Agricultural Department. Agric, itural Inventions for a single Year (1859).

We were never more forcibly impress ed with the rapid improvement now taking place in all that pertains to the cultivation of the soil than when this morning we took up an advance copy of the Reiner Office Report for 1859, (kindly furnished by H. McCormick Esq., ch. Agr. elerk) and invaed to the list of patents granted during one year in the single department of Agriculture. An hour or two spent in classifying and counting the various inventions and discoveries, gave us the following results, viz:

There were patented during 1859 : Agricultural Implements of all kinds 659 Seed Plante s; 30 designated as corn planters; 34 as seed planters; 42 as seeding machines; 10 as cotton seed drills; and 1 pointo planter 117

Tion of each of the following: Butter working, Clover (seed) hulling, Grain fans, Grain weighers, Weeding Hoes, Machines for milking, Cider

One each of machines for making "Pearl barley," Cleaning animals, Corn cribs, Machine for Making Drain Tiles, Flail caps, grain bin grain cradle, grain dryer, grain shovel, grain hulling, hay manger, plant protector, field roller, scythe snath, machine for smoothing walks, pitch forks, pea-vine trellis, and machine for girdling and felling

trecs. Here are 659 inventions designed to facilitate the work of the soil all brought out in one year. Other years are similarly productive. It is true that many o these inventions do not turn out to be of special value either to the public or the inventors themselves; but there is originality enough in each of them to warrant careful government examiners in giving a patent. And it is not to be doubted that a considerable proportion of these new implements, and additions to old ones, are real improvements which will facilitäte human labor, and lessen toil.

TO DRY AND COOK SWEET CORN .-Soon as the corn is fit for the table, husk nad spread the ears, in an open oven, or some fast drying place. When the ker-nels loosen shell the corn, or shell as soon as you can. Then spread upon a cloth to dry in the sun, or on paper in a warm oven; stir it often that it may dry fast and not overheat. It more resembles the undried by its being whole, is sweeter, and retains more of its natural flavor by drying faster. When all dried, expose it to the wind by turning it slowly from disl to dish; the wind blows off all that troub lesome white chaff.

In the morning of the day it is wanted, look it over an I wash it; then boil gently in water sufficient to cover it. with hot water if more is needed. A short time before you dine(it should now be tender and nearly dry), add some sweet milk, or cream, pepper and salt to taste; a little sugar is an improvement. If the cream is not perfectly sweet, it curdles

CRUMPETS.-Two pounds of flour, two eggs, one half teacup of yeast, one pint of sweet milk; a little salt.

BLACKBERRY WINE.—Measure your herries and biuise them; then to every gallon add one quart of water. Let the mixture stand twenty-four hours, stirring occasionally; then strain off the liquo into a cask, to every gallon adding two pounds of sugar. Cork tight, and let it stand till the following October, and you will have wine ready for use without any further straining or boiling.

FLOATING ISLAND. - A nice dish for tea may be made in the following way Beat the whites of two eggs to a stiff foam, which pour upon a quart of milk previously set to boil; when the milk boils, the foam is done and you may take it off. Beat the yolks of five and whites of three eggs together, with sugar and salt to taste, and stir into the boiling milk; let it boil and place in your sauce dish, with the foam floating on the top. You may season with Temon or vanilla.

STEAM PUDDING .- One cup sour milk. one teaspoonful cream tartar, one-half tea spoonful soda, two eggs, one teaspoonful salt; made as thick as griddle-cakes, and steam one hour; add whatever fruit you

FANCY BISCUITS .- One pound of almonds, one of sugar, and some rose water Beat the almonds fine and sprinkle with tne rose water; when they are smooth to the touch, put in a pan with flour sifted through a fine seive; put the pan on a slow fire to dry the paste till it does not stick to the fingers; keep stirring to keep it from burning; then take it off and make it into funcy shapes; you may ice them,

or not. TO MAKE HARD SOAP .- One of your correspondents-C. A. CHASE, Ohiowishes a recipe for making hard soap. I think if he will try this one he will be pleased with it. Take six pounds of soda seven pounds of grease, three pounds of unslaked lime, and four gallons of water Put the sods, lime and water in a pot, and boil until they are dissolved; let the dregs settle; pour off the liquid and throw away the dregs; add the grease to the liquid and boil until it is of the consistency of honey; then pour it off to cool; set it in a dry place, and in a few days it will be dry enough for use.

HOSTETTER'S STOMACH BITTERS.

