SENATORIAL CONFERENCE.—The Conferee appointed by the People's Conventions in the several counties composing this Senators ial District, met at Newport on Thursday last, to nominate a candidate for Senator After 23 ballots, the vote stood as at first. Irvine of Cumberland 6. Patterson of Juniata 3, Butler of Mifflin 3-A motion was then made to adjourn, which was opposed by our conferees, but the motion finally pre vailed, and the Conference adjourned to meet on Tuesday the 6th.

From a telegraphic dispatch received yes terday from Wm. B. Mullin Esq. We learn that Mr. Irvine, of this county, was nominated unanimously.

A. L. Sponsler, Our Candidate for County Treasurer.

We hope our friends throughout the coun ty will do for this gentleman, what he is una ble to do for himself, that is to electionee for him zealously until the election. It is well known that, by an unfortunate accident, some years ago, Mr. Spousier's lower limbs were paralyzed, and he is therefore unable to walk. or even help himself in, or out of his chair; it is utterly impossible for him, on this account, to make personal calls, on the voters of the county, and it is expected that his friends will supply that defect, by exerting themselves in his behalf. His opponent Mr. Killian is out every day, and our friends ought to see to it, that "Alf" has a "fair shake;" give him that, and his election is certain.

So far, the political campaign this fall, promises to be a quiet one, at least on one side. In days of yore, when the Demo cratic party of this county recognized such men as the Stuarts, Woodburns, Scoullers Wallaces and others as leaders, they were called the "unterrified" democracy: but since these old war-horses have been displaced by the Ahl dynasty, they are fast winning the name of the "terrified mohocracy." They are completely disorganized and split up into factions; a "malign influence" over shadows their hopes, like a wet blanket, and an inglorious defeat awaits them at the October election. So mote it be.

DUTY AGAINST PARTY.

"Nor is it fair that because some of the nominees had the friendship and influence of certain men for whom we have no special liking, that we should attempt to punish them

This paragraph is an extract from an article in the Democrat of last week, in which the editor endeavors to "pour oil on the troubled waters" of Democracy. This spirit of forgiveness may be commendable, but it is mistaken policy when applied to politics. - Whenever a set of men displace the recognized leaders of the party-constitute themselves sole dictators, and by a packed Convention seek to crush out the rights of the masses, by forcing on them a ticket against their better judgment, it is not only "fair," but just, that the people should remedy the evil, by defeating the candidates forced on them, and thus destroy the power of the dictators .-If, as the editor of the Democrat more than hints, their ticket has been placed in the field by the improper "influences of men for whom he has no especial liking," it is better to "punish" the candidates by defeat, than to vote for them in blind subserviency to party tactice, and in this way build up an influence

he wishes to destroy. This is the best advice we can give our friend under the circumstances. True, he hasn't asked us for any, but we throw it in gratis, and if he don't choose to follow it, we know that many of his political friends will. and that is some comfort.

The Tonnage Tax. -

The suit of the Commonwealth of Pennsylvania vs. the Pennsylvania Railroad Company, was tried at Harrisburg, last week, before Judge Pearson, who delivered an elaborate opinion in the case, reviewing the points which had been presented by the counsel on both sides, and directed the jury to bring in a verdict in favor of the State, for the amount claimed; whereupon the jury retired and in a short time returned a verdict against the Railroad Company; for the sum of \$91,196 61 debt

and interest to date. Music Teachers Swindled.

A remarkable case of swindling was perpe trated in Philadelphia last week. Fifteen young ladies were duped by a person named Johnson, who, under the pretence of hiring them as teachers of music in Southern families, managed to get them to New York, and then decamped with about one hundred and fifty dollars of their money, and nearly all their baggage, amounting in value to between four and five thousand dollars.

it will be a pity if such a heartless scoundrel should go unwhipped of justice.

