As regard intellectual culture, it is believed that the course of study und uncholed soft instruction adopted at Jount Warhington, were, to say the least, equal to those of the heat achools in the country. The studies in which its pupils are ongaged, with the free oral teachings that accompany each reclation, and the frequent delivery of formal features on scientific or literary subjects, with chrica residings from the Classic poets and proce writers of the English language, combine most favorably, to produce the best form of true manufactivity. In this connection, it is deemed proper to mention, as one of the great advantages of the Institution, and as maturially affecting its character and contributing greatly to the successful accomplishment of its objects, that it is acclusively a floariting School, and that no pupils are admitted, but such as are, in full, members of the College Family.

D MOTT'S PILLS & TRON

In Europe and the United States, and prescribed in their practice.

The experience of theusands daily proves that no proparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost overy conceivable case.

Innoxious in all maladies in which it has been tied, it has proved absolutely curative in each of the following complaints, viz:

In Lebility, Norvous Affections, Emaciation, Dysentery, Incipient Communication, Dysentery, Incipient Communication, Tubercuisolis, Sait the cum, Mismenstruction, Whites, Chlorosis, Liver Complaint, Chronic Headaches, Rheumatism, Intermittant Fevers, Pimples on the Face, &c.

Rheumatism, Intermittant Fevers, Pimples on the Face, &c.

In cases of Joient Debility, whether the result of acute disease, or of the continued diminution of nervous and nuscalar energy from chronic complaints, one trial of this restorative has proved successful to an extent which no description nor written attestation would render credible. Invalids so long hed-didden as to have become forgotten in their own neighborhoods, have suddonly re appeared in the heap world as if just roturned from protracted travel his, a distant land, some very signal instances of this kind are attested of female Sufferers, emeciated victims of apparent marasmus, sanguineous exhaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name. La Nervous-Affections or all kinds, and for resions familiar with medical men, the operation of this preparation of iron must necessarily be salutary, for, unlike the old exides it is vigorously tonic, without being exciting and overheating; and gently, regularly appoint, even in the most obstinate cases of costiveness without over boing a gastric purgative, or inflicting a disagreeable sensition.

It is this latter property among others, which make it so remarkably effectual and permanent a romedy for Piles, upon which it also appears to exert gliktinet and specific action, by dispring the local tindency which forms them.

In Dyspepsia, innumerable as are its causes, a single box of these Chaiybeate Pills has often sufficed for the most habitual cases, including the attendent Costiveness.

In unchecked Diarrhava, even when advanced to Dys-In unchecked Diarrhoa, even when advanced to Dys

nant, the affects have been equally decisive and astonishing.

In the local pains, loss of flesh and strongth, debiliting cough, and remittent hectic, which generally indicate inclined consumption, this remedy has allayed the slarm of friends and physicians, in several very gratifying and interesting instances.

In Secrotulous Tuberculosis, this medicated from has had far more than the good effect of the most bautious ly balanced preparations of iodine, without any oftheir well known infallitities.

The attention of fenales cannot be too confidently invited to this remedy and restorative, in the cases peculiarly affecting them.

In librounatism, both chronic and inflammatory—in the latter however, more decidedly—it has been invaried by well reported, both as alleviating pain and reducing the swellings and stiffness of the joints and muscles. In Internittent Fevers it must necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West, will probably be one of high renown and usefulness.

No remedy has every been discovered in the whole history of medicines, which exerts such prompt, happy, and fully restorative effects. Good applette, completed digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use.

Put up in meat flat metal boxes containing 50 pills,

tion, rapid acquainted disposition for active and cheerful exercise, conditionally follow its use.
