There is no particular in which the water snake differs from the common land snake, except that the tail is furnished with flukes. Another peculiarity of this animal is the power which it has of contracting the substance of the body within the skin. Instances were mentioned to us by our friend, the walcman, in which boats had nade fast to these snakes, and after hauling them over the gunwale, the fleshy nortion of the body would be contracted and entirely withdrawn from the boat, leaving nothing to hold on to but the skin.

And the deputy subjoins his testimony that he has executed the order !

OPINION IN KENTUCKY.-Kentucky is still a slave State, and will probably be one of the last to adopt the constitutional amendment. No negro can cross the Ohio River without a pass. One of the colored church-es of this city has recently had for its minis. ter a slave, and has been obliged not only to raise money for his salary, but to pay his master three hundred dollars for his time! The ruling sentiment of this community is scarcely more than semi-loval. The minis. ter of the principal Episcopal church has been a chaplain in the rebel army, and is even now obliged to report to the military authorities from time to time. To-day it i only the firmness of the general command ng this department that secures protection to unconditional Union men. The return-ing rebels from Hood's and Leo's armies, though not allowed to wear their uniforms, receive a welcome from the sympathizers with the South.
