AMERICAN ORGANS. (From "Godey's Ladies' Book" February,

REED ORGANS, &c.

THE following remarks and sugges tions relative to this immensely popular instru-ment will doubtless interest and profit very many of our readers, we commend the article to their caron our readers, we commend the article to their careful perusal:

A hundred and one makers of Organs, Cettage, Parlor, Cabinet, American, School Organs, sto, etc., are each claiming to make the best instrument in the world. Being comparatively a new instrument, as at present constructed, we are convinced the public are much less cápable of judging of its merits, or demerits, than of most other instruments. If there is really an essential difference in them, if there are some excellent and some worthless ones, the public should have some orterion for judging of them, some facts which will enlighten them. We cheerfully concede the space for this article knowing that there is hardly a family, or church, or school in all the land, but is more or less interested in this topic. We are also aware of its being a great misfortune, a real calamity, to any of them to purchase an inferior or worthless Organ, ruinous to good playing, and often a source of much annoyance and vexation. We know this article to enanate from a candid any intelligent source, and thus we give it to our readers.

The question is often asked, what are "reed organs!" The question is often asked, what an "freadurgant" The question is often asked, what an "freadurgant" The question is often asked, what any freadurgant to the world but the old melodeon in disguise. Many of these so-called organs have the same bellows turned on edge to eight room, they have simply sounding name. But an organ, to be fir reality an organ, much have a wind cheat or, reserved for air separate from the bollows, into which wind-cheat the reads and the same years are sold into the full round tone, similar to the dute or pipe organ, oven, smooth, frm, and mellow; and this fonce from resds cannot so bottained in any other way known. Nothing so among a true organize apsamodically with every variation of force on the bollows, which is always the case where the reads as an accelience, just as though they did not know that it must very agon throw the reeds on the reads as an accelience, just as though they did not an easier matter to obtain a much better and the sound better and the same properties. The same properties are sound-box.

LAWNS, and CALICORS, and the supplied more easily managed level by other methods. The truth is, any organ, so celled, or melodeon which has the wind acting directly upon the reeds, is nothing more than a supplied more accessed in the supplied more season away of the fact that they can obtain those that are organs in fact as well as in name, they will be you have of the fact that they can obtain those that are organs in fact as well as in name, they will be you have one of the fact that they player can the supplied more sensity, but the content of the supplied more sensity, but the fact that they player can believe the content of the supplied more sensity, but the content of the supplied more sensity, but the fact that they player to change about a content of the supplied more sensity, but the largest and best divided bellows, in all of the supplied more sensitial and deviable qualities. There is only one possessing all these points, and that is the other work is alighted, no e our readers.

The question is often asked, what are "reed organs We adswer, they are, in most cases, nothing in tworld but the old melodeon in disguise. Many of the control of the same research with the same research with the same research with a same research with the same

1866. INCREASE OF RATS .- The Farm. er's Gazette (Frglish) asserts and proves by Squres the one pair of RATS will have a progeny and descenden no less than 651,066 in three years. Now, unless the immense family can be k-pt down, they would consume more food than would sustain 65,000 human beings.

**See "COSTAR'S advertisement above."

RATS versus BIRDS .- Whoever en-

guges in shooting small birds is a cruel man; whoser adds in exterminating rate is a benefictor. We should like some one to give us the benefit of their experience in driving out these pests. We need something besides dogs, cate, and traps for this business.—Scientific American, N. V. See "COSTAR'S" advertisement above. 1866.
