SELF SEALING.

These Caus and Jars being perfectly simple in their arrangement, and requiring no cement or solder to make them air tight, are the most retintle and convenient vestels that are in the market for preserving They possess the following advantages over all other Caus and Jara that are in the market:

First—All that the required after the fruit is put in hot, is simply to arrear the cap down tightly. Second—They can be opened by a lingle turn of the cover, and the contonts taken out in one-fourth the time required by other vessels.

Third—Besides their simplicity and case of adjustment and the impossibility of stoppers blowing out, they show at all times the exact couldition of the fruit by simply looking at the top of the cover; if the guingsket is concave, the fruit is good; if roovex, the fruit is good; the propers is the grant of the cover: and the cover is the guing the propers is considered to the cover is the guing the fruit of the cover is the guing the fruit of the cover is the guing the cover is the guing the fruit of the cover is the guing the fruit is goly to spoil, but will always show itself in time to be saved.

DIRECTIONS FOR USE. Heat the glass or stone jars to about the same temperature of the fruit to avoid cracking, and fill the versel with syrup within one half inch of the top of the neck, the cover is then put or and simply turned until it is perfectly tight.

Care should be taken to replace the same cover on the jars from which they were removed As Read the following reliable testimony. The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost over conceivable case.

Innoxious in all maladies in which it has been filed, it has proved absolutely curative in each of the following complaints, viz:

In Debility, Nervous Affections, Em In Denility, Nervous Affections, Ema-ciation, Dysepsia, Constipation, Diar-rhoes, Dysentery, Incipient Consump-tion, Tuberculosis, Salt Rheum, Mismenstruction, Whites, Chlorosis, Liver Complaint, Chronic Headaches, Rheumatism, Intermittant Fevers, Pimples on the Face, &c.

Pimples on the Face, &c.

In cases of General Debility, whether the result of acute disease, or of the continued diminution of nexous and muscular energy from chronic complaints, one trial of this restorative has proved successful to an extent which no description nor written attestation would rander credible. Invalidas so long bed-ridden as to have become forgotten in their own neighborhoods, have suddenly re aspeared in the busy world as if just returned from protracted travel loga distant land. Some very signal instances of this kind are attested of female shifterers, einaclated victims of apparent marginations, sangulanous exhaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has in name.

La Nervous Affections or all kinds, and for reasons familiar with medical men, the operation of this prenarion of irou must necessarily be satistary, for anilke the old oxides it is vigorously tonic, without being excitting and overheating; and gently, regularly, spale. without ever being a gastric purgative, or inflicting; a disagreeable sensation:

It is this latter property among others, which makes it so remarkably effectual and permanent a remedy for Piles, upon which it also appears to exert a distinct and apseclife action, by disp vising the local tondency which forms them.

In Dyspepsia, innumerable as are its causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendent Costiveness.

In unchecked Diarrhea, even when advanced to Dysentery, confirmed, emaciating, and apparently malignant, the effects have been equally decisive and astonishing. nant, the effects have been equally decisive and astonishing.

In the local pains, loss of flesh and strength, debiliting cough, and remittent beetle, which generally indicate incipient Consumption, this reimedy has allayed the alarm of riends and physicians, in several very gratifying and interesting instances.

In Secondulous Tuberculosis, this medicated from has had far more than the good effect of the most cautiously balanced preparations of iodine, without any oftheir well known itselfitteness cannot be too confidently invited to this remedy and restorative, in the cases peculiarly affecting them.

In litheumatism, both chronic and inflammatory—in the latter however, more decidedly—it has been invariably well reported, both as alleristing pain and reducing the swellings and stiffness of the joints and muscles.
