The Inpending Draft. PROVOST MARSHAL'S OFFICE, 15, DIST. PA. Carlisle Pa. Feb. 22, 1865. The following orders, received at this Office, is published for general information. R. M. HENDERSON, Capt. and Provost Marshal. 15th, District Pa.

EXECUTIVE MANSICN, Washington, Febuary 8, 1865. His Excellency Governor Smith:

Complaint is made to me, by Vermont, that the assignment of her quota for the Draft on the pending call is intrinsically unjust, and also in bad faith of the government's promise to fairly allow credits for men previously furnished. To illustrate, a supposed case is stated, as follows:

Vermont and New Hamshire must, be tween them, furnish 6,000 men on the pending call, and being equals, each must furnish as many as the other in the long run, But the Government finds that, on former calls, Vermont furnished a surplus of 500 and New Hamshire a surplus of 1.500-these two surpluses, making 2,000, are added to the 6,000, making 8,000 to be furnished by the two lot of Tools, and a variety of Household States, or 4,000 each, less by fair credits. Then subtract Vermont's surplus of 500 from her 4,000, leaves 3,500 as her quota on the pending call; and likewise subtract New Hamshire's surplus of 1,500 from 4,000, leaves 2,500 as her quota on the pending call. These 3,500 and 2,500 make precisely the 6,600 which the supposed case requires from Household Furniture, &c. the two States; and it is just, equal, for Vermont to furnish 1,000 more now than New Hamshire, because New Hamshire has here- Furniture tofore furnished 1,000 more than Vermont. which equalizes the burthens of the two in the long run. And this result, so far from farming implements.

being had faith to Vermont, is indispensible. Sale of Jeremiah Noffsinger, in South to keeping good faith with New Hamshire. By no other result can the 6,000 men be obtained from the two States, and, at the same time, deal justly and keep faith with both; and we do but confuse ourselves in question-

The supposed case is perfect, as an illustration. The pending call is not for 300,000 men subject to fair credits, but is for 300,000 on Feb. 27th. of Horses, Cows, Young Cuttle, Hogs, Sheep, Plows, Harrows, Cultivaremaining after all fair credits have been deducted; and it is impossible to concede hold Furniture, &c. what Vermont asks without coming out short of the 300,000 men, or making other localities pay for the partiality shown her.

Yours truly, (Signed) A. LINCOLN. THE DRAFT.

The Bridal Chamber, an Essay of Warning and Instruction for Young Menipulsished by the flower Association and sent free of charge in sealed envelopes. Address. Br. J. SKILLIN HOTGHTON, Feb. 90-19. of December 19, 1864, with directions that, if any errors be found therein, to make such corrections as the law and facts may require, and report their determination to the Pro-vost Marshal General. The determination of said Board to be final and conclusive, and the draft to be made in conformity there-

dered to make the draft in the respective districts, as speedily as the same can be done of the list, by first Riad, to diss RATE will the best of this county. after the 15th of this month.

Have respectfully to report as follows:
The call for 3.0,0.00 men, made by the President, on the 19th of December, 1864, requires that that number shall be raised.

But the law requires that the number of men previously furnished by different localities, and the periods of their service, shall be considered, so as to equalize the draft.

The number of men liable to military du-

ty is to be determined by the enrollment The number of men which had been furnished by the various localities, and their periods of service, were ascertained, and pre-vious accounts having been adjusted, the ex-

cesses, where they existed, were carried forward under the last draft.

The amount of service furnished is determined by multiplying the number of men raised by the number of years for which they calleted Having thus ascertained the number of

men enrolled on the 31st day of December, 1864; the number of men furnished up to that date; the localities from which they come, and the periods of their service, it is proposed to distribute the call for 300,000 en among the several districts, and parts of districts, according to the number en rolled in each, and the number of men furnished, and the periods of service previously rendered by each.

The rule by which this is accomplished is

Take the whole number of years of service from the commencement of the rebellion to the 31st of December, 1864. From that sum deduct the whole number of men furnished from all the districts of the United States up to that date. The remainder will be tha excess of years of service furnished by all the districts. Multiply the call of December 19, 1864, by three, to have the number of years of service upon that call, and to this add the excess, as ascertained above. Then, as the number of Men enrolled from the whole United States, up to the 31st of December, 1864, is to the period of service, as above ascertained, so is the number of men enrolled in a given district to the number of

enrolled in a given district to the number of years of service it is required to furnish, including its pro rata share of the excess.

From this sum deduct the actual excess the district furnished; the remainder is the number of years of service which the district is required to furnish under the call of December 19, 1864, which, divided by three, gives the number of men required from the district. district.

As this is for 800,000 men, that number As this is for 300,000 men, that number cannot be reduced by men going in for a period longer than one year. Inequalities produced by men going in under this call for longer periods than one year must be equalized on future calls.

It will be perceived that though the aggregate of the excess furnished is added to the whole call the excess for such district is

whole call, the excess of each district is afterwards subtracted from its quota. Thus the number of men called for is neither increased nor diminished, but equality produced, considering the number of men and their periods of service. Localities which have heretofore furnished a greater amount of service have, in proportion to their enrol-ment, a less amount to furnish under this,

and e oneverso. Men having heretofore enlisted for one. two, and three years, it is necessary to take one of those periods as the basis calculation. As three years embraced both the other periods, it makes the calculation more simple to adopt that. The same result would be aronformity with the requirements of the laws f Congress, and is just and equitable.

We have carefully examined and provet work done under this rule by the Pro-

vost Marshal General, and find that it has en with fairness We file in the Provost Marshal General's office our calculations of the quota of each and every district endorsed by us as correct. JAMES SPEED,

Attorney General of the United States.
