U. S. 10-40 BONDS.

THESE Bonds are issued under the Act of Congress of March 8th, 1864, which provides that all bonds issued under this act shall be EXEMPT FROM TAXATION by or under any state or municipal authority. Subacriptions to these Bonds are received in United States notes, or notes of National Banks.—They are to be REDERMID IN COIN, at the pleasure of the Government, at any period not less than ton uor more than fort, years from their date, and until their redemption Five Per Cent Interest will be paid in Coin, on bonds of not over one hundred dollars annually and on all other bonds semi-annually. The interest is payable on the first days of March and September in each year.

year.

Subscribers will receive either Registered or Coupon Bonds, as they may profur. Registered bonds are recorded on the books of the U.S. Treasurer, and can be transferred only on the owner's order. Cupon Bonds are payable to hearer, and are more convenient for

are payable to hearer, and are more convenient for commercial uses.!
Subscribers to this loan will have the option of having their bonds draw interest from March 1st, by paying the accrued interest in colm—(or in United States notes, or the botes of National Banks, adding fif y percent for premium.) or receive them drawing interest from the date of subscription and deposit. As these bonds are EXEMPT FROM MUNICIPAL OR STATE TAXATION, their value is increased from one to three por cent. per annum, according to the rate of tax levies in various parts of the country.

At the present rate of premium on gold they pay OVER EIGHT per cent interest in currency, and are of equal convenience as a permanent or. tsemporary investment.

It is believed that no securities offer so great inducements to lenders as the various descriptions of U.S.

It is believed that no securities offer so great inducements to lenders as the various descriptions of U.S. bonds. In all other forms of indebtodness, the faith or ability of private jarties or stock companies or separate communities only is pledged for payment, while for the debts of the United States the whole property of the contry is holden to secure the payment of both principal and interest in coin.

These bonds may be aubscribed for in sums from \$50 up to any magnifude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will have the benefit of the interest.

It may be useful to state in this connection that the total Fun led Debt of the United States on which interest is pavable in gold, on the 3d day of March, 1864, was \$703,945,000. The Interest on this debt for the coning fiscal year will be \$40.037,126, while the curtoms revenue ingold for the current fiscal year, ending June 30th, 1864, has been so far at the rate of over \$100,000,000 per annum.

It will be seen that even the present gold revenues of the Government are largely in excess of the wants of the Treasurer for the payment of gold interest, while the recent increase of the tarff will doubtless raise the annual receipts from customs on the same amount of importations to \$150,000,000 per annum.

Instructions to the National Banks acting as loan agents were not issued from the U. S. Teasury until March 26, but in the fifther three of April the subscriptions averaged nore than Ten Millions a week. Subscriptio s will be received by the

First National Bank of Carlisle, and by all National Banks which are depositaries of Public money, and all respectable Banks and Bankers throughout the country, (acting as agants of the Na-tional Defositary Banks,) will furnish further information on application and afford every facility to sub-scribers.