The Central State Committee of the Pco ple's Party of Pennsylvania, have issued an address over the signature of Levi Kling. Chairman, which we should be glad to publish entire, if we had space. It presents, in a clear and forcible manner, the views of the party they represent, on the questions now before the people. The following extract is Tuesday. from that part of the address which more im- Wodnesday. 66 Q0

mediately concerns the industrial interests of Pennsylvania: The industry of American freemen has another great and vital interest which has always been refused the recognition of those who are engaged in the schemes of slavery anggression-which we have noticed. The ma-terial welfare of the people, as well as the financial interests of the Government, indicate a policy of protection; and defence of our agricultural, mining, diffundacturing, mechanical and manual labor, against the schemes cal and manual labor, against the schemes and systems of foreign nations, as the true course to be adopted in our legislation on the subject of a Tariff properly considered, and as actual experience proves, Revenue and Protection possess a blended harmony of interests. At those very periods in our history when the labor of the people was best shelftered from unequal competition with accumulated foreign capital, long trained skill and low rate of wages, the National coffers were most fully replenished—the expenditures of most luny repensed — the expenditures government were completely met from its resources, and the process of reducing national debts contracted under other systems was it most successful operation. When, however, discriminating duties were taken of, or made discriminating duties were taken oil, or made to discriminate against our Home Industry— when Free Trade was put in practice, and Protection entirely abandoned and condemned by the party in power, not only did industry languish and suffer in all its departments—

füllures become frequent, disastrous and over-whelming—furnaces, forges, factories and workshops cease their operations—labor seeks in vain for employment—mechanics seek unavailingly for customers—and even the great foundation interest of agriculture suffers in avantagy for dustomers—had been alleger in foundation inferest of agriculture suffers in the general stagnation of business and con-traction of prices and scarcity of money, but the revenues of the Treasury fell off in rapid the revenues of the Treasury fell of in rapid diminution, and the Government, which had just been paying a high premium for its own bonds; was compelled to throw its notes on the market to raise the means of defraying its ordinary expenses, and in a time of profound pence, to contract a new national funded debt. This has been the recent experience of the

This has been the recent experience of the country, and at this moment the people are suffering from the practical consequences of the injurious policy of their public servants. Pennsylvania has witnessed during the two the law, reaped such abundant harvests of fees, while productive labor has stood idle and looked on helpless, at the sacrifice of hardwhose means were wrung in usury from the very men whom they were thus dooming to

houseless poverty. *

What more melancholy sight than this can "What more melancholy sight than this can be presented, and how doubly bitter must the experience be of the sufferer, when he reflects that the cruel and foolish policy of the rulers of his country, whom his own vote may have assisted to their places of influence and power, have struck the blow under which he has fallen! The entire commercial transactions of the country prove how madly we are pursuing a course of dealing with other nations, utterly destructive of our own interests, buying recklessly and extravagantly, paying in gold, roblessly and extravagantly, paying in gold, reb-bing the country of its specie circulation and basis of paper currency, and contracting debts abroad which must be settled for in the future There was imported at New York alone, of foreign dry goods, since the first day of the year up, to August the 5th, the enormious amount of \$74,623,418—nine millions of dollars more than in that agrresponding period of wild extravagance just before the crash in September, 1857, and about forty-two millions more than under the compelled contraction of the same period in 1858. We imported dur-ing the year ending June 1, 1858. of foreign goods, waves and merchandise, \$243,839,000; during the year ending June 1, 1869, \$340.-650,000, an increase of almost \$97,000,000. During the first period we exported \$52,633,-000 of specie—during the last, \$68,000,000, and as our imports of the same article were ten millions less in the last than first period our stock on hand was \$26,887,000 less habor, are vastly below, the importations; for while we sent out only \$37,751,000 in the first seven months of the present year from New York, we had to make up the sum of \$42,249,000 in coin to pay the balance due to

