never propose to interfere with it in the States where it exists, or in the District of Columbia, or in the dock yards, arsenals, and navy yards, or to interfere with the const ing slave trade, or the inter-slave trade. I never heard the people talk of such things; and I can safely assert, that such questions are never considered in a political canvass in the North I never heard these subjects discussed till I came to Congress; and when I came here, I felt very much like the old far mer who went into a court room for the first mer who went into a court room to the time, to see what court was like. They were trying an action of replevin about a cow, and the third day of the trial had been reached, when the old gentleman, becoming impatient that the valuable time of the court should be wasted on such a trivial matter, shouted out at the top of his voice, and pulling out his purse at the same time, "Judge, what is this old cow worth? I'll pay her value and let the court proceed to something of 'importance." [Laughter.] So when I came here, and listened day after day to long speeches about shivery in the District of Columbia, I felt like asking what this District rould be. bought for. [Laughter.] I tell you that these questions are never discussed among were both buried with military honors, the the mountains of Pennsylvania. They have some strong ideas there about slavory, but they never expect to be called upon to regu-late the affairs of the District of Columbia. This is the only place where such questions are ever heard discussed. The people them-selves never talk about them, although I am seives never talk about them, although I am free to confess, that the people of my district have got some pretty strong notions in their mind about shavery; but they do not arise out of any hostility to you who own slaves. They never dream of interfering between you and your slaves; for I tell you they would hate, it has west east of way to have your and the property of the property of the people of the people of having stolen a horse from Joseph Conner of Frankford township. They dislike even the free negroes, and do not in any manner associate with them. I never heard my constituents assert any desire to interfere between masters and their slaves; and I do honestly and verily believe that to day they stand ready to come to your aid and assistance, in maintaining the institution in the States where it now exists.

Hence it is that I only express the sentiment of my people when I vote for a clause in the Constitution, that Coegress shall never interfere with slavery in the States; and I assert that when I vote in that way, I but support the Chicago platform. If my Republican brethren believe that their platform is a good thing, I do not see how they can object to taking a portion of that platform object to taking a portion of the pharmand incorporating it in the fundamental law of the land. It it is a good thing in a platform, it will be a good thing in the Constitution. Why not? And I tell you honestly, that any Republican who fails to come up the consumer. that any Republican who may be come ap-and vote fairly for this proposition reported by the committee of thirty-three, will be, in my judgment, marked as tending towards aboli-tion, and will weaken my confidence in the Republican party. He seemed to have the impression that it might in some way prevent a State from abolishing slavery within its own limits. Why, sir, if I understand that proposition, it has no reference to the action of any State. It only applies to Congress. If the State of Maryland shall desire to abolish slavery within he rown limits, or any other State shall desire it, they may do jit, but Congress cannot. Now, what earthly obection can there be to that? I admit there is a single objection in my mind. It may tend to create excitein my mind. It may tend to create excitement in the North. It may tend to deepen the agitation upon these questions, and in that way do more harm than good; but I think or second from the Union. (ARLISLE GAS & WATER CO'Y.

The following tariff of Water Rents has been adopted by the Carlisle Gas and Water Company, to take effect from and after the first day of April next. It has been carefully, prepared, and is rather under than above the rates in neighboring towns. The finequalities of the existing tariff and its insufficiency has compelled the present action of the Company. The works, at best, yield a small per cent on the cost of construction, and self protection requires that the x venue should bear some recommally proportion to the expenses of the errection and management.

CTATEMENT OF COUNTY DEBT. CONCENTRATED LEAVEN, Bread, Tea-Cakes, all kinds of Fastry, MANUFACTURED BY

EDW. CHAMBERLAIN & CO. Proprietor of Shawmut Chemical Works, No. 33 INDIA Street, Boston.

CONCENTRATED LEAVEN is the result of careful chapter and the highest state of purily, and compounded with a view to produce bread of a far better quality, and in much less time, than by any other process; and the manufacturers submit it, with outre confidence, to the judgment of discriminating housekeepers, bakers, &c.

