## The Destiny of Josephine.

The history of Napoleon has yet to be written, and written by an American. The world has been amused with fables of the man of destiny, which have been transmitted as an heir-loom, until they reached him who sits upon the throne of France, and is pleased with the title, "the man of destiny."

This title, though a favorite with every class of Frenchmen, undoubtedly arose with the story of Josephine, and through | ness, he turned away, and left the room her attached to Napoleon. Though her simple story is smothered by the more brilliant one of her husband, yet it was to strike the blow that broke the golden known that long before Napoleon's admir- | chain that bound them, and from that ers claimed for him the great destiny he accomplished, it was a common story in St. Helena, the fall of Napoleon began, Paris, what we are about to tell.

It was while almost a child, that Josephine, in some of her wanderings with her school-fellows, came across a vagrant gipsey or fortune-teller. The woman, attracted in some way toward the beautiful 'child, insisted upon telling her fortune even against her will and without reward. She told her she would be very soon a wife, a widow and afterward Queen of France. The prediction itself was common enough, but as simple as it was it had its effect upon Josephine, who immediately embraced it as fact, and could for a long time think of nothing else.

When the fulfilment came to the first part of the prediction, it of course strength- | ing, when a number of young ladies were ened her in the belief of the rest, and even when in prison under sentence of two parties approached each other, one of death, and when her bed was taken from the young ladies, innocently looking up, under her at night because she was to die remarked: "See, there's the Great Bear!" in the morning, bade her, friends have The young lady might have been study. courage, it would not be so, and that she ing astronomy, but one of the bachelors would yet sit upon that throne then in did not appear to be aware of the fact, tuins beneath the bloody feet of Robes for he ejaculated, "Confound it! Had his downfall occurred one week earlier her husband would not have been of his victims; had he lived one day longer she would have been another of them

There was but little lapse of time be tween her liberation from prison and her marriage to Napoleon, and it was by the influence she exerted that he was appointed to the command of the Army of Italy; after which the path that led them upward was clear and open until the destiny she had insisted upon was accomplished, and the crown of France upon her head.

But there was one thing more that Josephine had foretold for herself, which was the utter loss of power and rank to which she had been so wonderfully elevated; and while she brooded over this. set his hand seal upon this paper at the he who was her lord gathered new power and yielded to new ambition She tried to crush it, and point out what should be us to that paintid harlot, Stait Rights. There was no longer the confidence of "Mr. Forbes," said I " you are a man- | the past between them; no longer the seeking of sympathy and advice.

It was the 20th of November, 1800 "How long have you been engaged in and the court was especially gay in honor of the visit of the King of Saxony. Oct. 14, 1864. The peculiar taint or infection which we call SCROFULA lurks in

VERSI competent to Sustain the vital forces in their vigorous action, and leaves the system to fall into disorder and decay. The scrofulous ontamination is variously caused by mercurial isone love living disordered decay that the state of disease, low living, disordered digestion from unhealthy food, impure air, fith and filthy habits, the depressing vices, and, allowe all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the roll of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases which it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, and finally Consumption; in the glands, swellings which supported and become ulcerous sores; in the stomach and bowels, derung ments which produce indigestion, dyspepsia, and liver corr plaints, on the skin, cruptive and cutaneous affections. These all having the same origin, require the same remedy, viz. purification and invigoration of the blood. Purify the blood, and these dangerous distempers leave you. With fashle foul or corrupted blood you car not have health; with that "life of the

healthy, you cannot have scrofulous disease. Aver's Sarsaparilla is compounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs. White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whol series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in Ayla's American Almanac, which is furnished to the druggists for gratuitous distribution, wherein may learned the directions for its use, and some the remarkable cures which it has made when all other remedies had failed to afford relief Phose cases are purposely taken from all sec tions of the country, in order that every render nav have access to some one who can speak to him of its benefits from personal experience. Scrofula depre-ses the vital energies, and thus

leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of Aver's Sarsaparilla, although it is composed of ingredients, some of which exceed the lest of Sarsaparilla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood; purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital funcions, and thus expels the distempers which

We know the public have been deceived by many compounds of Sursapardla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence the cure of the afflicting diseases it is inname it is a very different medicine from any other which has been before the people, and is far more effectual than any other which has over been available to them.
