PIANO-FORTES.

DRIGGS' NEW PATENT

RE the only Instruments con tructed An a truly scientific principle. They have great or strength, and will remain longer in tune then any other Plano. The construction is simple and natura? all the extrapeous lumber in the body of the instru ment is dispensed with; the sound boards are merely two arched planks of thin wood, like the front and back of a violin; the strings are attached to a strong Iron trame, which is separated and entirely independ ent of 'he case, thereby dispensing with the old harp form of stringing, by substituting straight bridges, preserving at the same time the Over Strung Bass. o which Mr. Driggs is the inventor. By these improve ments we gain much more vibratory power, at the same time preserving all its purity and richness of

They have received the highest testimonials from the Press, and all the principal artists in the country among which are:

Harry Sanderson, L. M. Oottschalk. Max Maretzek. S. Thalberg. Wm. Mason, Theodore tisfield, Herman No tenh cupt, A. Barıli, Francis H. Brown. M. Strackosch.

Wm. Henry Fry, Chas. Fradel. Mr. SEGESMUND THALBERG, the great planist says:—I have examined your new Piano-fortes, εnd I cordially approve of its system of construction. It rinciple, by which great increase of vibratory power i obtained, being very simple and perfectly pholosoph. cal. The tone is grand and noble; it has great capac ity for sustaining the sound or singing, and its volume of tone or power I have never heard excelled in

depth. purity, and sympathetic sweetness. Wm. HENRY FRY, late musical critic of the N. Y Tribune says :- I have examined your newly invented Plano-Fortes. They merit all the praise given to them by Mesars Thalberg, Gottschalk, Strackosch, Mason and others. As regards structure, they are original and philosophical; in purity, volume, and continuity of tone; in vocal versimilitude, that crowning excellence which enables the planists to "sing" on the, in strument, your Pianos ever deserve the highest rank Your invention, in my opinion, is destined to work a radical change in the manufacture of Pianos through-

From the N. Y. Herald, fept. 5 .- Upon a careful examination of Drigg's Piano-Forte, we find the results obtained are a very fine singing tone, great purity and brilliancy throughout the entire instrument, not often found in Pianes constructed upon the old plan. The N. Y. Times, July 12 says:—We have now an instrument without an equal It can sing with a smooth delicacy, perie tly musttainable on any other instrument: an ordinary player obtains with no exer tion, t'e fullness of a Grand Plane-Forte, and they

must speedily supersede the old styles. GENTLEMEN :- Having thoroughly examined and tested the Plane-Fortes invented and patented by Mr. ing from his improvements, as exhibited in the in struments under examination, in point of richnes, depth and brilliancy, equals that of the best Grand Piano Fortes, and excets them in pure, musical infonation and actual tone power thus approximating. closer to what I consider perfection in the instrumen than has yet been achieved by any other system of
