The construction is simple and natura all the extraneous lumber in the body of the instr ment is dispensed with; the sound boards are mere! arched planks of thin wood, like the front and back of a violin; the strings are attached to a strong on frame, which is separated and entirely independ ent of the case, thereby dispensing with the old harp orm of stringing, by substituting straight bridges preserving at the same time the Over Strung Bass, which Mr. Driggs is the inventor.