Bread of all kinds made by using Gooccyratrae Leavers, is lighter, more digestible and nutritions; has an agreeable natural taste; is less liable to sour; will retain its moisture longer than by any other process, and the whole proparation for the oven need not exceed ten minutes.

14 is valuable because if is not porishable, and may the whole preparation for the oven need not exceed ten minutes.

It is also preparation for the oven need not exceed ten minutes.

It is also because it is not perishable, and may be rendered available in places and at times when yeas is not within reach, as at sea. In all climates and under all circumstances, it may be adopted, thus only attaining all difficulty of procuring yeast or any other forment, which is frequently of an interior quality, rendering the bread niors or less unwholesome.

It is also valuable as regards economy, as it has been ascertained that a suring is effected in the flour of not less than lie per coal. In the common process much of the saccharine of the flour's lost by being converted into earbouic and gas, or spirit, and tho waste is incurred solely for the purpose of generating gas to raise the dough. By using Concentrated Leaver, this waste is avoided, and the gas obtained in a mannier equally efficacious. Fernentation, as has been stated, destroys a part of the flour'er meal, and, in consequence, a barrel of flour weighing 190 its, which, by the common method, ordinarily makes about 250 lbs of bread, giving by this process 200 ibs. thus effecting the very important saving of 10 per cont in the quantity of flour. By conformity to the directions on each package, any person capable of ordinary attention may conduct the process, and the result will invariably be highly satisfactory.

#### CERTIFICATE FROM DR. HAYES,

Assayer to the State of Massachusetts.

"I have analyzed the Concentrated Leaven, manufactured by Messra. Edw. Chamberlain & Co., with reference to its purity and efficiency of action in producing the effect of yeast in 'distending dough, and thereby readering it it for making bread. This article is skilfully compounded, from purfectly pure material. It raises the dough without cansuming the sager or any other principle in the flour, perfectly; and the same weight of flour will produce more sweet, palatable bread that cap be obtained through the aid of yeast; whife for takes and pastry it is invaluable, as it saves all risk and much time of the pastry cook.

"The experiments made by me confirm, the statements made by the nantafacturers, and prave this compound worthy of public approval and extended use.

"Esspectfully.

"A. A. HAYES, M. D. State Assayer,

10 Boylston street, Boston, Septemb r 25, 1860.

During the year 1854, I was so unfortunate as to be thrown from my sulkey against a rock by the road-side, from which my head received a most terrible blow; causing a great deal of irritation, which communicated to the brain and external surface of the head, from the effects of which my hair was finally destroyed over the entire surface of the head. From the time I first discovered its dropping, however, up to the time of its total disappearance. I employed everything I could think of, being a professional man myself, and, as I thought, understanding the nature of the disease, but was finally defeated in every prescription advanced.

Thee and no other circumstances induced me to resort to your worthy Hair Restorative, which I have every reason to believe, produced a very happy results two months after the first application, I had as beautiful a head of young hair as I ever waw, for which I equalized as a first proper of the season of a linquirers, moreover, I shall recommend your remedy to all inquirers, moreover, if whill me my influence, which I flatter myself to say, is not a little.

From tion Lewis D. Campuell, M. C., Ohlo.
My family and friends all concur in the opinion that
her (Newell) Picture is more life like than any thing
hey ever saw. My likeness has been repeatedly taken
by different Artists in various ways, but I have never
t had one which presents so true to nature, all the
extures and expressions of countenance as this. From Hon E. Jow Monna, Indo Minister to Italy.

The exquisite finish, beauty and softness of your portrait, conjoined with their durability of color and fatherliness as likenesses, cannot fail to commend them to the attention and patronago full who appreciate true art.

Having occasion for a portrait, I procured one from Mr. Robert Newell, of the city of Philadolphia, a ministure in 01 Colors, nuder the new process discovered by him, and take great pleasure in expressing the satisfaction given me, not only by the accuracy of the likeness, but its artistic finish in all respects, and recommend him to the pationage of those disposed to on-courage the beautiful art.
