PIANO-FORTES.

DRIGGS' NEW PATENT.

RE the only Instruments constructed And a truly scientific principle. They have greater strength, and will remain longer in a une than any other Piano. The construction is simple and natural all the extraneous lumber in the body of the instrument is dispensed with; the sound boards are merely two arched planks of thin wood, like the front and back of a violin; the strings are attached to a strong Iron frame, which is separated and entirely independ ent of the case, thereby dispensing with the old harr form of stringing, by substituting straight bridges, preserving at the same time the Over Strung Bass, of which Mr. Driggs is the inventor. By these improvements we gain much more vibratory power, at the same time preserving all its purity and richness of

Press, and all the principal artists in the country among which are: L. M. Gottschalk, Harry Sanderson,

Max Maretzek. Theodore Eisfield, Wm. Mason, Herman Wo'lenhaupt, A. Barili, Francis H. Brown, M. Strackosch, Chas. Fradel. Wm. Henry Fry,

Mr. SEGESMUND THALBERG, the great planist, says :- I have examined your new Piancefortes, and I rdially approve of its system of construction. Its principle, by which great increase of vibratory power is obtained, being very simple and perfectly ph losophical. The tone is grand and noble; it has great capacity for sustaining the sound or singing, and its volume of tone or power I have never heard excelled in depth, purity, and sympathetic sweetness.

Wm. HENRY FRY, late musical critic of the N.Y.

Tribune says; -1 have examined your newly invented Piano-Fortes. They merit all the praise given to them by Messrs Thalberg, Gottschalk, Strackosch, Mason and others. As regards structure, they are original and philosophical; in purity, volume, and continuity of tone; in vecal versimilatude, that crowning excellence which enables the planists to "sing" on the in strument, your Pianos ever deserve the highest rank Your invention, in my opinion, is destined to work a radical change in the manufacture of Pianos throughont the world.

From the N. Y Herald, fept. 5 .- Upon a careful examination of Drigg's Planc-Forte, we find the results obtained are a very fine singing tone, great purity and brilliancy ibroughout the entire instrument, not often found in Pianos constructed upon the old plan.

The N. Y. Times, July 12 says:—We have now an instrument without an equal. It can sing with a smooth delicacy, periectly unattainable on any other Instrument: an ordinary player obtains with no exertion, the fullness of a Grand Piano-Forte, and they must speedily supersede the old styles.

GENTLEMEN:- Having thoroughly examined and tested the Plane-Fortes invented and patented by Mr S. B. Driggs, I am of the opinion that the tone result ing from his improvements, as exhibited in the ir struments under examination, in point of richness depth and brilliancy, equals that of the best Grand Piane Fortes, and excels them in pure, musical intonation and actual tone, power thus approximation closer to what I consider perfection in the instrument than has yet been achieved by any other system of
