June 6, '60.

An aperient and Stomach preparation of IRGN purified of Oxygen and Carbon by combustion in Hydrogen. Sanctioned by the hickes. Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no preparation of Iron ran be compared with it. Impuliates of the blood, depression of vital energy, pale and otherwise sightly complexions indicate its necessity in alm sit error conceivable case.

Innoxious in all maiadies in which it has been tiled, it has prevent absolutely curative in each of the following complaints, viz:

In Lebility, Nervous Affections.

In Debility, Nervous Affections, Ems-ciation, Pypepsia, Constipation, Diar-rhom, Dysentery, Incipient Consump-tion, Tuberculosis, Salt Rheum, Mismenstruation, White, Chlorosis, Liver Complaint, Chronic Headaches, Rheumatism, Internitiant Fevers, Pimpies on the Face, &c.

Rheumatism, Intermittant Fevers, Pimpics on the Face, &c.

In cases of teneral Debility, whether the result of acuts disease, or of the continued diminution of nerwork and nuscular energy from chronic complaints, one trial of this restorative has proved successful to an extent which no description nor written attestation would render credible. Invalids so long bed-ridden as to have been ne forgotten in their own neighforhoods, have suddenly reappeared in the busy world as if just returned from protracted travel in a distant land. Some very signal instances of this kind are attested of formale Sudfacers, emaciated victims of apparent marasimus, sanguineous exhaustion, critical-changes, and that complication of nervous and dyspeptic aversion to air and exercisa for which the physician has no name. In Nervous Affections on all kinds, and for reasons familiar with medical men, the operation of this preparation of iron must necessarily be salutary, for unlike the old oxides it is vigorously tonic, without being exciting and overheating; and gontly, regularly aperiant, even in the most obstante cases of contiveness without aver being a gastrie purgative, or indicting a disagreeable sensation.

It is this fatter property among others, which makes it so remarkably effectual and permanent a remedy for Plies, upon which it also appears to exert a distinct and specific action, by dispursing the local tendency which forms them.

In Dyspepsia, innumerable as are its causes, a single box of three Charybeate Pills has often funded for the most habitual cases, including the attendency Costiveness.

In unchecked Diarrhea, even when advanced to Dys-

ness.
In unchecked Diarrham, even when advanced to Dysontery, confirmed, equalating, and apparently mally mant, the effects have been equally decisive and astonishing. mant, the effects have been equally decisive and autonishing.

In the local pains, loss of flesh and strength, debiliting, cough, and resulttent heetle, which generally indicate lusipient Consumption, this remedy has allayed the alarm of inlends and, physicians, in general very grafffying and interesting libitances.

In derofulous Tuberculosis, this medicated from has had far more than the good effect of the most cautious by balanced preparations of lodius, without any oftheir well known 'inbilities.

The attention of fewales cannot be too confidently invited to this remedy and restorative, in the cases peculiarly affecting them.

In libeumatism, both chronic and inflammatory—in the latter however, more decidedly—it has beet invariably well reported, both as alleviating pairand reducing the swellings and stiffness of the joints and muscles. In internition to evera it must necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West, will probably be one of high remown and usefulness.

No remedy has ever been distovered in the whole history of medicines, which exerts such prompt, happy, and fully restorative effects. Good appetite, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use.

Fitt up in nest flat motal boxes containing 50 pills.

Constructed from the first on correct principles, it has always been seminously successful, and with the present improvements fully meeting all the requirements of the are. I new defeas all competition.

Farmors who may desirs it are at liberty to work one of these Machines is may perfectly balanced, not leaving a pound weight to this horses neck: its execution in reaping and mowing, in both wet and dry is perfect; it cuts the widest swarth, and as now made, with the lightest draft of any machine now in use. It is so constituted that the later of raking off is very much lightened, action when the constituted that the later of raking off is very much lightened, a castor wheel, can a entire new principle, on the grain side, wholly relieves the horses from the pressure of the machine from strain in turning, and is so arranged that the cutting harles completely and easily thrown over obstructions while in motion by the driver without the use of levers and complicated machinery. A very decaded and important fresture in its imprevenent consists in its perfect arrangement for separating and cleaning the track in mowing.

It is the most simple, most substantial, most durable and in every way the most complete and reliable Reaper and Mower in the world, and as such is Warranted. The Two horse Machine (with sawy draft for two horses, outs a swarth 5/2 feet wide, and the Four Horse Machine a foot wider. For particulars address.

PATENT SELF-TESTING AND SELF SEALING. These Cans and Jars being persectly simple in the rarratgement, and requiring no cement or solder to make them air tight-are the most reliable and convenient vessels that are in the market for preserving Fruits and Vegetables of all kinds.

They possess the following advantages over all other Cans and Jars that are in the market:

First—All time is required after the fruit is put in that, is simply to aget the cap-down tightly.

Second—They can be opened by a lagic turn of the cover, and the contents taken out in one fourth the time required by other vessels.

Third—Desides their simplicity and case of adjustment and the impossibility of stoppers thowing out, they show at all times the exact condition of the fruit by samply looking at the top of the every if fine going gasket is concave, the fruit is going to spoil, but will always show itself in time to low or the cover; if fine going to spoil, but will always show itself in time to low or the source.

DIRECTIONS FOR USE. Heat the glass or stone jars to about the same temperature of the fruit to avoid cracking, and fill the versel with syrup within one half inch of the top of the need, the cover is then pages and simply turned until it is perfectly tight.

Carey shoult be taken to replace the same cover on the jars from which they were removed.
