craft of statesmen, and becomes, in its independence, the spiritual life of the people. Here toleration is extended to every opinion, in the quiet certainty that truth needs only a fair field to secure the victory. Here the human mind goes forth unshackled in the pursuit of science, to collect stores of knowledge and acquire an over-increasing mastery over the forces of nature. Here the national domain is offered and held in millions of separate freeholds, so that our fellow citizens, beyond the occupants of any other part of the earth, constitute in reality a people, Here exists the democratic form of government; and that form of government, by the confession of European statesmen, "gives a power of which no other form is capable, be cause it incorporates every man with the State, and arouses every thing that belongs

to the soul." Where, in past history, does a parallel ex ist to the public happiness which is within the reach of the people of the United States? Where, in any part of the globe, can institutions be found sound so suited to their habits or so entitled to their love as their own free Constitution? Every one of them, then, in whatever part of the land he has his home. must wish its perpetuity. Who of them will not now acknowledge, in the words of Washington, that "every step by which the people of the United States have advanced to the character of an independent nation, seems to have been distinguished by some token of Providential agency?" Who will not join with me in the prayer, that the invisible hand which has led us through the clouds that gloomed around our path, will so guide us onward to a perfect restoration of fraternal affection, that we of this day may be able to transmit our great inheritance, of State Governments in all their rights, of the General Government in its whole constitutional vigor, to our posterity. and they to theirs through countless gene-ANDREW JOHNSON. ## PIANO-FORTES.

DRIGGS' NEW PATENT.

A RE the only Instruments constructed on a truly scientific principle. They have gre ter strength, and will remain longer in tune then any other Piano. The construction is simple and natural all the extraneous lumber in the body of the instruent is dispensed with; the sound boards are mere y two arched planks of thin wood, like the front and back of a violin: the strings are attached to a strong Iron trame, which is separated and entirely independ ent of the case, thereby dispensing with the old harp form of stringing, by substituting straight bridges, preserving at the same time the Over Strung Bass. f which Mr. Driggs is the inventor. By these improve ments we gain much more vibratory power, at the same time preserving all its purity and richness of

MR. Andrew Johnson:—Dear Sir: In November last I had a severe attack of Rhoumatism, to which I had not been subject for nearly three years. The attack was so severe that I could not move my had or raise my arm. After trying different medicines without avail.
