EDW. CHAMBERLAIN & CO. Proprietor of Shawmut Chemical Works, No. 33 INDIA Street, Boston.

CONCENTRATED LEAVEN is the result of careful chemical research. All its ingredients are prepared in the highest state of purity, and compounded with a view to produce bread of a far better quality, and in much less time, than by any other process; and the manufacturers submit it, with entire confidence, to the judgment of discriminating housekeepers, bakers, &c.

Bread of all kinds made by using Concentrate Leaven, is lighter, more digestible as untitious; has an agreeable natural taste; is less liable to sour; will retain its moisture longer than by any other process, and

"I have analyzed the Concentrated Leaven, manufactured by Massac Edw. Gamberlain & Co., with 1965 crouce to its purity and efficiency of action in producing the effector yeast in distending dough, and thereby rendering it, it for making bread. This article is skilingly compounded, from perfectly pure material, it raises the douch without consuming the sugar or any other principle in the flow, perfectly; and the sume weight of four will produce more sweet, palatable bread than can be obtained through the aid of yeast; while for cakes and pastry it is invaluable, as it saves all risk and much time of the gastry cook.

"The experiments made by two confirm, the statements made by the manufacturers and prefet his compound worthy of public approval and extended use.
