2 2 TT IS. A - COMMON OBSERVATION that there are more sufferers from debility, among Amoricanes, than ican be found among any other civilized nation. The reason is obvious. We take 'too little oxercicles and for-get the warts of the body in the "absorbing" pursuits of business. In all such cares, ordinary medicipees can do little good. What is required is just such 'a 'toolc' and invigorator as Dr. J. Listetich has given to jike, goold, in his colebrated "BITTERS." The weak and nervous donizen of the counting, house, the exhausted teller upon the shop-board, and the prostrated student of the midnight hamp have found, a wonderful regenerator in the "Bittops." and prefer it townere protontious but less effectious inselicities. But it should not be forgotten that the agent which is is margical in its influence upon a frame which is morely debilitated, is equally powerful in sensiting nature to expot the most terrible forms of disease.