The proprietors and manufacturers of HOS-TETTER'S CELEBRATED STOMACH BIT-TETTER'S CELEBRATED STOMACH BIT-TERS can appeal with perfect confidence to physicians and bitizens generally of the United States, because the article has attained a repu-tation hereiofore unknown. A few facts upon this point will speak more powerfully than volumes of bare assertion or blazoning puffery. The consumption of Hostetter's Stomach Bit-ters for the last year amounted to over a half-million bottles, and from its manifest steady increase in times nost, it is evident that during increase in times past, it is evident that during the coming year the consumption will reach near one million bottles. This immense amount could never have been sold but for the rare medicinal properties contained in the prepara-tion, and the sanction of the most prominent tion, and the sanction of the most prominent physicians in those sections of the country where the article is best known, who not only recommend the Bitters to their patients, but are ready at all times to give testimonials to its officacy in all cases of stomachic derangements and the diseases resulting therefrom.

This was a temperary complexity, obtained

This is not a temporary popularity, obtained by extraordinary efforts in the way of trum peting the qualities of the Bitters, but a solid estimation of an invaluable medicine, which is estimation of an invaluable medicine, which is destined to be as enduring as time itself.

Hostetter's Stomach Bitters have proved a Godsend to regions where fever and ague and various other bilious complaints have counted their victims by hundreds. To be able to state confidently that the "Bitters" are a certain cure for the Dyspepsia and like diseases, is to the proprietors a source of the diseases, is to the proprietors a source of un-alloyed pleasure. It removes all morbid matter from the stomach, purifies the blood, and imparts repewed vitality to the nervous system, giving it that tone and energy indispensable for the restoration of health. It operates upon the stomach, liver, and other digostive organs, mildly but powerfully, and soon restores them to a condition essential to the healthy discharge

to a condition essential to the healthy discharge of the functions of nature.

Elderly persons may use the Bitters daily as per directions on the bottle, and they will find in it a stimulant peculiarly adapted to comfort declining years, as it is pleasant to the palate, invigorating to the bowels, excellent as a tonic, and rejuvenating generally. We have the oxidence of thousands of aged men and women who have experienced the benefit of using this preparation while suffering from stomach derangements and general debility; acting under the advice of physicians, they have abandoned all deleterious drugs and fairly tested the merits of this article. A few words to the gentler sex. There are certain periods when their cares are so harassing that many of them their cares are so harassing that many of them sink under the trial. The relation of mother and child is so absorbingly tender, that the mother, especially if she be young, is apt to forget her own health in her extreme anxiety for her infant. Should the period of maternity arrive during the summer season, the wear of body and mind is generally aggravated. Here, body and mind is generally aggravated. Here, then, is a necessity for a stimulant to recuperate the energies of the system, and enable the mother to bear up under her exhausting trials and responsibilities. Nursing mothers generally prefer the Bitters to all other invigorators that receive the endorsement of physicians, because it is agreeable to the taste as well as certain to give a permanent increase of bodily strength.

well as certain to give a permanent increase of bodily strength.

HENRY SAXTON,

Thousands are daily speaking in praise of DR. EATON'S INFANTILE CORDIAL.

and why? because it never fails to afford instantaneous relief when given in time. It acks as it by magic, and one trial alone will convince you that what we say is true. It contains

NO PAREGORIC OR OPIATE NU PAREGURU UH UPIATE

of any kind, and therefore relieves by removing the sufferings of your child, instead of by deadening its seasibilities. For this reason it commends itself as the only reliable preparation now known for Children Tecthing, Diarrhoea, Dysentery, Gripping in the Bowels, Addity of the Stomach, Wind, Cold in the head, and Group, also, for roftening the gums, rotucing indiant tion, regulating the flowels and relieving pain, it has no equal—being an anti-spas model it is used with unfeillne success in all cases of Convulsion or other Fits. As you value the life and health of your children, and wish to save them from those and and blighting consequences which are certain to result from the use of unrolles of which other remedies for infantile Complaints are composed, take none but DR, EATON'S INPANTILE CORDIAL, this you can rely upon. It is perfectly harmless and cannot injure the most delicate infant. Price, 25 cents Full directions accomprise arch bottle. Prepared only by CRURCH & DUPONT.

IMPURITY OF THE BLOOD?
This is a question of vital importance, and one which has never been salis actorily disposed of by the professors who teach the healthing agt. Some maintain—and especially the old school flysicians—that life lives in the blood, and therefore oil ligespeck originate in it—but modern science avers that aliments have their origination in both the solids and fluids of the body. That the latter preponderate, however, is a fixed fact, and medical skill has riearly demonstrated, that at least two-thirds of the life that human flesh is heir to, have their source in an
