EAST HIGH STREET, CARLISLE, PA. J. T. RIPPEY, PROPRIETOR. J. T. RIPPEY, PROPRIETOR.

The subscriber has leased this commodious Hotel, and has fitted it up with new furniture. Many improvements have been made and it is now one of the most complete Hotels outside of Philadelphia. The travelling public are requested to call and prove for themselves the advantages which it offers.

The Table will be supplied with every article in season, and careful and attentive servants will be in attendance.

The Bar is furnished with the best Liquers of every class, and patrons may rest assured that no Liquers will be offered which have been adulterated.

Residents of the city, who seek the country during the Summer months, will find this Hotel a most desirable place. Located in the beautiful Cumberland Valley, mid-distance between Carlisle Springs and Mount Holly, in the most beautiful town of the State, with a society noted for its refinement, taste and elegance, more inducements are offered than any other point in the State can present.

April 20, 1866—6t. American House, North Hanover St., Carlisle, Pa. THE subscriber respectfully informs the above well known house, formerly kept by Mr. Shriner, and intends sparing no axertions to accommodate all who may be pleased to give him a call. The house has been refitted and is in excellent order. He

Having employed the very best workmen, the public can rely on having their work done in the most fashionable and substantial manner.

By strict attention to business and a determination to please, the subscribers hope to receive a liberal share of public patronage. Cartislo, April 20, 1866—3m*.

Farmers Must Have It! All Farmers must have the new Harand Poon Hay Forks. Known as Reger's Fatont and manufactured by D. B. Regers & Son, Pittsburg.—Many Frmers upon trial of this Fork finding it so easily and safely operated, and in all respects of ar superior to any they had been using have thrown away the old one and purchased a Harpoon Fork. It is no humbug. Every Farmer wants one after seeing it tried. They are made entirely of Iron and steel and are the strongest Fork made. They are small, light and neat, and take up less room than are ordinary hand pitch fork. A boy with the Harpoon Fork can handle as much hay with easo as several men. The amount this Fork can lift will astonish any one who has never seen it operate it makes the farmer smile and say "the Harpoon Fork is the thing." AMERICAN ORGANS. (From "Godey's Ladies' Book". February, 1866.)

REED ORGANS, &c. THE following remarks and suggest ment will doubtless interest and profit very many our readers, we commend the article to their carefungues. our readers, we commond the article to their careful portusal:—

A hundred and one makers of Organs, Cottage, Parlor, Cabinet, American, School Organs, etc etc., are each claiming to make the best instrument in the world. Being comparatively a new instrument as at present constructed, we are convinced the public are much less enjable of judging of the merits, or demorits, than of most other instruments. If there is really an essential difference in them, if there are some excellent and some worthlessomes, the public should have some criterion for judging of them, some facts which will enlighten them. We cheerfully concede the space for this article knowing that there is hardly a family, or church, or school in all the land, but is more or less interested in this topic. We are also aware of its being a great misfortune, a real calamity, to any of them to purchase an inferior or worthless drain, ruinous to good playing, and often a source of much annoyance and texation. We know this article to cannot from a candid and Intelligent source, and thus we give it to

to purchase an inferior or worthloss Gran, ruinous to good playing, and often a source of much annoyance and vexation. We know this article to emanate from a carbild and intelligent source, and thus we give it to our readers.

The question is often asked, what are "reed organs?" We adswer, they are, in most cases, nothing in the world but the old melodeen in disguise. Many of the so-called organs have the same bellows, the same reeds, and the same general internal arrangement. With the bellows turned on edge to gain mom, they have simply put on a more pretentious exterior and a more high sounding name. But an organ; to be in reality an organ, must have a wind chest or reservoir for air separate from the bellows, into which wind-ghest the reeds open, and the tone has room to expand sind perfect itself into the full round tone, similar to the fulte or playorgan, oven, smooth, firm, and mellow; and this tone from reeds cannot be obtained in any other way known. Nothing so annoys a true organist as to have the volume of sound swelling and jerking spasmodically with every variation of force on the bellows, which is always the case where the reeds open direct into the bellows or air passages, instead of a wind-chest or sound-box. And yet some makers oven go so far as to claim this spasmodic or automatic jerking of the bellows on the reeds as an excellence, just as though they did not know that it must very soon throw the reeds out of tune, and injure the bellows; and as though it were not an easier matter to obtain a much better and more easily managed swell by other methods. The truth is, any organ, so called, or melodeon which has the wind acting directly upon the reeds; tup as you may. And when organists and true musted have the orders and the supplied more venly, but with far greater out to the performer, from the bellows, is also a very important improvement. By this means not only can the wind be supplied more venly, but with far great the reed and distinct from the bellows, is also a very important improvement candid and intelligent source, and thus we give it
