world. About two and a half years ago I was attacked as usual, and as usual tried everything to got 1 do fit, but to no pur pose. I kept growing worse, and finally had to give up and stay in the house where I was confined about four weeks. This time my facts welled, and were so sore that I could not stand on them or get on my boots, and my hands swelled to twice their usual size. In fact, I was to all appearances and belief, totally used up. About this time my parents, who reside in Maine, sext for me to rome home. I went, and after my arrival commenced trying another remedy, hoping to be cured, but resulting the same a all others. For weeks I had not been able to dress myself or raise my hand to my head, and suffering the most exerucialing pain all the time. One day my father came in with a paper in which was advortised Dr. Coggewall's Medical Salt, for Infiammatory Diseases only, and wanted me to read and see what I thought or it. I read and laughed at it, pronounced it a humbug, and told him that I had been humbugsed snough, lie kept urging me, and at lest said I could but try it; and if would write to Dr. C. giving blim a description of my disease, he would pay the expense. Of course I could not refuse such as offer and sont for one box. It came in due season, bit my faith was not increased, and of every description constantly on hand, or made to order. The particular attention of Painters, Dealers and others, is called to the new patent method of puting up Lead and Zinc Paints in metalic Cans, of which Masury & Whit in are the soile proprietors.

These Cans are intended by the inventor to obviate the difficulty heretofore existing in putting up of Lead and Zinc in small kegs. All consumers of paint are aware that the loss on Lead and Zinc put up in small wooden packages, is from five to ten per cent, and in many cases much more, owing to the absorption of the oil, and the consequent hardening of the paint against the wood—to say nothing of the sadditional labor required to mix paint ready for use, after it has become hard in the keg. The loss of the keg, too, is a consideration which should not be lost sight of. The patent Can not only obviates these difficulties, but in addition thereto furnishes the consumer with a stron- and convenient paint pot, out of which to use the paint, which is alone worth more than the difference of cost between the cans and kegs.

The Vana are packed in saw dust, in strong cases or boxe, which contain 200 lbs each, that is \$25 lb. Cans, or \$50 lb. Cans, and they may be safely shipped by cally road or otherwise to day put of the United States.