"Facts like these convey their own best comment; they explain, without any learned parade of argument, the reason of the paralyzed state of our Home Industry, and call, trumpet-tongued, for the application of the proper remedy. This is in the hands of Congress and the Executive Administration of the National Government to which the adjustment of the terms of our commerce with other na-tions has been committed by the Constitution. But the "Democratic party," which wields those powers, refuses all relief It is bound to the opposite interest which profess in the Protective Policy a fee to all who are engaged in raising Southern products by slave labor We believe that policy is the best, most beneficial and advantageous to every interest and investment of the country—the farm and plantation—the mine and forest—the factory and workshop—all have here com-

plete harmony of interests. After discussing the delusive dectrines of Free Trade; and the increased expenditure selecting varieties, has not been generally of the Government, under the present Administration, they close as follows:

In conclusion, we invoke the earnest consideration of these subjects which we have brought to their attention, by the people of Penn-ylvania. We have no doubt that the sentiments of a large majority coincide with the views which we have expressed. The only natter remaining is to make the will of the majority effective through the ballot-boxes. majority effective through life ballot-boxes. The National Administration in possession of the immense public patronage and all the advantage which it possesses in the dispensation of the large appropriations at its command, has a trained and pensioned band of regular soldiers on duty. No effort will be spared to pervert the expression of the public sentiment of Pennsylvania into an apparent approval of the Administration and its measures. That can only be done by superior vigilance and acgreat body of the people of the State to attend the election, and make their true sentiments known at the polls.

In order to avort such a result, we urge upon you, the people, to form a thorough and complete organization in every county, city, township, borough, ward and school district, township, borough, ward and school district, with the single-purpose of securing the recording of the votes on the day of the general election on the second Tuesday of October, next, and attesting to the world that Pennsylivania takes no stop backward from the proud position which she assumed last year, but is ready, prepared, and walling to go forward in the cause of administrative reform and retreatment, and of restortion to the first laboration. trenchment, and of protection to the free labor of American pitizens, both against the aggressive movements of slave labor at home, and the policy which sacrifices our interests to the fallacious doctrines of free trade, and prostrates them, under the unequal competition which they are compelled to wage with the aggregated capital, matured skill and unpaid labor of foreign nations.

The candidates nominated by the Convention, by which we were constituted a State trenchment, and of protection to the free labor

tion, by which we were constituted a State Committee for the offices of Auditor General and Surveyor General, respectively—Thos. E. Cochran, of York, and Wm. H. Keim, of And dollars of their money, and nearly all their baggage, amounting in value to between our and five thousand dollars.

Pennsylvania has witnessed during the two last years, the most disastrous sacrifices of the property of her people, and the most depressed condition of her great industrial interests. Valuable properties have been brought to the block of forced sales, and at no time have Sheriffs and other executive officers of the law, reaned such abundant, harvests of clare war" against the feathered tribe. We think the farmers are right in this matter enraed possessions passing from the grasp of the toiling hand that gave them all their value, for mere nominal prices, into the ownership of capitalists and speculators, most of willing to allow them a share of their grain, in the same results are right in this inactor; as a mong their best friends, and are quite willing to allow them a share of their grain, in the same right in this inactor; as a mong their best friends, and are quite willing to allow them a share of their grain, in this inactor; as a mong their best friends, and are quite willing to allow them a share of their grain, in return for their services in destroying in sects. > SALE OF THE CARLISLE IRON WORKS. On Thursday last, the extensive property, known as the Carlisle Iron_Works, were put up at public sale, by the assignees of Peter F. Ede, Esq., and sold to Messrs. Wm. M. Beetem, C. W. Ahl, William D. Himes, and William Young, for \$55,100. Mr. Ege reserves a portion of the estate, valued at about \$5,000. Taking into consideration the extent of this property, and the price paid for it, it is the largest public sale of real estate ever made in this county. It comprises about 9000 acres of land, embracing the Mansion, Iron Works, Mill property, several cultivated farms, and mountain land, much of which is covered with

finest in the county, and affords a favorable

agricultural wealth of this county. THE MARKETS.

Our markets for the last few months have greatly improved, both in the variety and quality of the products, and suggests the question as to the expediency of extending the Market House to the limits of the present ground.

