U. S. 10-40 BONDS.

THESE Bonds are issued under the THESE Bonds are issued under the Act of Congress of March 8th, 1864, which provides that all bonds issued under this act shall be EXEMPT FROM TAXATION by or under any state or municipal authority. Sub-criptions to these Bonds are received in United States notes or notes of National Banks—They are to be REDEEM. D IN COIN, at the pleasure of the Government, at any period not less than ten or more than fort, years from their date, and until their redemption Five Per Cont Interest will be paid in Coin, no bonds of not over one hundred dollars annually and on all other bonds semi-annually. The interest is pay able on the first days of March and September in each year.

year.

Subscribers will receive either Registered or Coupon Bonds, as they may prefer. Registered bonds are recorded on the books of the U.S. Treasurer, and can be transferred only on the owner's order. C. upon Bonds are payable to bearer, and are more convenient for compargial uses.

are payable to begree, and are more convenient for commercial uses.

Subscribers to this loan will have the option of having their bonds draw interest from March 1st, by paying the accrued interest in coin—(or in United States notes, or the notes of National Banks, adding fif yercent for promium,) or receive them drawing interest from the date of subscription and deposit. As these bonds are EXEMIT FROM MUNICIPAL OR STATE TAXATION, their value is increased from one to three per cent. per annum. according to the rate of tax lavies in various parts of the country.

At the present rate of premium on gold they pay OVER EIGHT per cent interest in currency, and are of equal convenience as a permanent or temporary investment.

equal convenience as a permanent or temporary investment.

It is believed that no securities offer so great inducements to londers as the various descriptions of U. S. bonds. In all other forms of indebtedness, he faith or ability of private parties or stock companies or separate communities only is pledged for payment, while for the debts of the United States the whole property of the country is holden to secure the payment of both principal and interest in coin.

These bonds may be subscribed for in sums from \$50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will have the benefit of the interest.

at any moment, and the holder will have the benefit of the interest.

It may be akeful to state in this connection that the total "Funded Dubt of the United States on which interest in payable in gold, on the 3d day of March, 1864, was \$768,965,000. The interest on this debt for the coming fiscal year will be \$45.937,129, while the current of the current fiscal year, ending June 30th, 1864, has been so far at the rate of over \$100,000,000 per annum.

It will be seen that even the present gold revenues of the Government are largely in excess of the wants of the Treasurer for the payment of gold interest, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same amount of importations, to \$160,000,000 per annum.

Instructions to the National Banks acting as loan agents were not issued from the U. S. Teasury until March 26, but in the first three of April the subscriptions averaged more than Ten Millions a week. Subscriptions will be received by the

First National Bank of Carlisle, and by all National Banks which are depositaries of Public money, and all respectable Banks and Banker-throughout the country, (acting as agents of the Na-tional Depositary Banks,) will furnish further infor-mation on application and afford every facility to sub-scribers.

Philadelphia, Arril 471, 1864.
The committee on "Labor. Records and Reverues," invite co operation with them in the particular work for which they have been appointed. As no portion of the people are more patricule than the working mon and woman of the country, it is but just and proper that they should slike have an opportunity to contribute to the objects of the Fir. The most equable plan for accomplishing this, and, at the same time the easiest one, at the same time the castest one, and the same time the castest one, and the same time the castest one, at the same time the castest one, and the same time the castest one at the continuity. Many will contribute a day of their labor willingly, who would not subsertible their money. To reach every department of industry and art will be a work of great labor, but, if at timed, will be productive of immense results.
