Grythekex:—Your note of the 16th linet, has been received, saying that you had heard that I had been benefited by the use of Wood's Hair Restorative, and requesting my certificate of the fact if I had no objection to give it.

received, saying that you had heard time a man combination by the use of Wood's Hair Restoratives, and requesting my certificate of the fact if I had no objection to give it.

I award it to you choerfully, because I bink it due. My age is about 50 years; the color of my hair and burn, and inclined to curl. Some five of six years since it began to turn gray, and the scale in. the crown of my head to loose its sensibility and daudruft to form upon it. Beth of these discrepabilities increased with time, and about four months since a fourth was added to them, by hair failing off the top of my head and threatening of tomategons badd.

In this unpleasant predicament, I was induce i to try Wood's Hair Restorative, mainly to arrest the failing off of my hair, for I teght had no expectation that gray hair could over be restored to its original color except from dyes. I was however, greafly surprised to find after the new of the state of the time of the stay of

SELF SEALING.

These Cans and Jars being perfectly simple in their arrangement, and requiring no cement or solder to make them air tight, are the most reliable and convenient resols that are in the market for proserving Fruits and Vegetables of all kinds.

They possess the following advantages over all other Caus and Jars that are in the market:

First—All that is required after, the fruit is put in hot, is simply to serw the cap down tightly.

Second—They can be opened by a judge turn of the cover, and the contonts taken out in one fourth the time required by other vessels.

Third—Hesides their simplicity and case or adjustment and the impossibility of stoppers thowing out, they show at all times the exact condition of the fruit by simply looking at the top of the over: if the gund gasket is concave, the fruit is good; if renvex, the fruit is going to spoil, but will always show itself in time to be saved.

As regards intellectual culture, it is bilieved that the course of study and methods of instruction, adopted at Mount Warhington, are, to say the leaker, equal to those of the best schools in the country. The studies in which its pupils are orgaged, with the free ord teachings that accompany each recitation, and the frequent delivery of formal fectures on scientific or literary subjects, with choice readings from the Classic poets and prose writers of the English language, combined most favorably, to produce the best form of true womanly cultivation.

In this connection, it is deemed proper to mention, as one of the great advantages of the institution, and as materially affecting its character and contributing greatly to the successful accomplishment of its objects, that it is exclusively a floarding school, and, that no pupils are admitted, but such as are, in full, members of the College Family.

A course has been established for resident graduates, who may desire to prosecute their studies beyond the regular currentum. Besklet the study of the text books mentioned, they will prosecute a systematic recurse of reading, and will have the advantage obspecial lectures.

The College is furnished with complete apparatus for illustration in the departments of Chemistry and Natural Philosophy; and the public may rept assured, that whatever may be necessary, from time to time, to keep pace with the progress of the gology, contemplate a therough and harmonious acquaintance with the fundamental facts and truths of Christianity, as taught clearly in the serificers, and which rise aboveal merose training, the third is nother Jow nor Greek, for all are one in Christ Jesus."

The ontire character of the Telliquous training of the College is eminously Christian without being sectarian — and while no pains will be parent to impart a practical knowledge of the Christian Religion, parents and guardines may rest sured, that no attempt will, be made to interfere with the particular dominiational relations of t