The competition in vegetables has not only reduced the price within moderate bounds, but improved the quality offered for sale .-But, with respect to fruit, much is yet to be done by our farmers. Apples are indeed the great object, in this department, on account of their keeping qualities, and the various uses to which they may be applied; and the attention of farmers to planting orchards and neglected, although much, may yet be accomplished, by testing how far the different selections are adapted to our soil and climate With respect to other fruits, such as grapes, pears, peaches, apricots and plums, and the smaller fruits, such as strawberries and rashberries, the field is yet open, and we are far

behind the Eastern towns and cities, Not a first-rate pear, and but few fine peaches, have yet been seen in our market .-A good Sekel pear tree, a fewchoice grapes and grafted peach trees, would afford handsome returns to any of our farmers, and what gratification would it be to his family to have a regular and abundant supply of fine fruit. An effort is now making in this place to stimulate to competition, by a semi-monthly

show of fine fruit, flowers and vegetables, and to interchange information on their cultivation among those who give attention to the subject. On Monday next, the 11th of September. and on Monday the 25th of September, there

will be a show of choice fruits, flowers and vegetables, for those who feel an interest in their rearing, and the specimens of fruits will, at the close, be divided among the contributors. "EMPIRE HOOK AND LADDER COM-PANY."—This new and energetic company, we

are pleased to learn, is now thoroughly and

permanently organized. It is composed ex-

clusively of active, able-bodied young men;

and should occasion require, they will always be found among the foremost in endeavoring to save the property of our citizens. The Company has now in progress of ercction, on the north-west corner of Dickinson alley and Pitt street, a neat and commodious

OUR COUNTY FAIR. The Officers | ind Managers of the Cumberland County Agicultural Society, are getting ready for the Fall Meeting, which will be held on the 12th, 18th and 14th of October. Whether the exhibition is to be as successful as usual, will depend on those who intend to be contributors. The Managers have the liberality, enterprise and enthusiasm necessary to carry it forward if their efforts are seconded by the farmers mechanics, and others who may have article to place on exhibition - No class of men in the community derive more real benefit from such exhibitions than the farmers, and yet w do not believe they have entered into it with

that spirit and zeal for mutual improvement

which is absolutely necessary to secure prac-

tical-results. There are men in this county, who, withou ny direct personal interest, have spen time and money, in endeavoring to develope the resources of Cumberland county; to in use into our farmers a spirit of enquiry, so as o give to agriculture the benefit of scientific ttainments; but they labor in vain, if their steps are to be clogged by those millstones around the neck of progress, who are so ut terly selfish, that they never pull a string unless they see a dollar dangling at the other end of it, and are always ready to "take up" more than they "put down." There is no merit in drawing a premium, when men merely obey the promptings of ... dollars and cents.' They should be actuated by higher and nobler motives. Large-hearted philanthropy and will sell on the 7th of October 558 acres of public-spirit are the only elements of succes in such institutions, and until those feelings

predominate, they cannot prosper.

If every one who has an interest in this matter, would "come up to the work," there is not a county in the State could present richer or more varied display. We have had an abundant yield of grain, fruit and vegetaof George Singizer, will sell on the 5th of bles; let our farmers bring in their best specimens from every township; let our farmers wives present their admirable household pro large amount of valuable town property, in ducts, and let the skillful mechanics of Carthe borough of Mechanicsburg. Let us go on improving from year to year, until the Cumberland County Fair shall be a marked feature in the agricultural history of the country. . .

> THE CAMP MEETING .- We had the pleasure, last Sabbath, of visiting the Camp Meeting of the Carlisle Circuit, held near Shepherdstown. Taking the Lisburn road, our route lay through a portion of the county entirely new to us. For the first four or five miles, the land is somewhat rough, and broken by the limestone ridges, although there are several fine improvements on both sides: but after crossing the" "Stony Ridge," the wide expanse of country, opening to the view from the mountain ranges on the South, to the North and East, almost as far as the eye can reach, is not excelled for beauty, by any other portion of the Cumberland Valley. The well tilled barns and stack-yards testify to the fertility of the soil, while the spacious and tasteful dwellings, with their surroundings, give abundant evidence of the wealth and re-Inement of the occupants.

