The following tariff of Wather Resits has been adopted by the Carlisle das and Water Company, to take effect frois and after the first sky of April next. It has been carefully prepared, and breather under than above the rates in neighboring towns. The linequalities of the existing tariff and its insufficiency has compolled the present action of the Company. The works, at best, yield a small per cont on the cost of construction, and soil protection requires that the revenue should bear some reasonable proportion to the evenues of the erection and management.

But the second of the second CONCENTICATED LEAVEN, Bread, ea-Cakes, all kinds of castry, EDW. CHAMBERLAIN & CO. Proprietor of Shawmut Chemical Works,

> No. 83 INDIA Street, Boston. CONCENTRATED LEAVEN is the result of carefu chemical research. All linkingredients are propared in the highest state of purity, and compounded with a view to produce bread of a far better quality, and in much less time, then by any other process; and, the manufacturers submit it, with entire confidence, to the judgment of discriminating housekeepers, bakers, &c.
> Bread of all kinds made by using Concentrate Leaven, is lighter, more digestible and nutritious; has an agreeable natural taste; is less jiable to sour; will retain its undisture longer than by any other process, and the whole preparation for the ôven need not exceed ten minutes.
>
> If is valuable because it is not precibable and may

the whole preparation for the own need not exceed ten minutes.

It is valuable because it is not perishable, and may be rendered available in places and at times when yeas the property of the places and attimes when yeas a sea. In all climstes and under all difficulty distincts, as a sea. In all climstes and under all difficulty of the property of the property of the property of the property of the bread more or less unwholerone.

It is also valuable as regards economy, as it has been ascriained that a saving be fixeded in the flour of not less than 16 per cent. In the common process much of the saccharine of the flour is lost by being converted into carbonic said gas, or spirit, and the west, is incurred solely for the purpose of generating gas to also the deuch, By using Concentrated Leaven this waste is avoided, and the gas obtained in a manner equally efficacious. Fermentation, as has been stated, destroys a part of the flour or meal, and, in consequence, a barrel of flour weighting 199 lbs, which, by the common method, ordinarily makes about 250 lbs of bread, giving by this process 200 lbs. thus effecting the very important saving of 16 per cegt in the quantity of four. By conformity to the directions on each package, any person capable of ordinary attention may conduct the process, and the result will invariably be highly satisfactory.

Assayer to the State of Marsachusetts.

"I have analyzed the Concentrated Leaven, manufactured by Massrs, Edw. Chamberlaih & Co., with reference to its purify and efficiency of action in producing the effect of yeast in distending dough, and thereby tendering it fit for making bread. This article is skilling compounded, from perfectly pure material. It raises the dough without consuming the sayer or any other periodic in the Bour, perfectly; and the same weight offlour will produce more asset, palatable bread than can be obtsided through the aid of yeast; while for cakes and pastry it is invaluable, as it sayes all risk and much time of the pastry cook.

"The experiments made by me confirm the statements made by the manufacturers, and prove this compound worthy of public apprecial and extended use.

Dear Sir:—I feel it my duty as well as my pleasure,
to state to you the following circumstance, which you
can use as you think prober. A contieman of this place
a lawyer, has been hald ever since files early youth;
so much so, that he was compelled to worr a wig. He
was induced to use a bottle of your 'Hair Bestonative,'
which he liked very much; and after using some two
or three bottles his hair gree out quite fuzuriantly,
and he now bas a handsome head of hair. The gentleman's name is Bradford, and as he is very well known,
in our adjoining counties, many persons can testify to
the truth of this statement; I give it to you at the re
quest of Mr. Bradford. You can sell a great deal of your
Hair Restorativa in this and the adjoining counties if
you have the proper agents. Yours, &c.

THOYIPSON SURGHNOR.

Ba. While: Dear Sir: -- Permit in to express the objections is an under for the entire restoration of my hair to its original color; about the time of my service in the United States it was rapidly becoming gray, but upon the application of your "lish Restorative" it soon recovered its original hoo. I consider your Restorative as a very wonderful invention, quite effections as well as agreeable.

As a very women in invention, that it is a screenible as a screenible.

The Restorative is put up in bottles of three sizes, ric: large, medium and small; the small holds \(\) a pint and retails for one dollar per bottle; the medium holds at least twenty per cent more in proportion than the small, retails for two dollars per bottle; the large holds a quart, 40 per cent more in preportion, and retails for three dollars per bottle.

GALLERY OF ART, 724 Arch Street, Philadelphia. COMMENDATIONS . GOMMENDATIONS

From Hon, Lewis D. Casibill, M. C., Obio.
My family, and friends all concur in the opinion that
the (Nèwell) Pleture is more life-like than any thing
they are saw. My like-nose has been repeatedly taken
by different Artists in various ways, but I have mover
yet had one which presents so true to nature, all the
features and expressions of countenance as this.

From Hon E. Joy Morris, late Minister to Italy.
The exquisite finish, heavity and softness of your portrait, conjoined with their durability of color and faithfulness as likenesses, cannot fail to commend them to
the attention and patronage of all who appreciate true
art.

From Col. JAMES PAGE. From Col. James Page.

Having version for a portrait, I procured one from Mr. Robert Newell, of the city of Philadelphia, a ministure in Oil Colors, under the new process discovered by him, and take great pleasure in expressing the satisfaction given me, not only by the accuracy of the likeness, but its artislic finish-in all respects, and recomplend him to the patronage of these disposed-to encourage the beautiful art.