> On arriving at the camp-ground, we found a large number of persons in attendance; the woods were filled with vehicles of every description, and the area within the line of tents, crowded with a large and orderly congregation just assembled for the morning services, which were conducted by the Rev. Dr. Collins, of Dickinson College. In the afternoon, Rev. Mr. Gibson, of Empry Chapel preached, and at night, Rev. Mr. Cole, of Wyoming, and Rev. Mr. McCartney, of Mechaniceburg, officiated. A large number of prenchers were in attendance carnest and zenlous in the work, some of whom filled up the intervals between the regular services, by exhortations from the stand. Notwithstanding the immense concourse of "out-siders." good order prevailed throughout the day, and the persons immediately connected with the "Comp," exercised, to the fullest extent, the rites of hospitality towards the strangers.

This ground, we believe, was donated to the Circuit, some years ago, and regularly consecrated to Camp Meeting purposes; the tents, which are constructed of boards, occupy three sides of a square, the preacher's stand partly-fills-up-the-fourth side, in the rear of which, another row of tents extend. Water

is supplied from two wells on the ground. As we turned to leave the. "Camp," at the close of the evening service, and gave a parting glance at the night-fires flashing among the trees, the worshippers congregated around the stand, and heard the melting tones of the preacher floating away on the night-breeze, mingled with songs of praise, we were carried back, in imagination, to the early days of the Church, and mentally exclaimed with the

pget:--"The groves were God's first Temples."

"THE PEACE UNION CENTRE."-We were visited on Monday last by a venerable gentleman, named Andrew B. Smolniker, who chims to be "a medium of the Spirit of Peace, and who, as it appears by a circular which he distributes, is endeavoring to direct public attention to a Convention which is to usecimble on the 20th inst.; "in Perry county six miles west of Millerstown, which is the stopping place for cars on the Central Rail road, and from the depot is a good road to the place for our Convention, which will be held in a new Hall"

To show the true object of Mr. Smolniker

we quote from his circular: " Napoleon I. was, and Napoleon III, is a very strong medium of crafty-destroying spirits Felix Belly, who is operating in Central America for Monarchy against Repub-licanism, had announced, last winter, in very large handbills, posted on all the corners of Paris, his pamphlet, in which he was preach ing Crusades against the government of this Republic. But this summer he seems to operate in Paris more clandestinely and craftly, and he will, according to the newspapers, re turn on the 20th of September next to his centre of operation, called Felicia, at San Carlos, of Nicaragua."

Now, in order to ofroumvent Felix, Mr

Smolniker proposes on that same 20th of September, to hold his Convention in Perry county, "six miles west of Millerstown, which is the stopping place for cars on the Central Railroad, and from the depot is a good road to the place of our Convention, which will be held in a new Hall." In compliance. therefore, with Mr. Smolniker's request, we inform our renders that both sexes are invited, and that the place of meeting is "a beau-Hall, designed for the accommodation of their tiful solltary hill called Springhill, in Raccoon Valley." THE NEXT CENSUS.

Next year the eighth census of the United States is to be taken . This enumeration is one of the most laborious and difficult tasks which the Government has to perform. A timely suggestion is made by the National In telligeneer which is worthy of consideration; and which we quote in the hope that it may be heeded before the census-takers shall be called upon to discharge their duties. The suggestion is this:

"That each farmer this fall, as he gathers his crop, shall keep something like an accu-rate account of the quality and value of the same; and, if he will take the trouble to make out a statement of the names and ages of his family; number of acres of land cleared and timbered; the number and ages of his servants; the number and value of his horses and mules; the number of bales of cotton, barrels of corn, bushels of wheat, outs, ryo, barries of gent, obsairs of miner, ones, you barriey, pointoes, &c, and the value of each, and leave it in some place where any member of the family, who may be at home when the deputy marshal shall call, one readily get hold of it. It will save time to all concerned, and very greatly assist to make the census returns perfect, complete and satisfactory."
