SEELY'S Patent Metallic Sole.

A NEW INVENTION. WETTING THE FEET is the most ETTING THE FEET is the most prolific cause ordisease and death known to humanity. It is almost faired) bring on a cold; and colds, neglected, and often when not neglected, lead to fevers or to coughs and latal consumptions. It is in recognition of this rath that the inventive talent of the country has for years been devising some method, or attempted to device it, for keeping the feet dry, and yet that should not give meanwhence to the wanter. Rubber shoes, in one form or another cave hitherto been our reliance; but it is well known, as among their many cells, that while they keepinte feet dry from external monsture, they sweat them over much, and by thus inducing an undue tenderness increase a susception y to colds rather than otherwise. They are also cumbersome to the feet, and withal are very expensive. The demand is for comething that shall make the ordinary Boot and shoe impervious to water, without affecting their elegance or dura lifty, and, it possible, without adding sensitly the cost of their manulacture. These, it will be comeded are most important features, and we conscientiously affirm that they are absolutely attained in the invention here with presented to the public.

The invention consists in inserting between the inner and outer side, when the bot its making a thin Matallic Plate exceedingly duettle, combining flexibility with toughness, very light, and every way apaped to the end desired, which the bot its making a spinet busined we tor dampless, though the leet may the admission of wet or dampness, though the feet may be exposed over so long upon wet payenents or damp ground
To la des and children the Metallic Soles will be of To have and condend the state to the and delected able value, as from their habits of life and delected upon an ioadequate protection and of the that attend upon an ioadequate protection train of alls that attend upon an bandequate protection to the leet.

These Soles have already been tried by the best of all tests action use and the testamonals to their merits, feedly profilered, moneate that they must be speedily and university adopted by the public. The Patont Metalic societies and Shoes are being introduced into the le ding foot and shoes stores throughout the United States, and will supplant all forms of overshies except possibly for deep mod or snow, as they become k own he sure toget them and take no other. If your shoemaker does not happen to have them, he can procure them without difficulty. If he will not, them rend yourself to the inventor one dollar and thirty cents, and rotain six pair, assorted sites, with right to use, which will be promptly forwarded by mall or express pre paid, and which can be made up by any snoemaker in the country. Agencies will be established he every city and viriage, and supplied with Soles and proprietary stamps, at schedure prices and liberal commission allowed on sales. TESTIMONIALS. The undersigned have for the past six months worn Boots and Shoes possegging Mr. Seely's Medallic Soils, and find them an effectual preventive against dampiness and the coulds so often taken from damp feet. Most gladly do we testify to the perfect efficiency of their service. The atallic soil is not only a grand contribution to the cause of galeral health, but a positive liceary obviating all necessity of India Rubbershore, seep in mouldy weather. All ordinary dampinoss, and even water upon pavements, is completely globed of its power of harm by this most simple and acctual invention. No one which has once used them will ever be without them again, as they increase the coat of boots and shoes by a rum witch is searcely worth naming, and hours, positively, dry feet, which is recknown among the first conditions of health and connort. We heartfly recommend the "Metallic Sole" to all the sonsibat.

READ.WHAT DR., SCHENCK IS DOING.

DR. J. H. SCHENCK.

DEAR SR:—I feel it a duty I owe to you, and to all who are suffering under the diseases known as. Consumption and Liver Compising it, be let them know what great benefits! I have received from your Pulmonic Syrup and Seaweed Tonie in so short a time. By the blessing of God it has cured me thus far

Dr. behonek, I will now make my statement to you, as follows:—About eighten months ago I was attacked with a severe cough; and testiled on my lungs; I could not retain snything I ate, and suffered with evening fevers and night sweats. I was very much reduced. The whites of my yes were very yellow; likewise m. skin; my appetite all gone, and unable to digost what I did eat; bowels swoolen, tregular and costive, I was very low spirited, and had such violent spells of coughing whon I laid down at hight hind when I arose in the morning that they would last one or two hours.

I then would be nearly exhausted, and was entirely unable to lie on my lett side. I cannot describe my wretched suffering as I would wish to do. Every oreas in my holy was diseased or deranged. Such was I arose in the morning that they would last one or two hours.

I then would be nearly exhausted, and was entirely anable to lie on my leit side. I cannot describe my wretched suffering as I would wish to do. Every organ in my blody was diseased or deranged. Such was my situation at this time, and I was confined to my bed from the inst of February, 1802, to June, 1803, not table to sit up. I had the best of medical attendance the whole of the time. My cough was so very bad that it ricked me very mach. I at this time raised a large qualitity of thick, yells w, offensive matter, sometimes with blood, and it was generally accompanied by nausea and a furred and thick coated tongue. At the time of coughing so badly I would have sharp, shooting pains in my left side and heart, night sweats, and soreness all through my whole cheet; hadmuch in ward fever, pain in my back and under my shoulder blades and in the small of my back, and at times so severe that it would throw me i.to spasms. Now my physician gave me up to die Others I had, and the best of them, but they could do nothing or me, and at that time I was nothing but skin andbones. I then was in the western part of Missouri. In June last we left there for the East, and in August last we came to new York, and I was so reduced that I could only walk a little with my husband's belp. After I had been lifter a short time the salt water breeze made me feel much better for a time and then I had again to call a physician for aid. We had four of the best physicians of New York on the diseases of the lungs, and doctors of all kinds, but of no avail. They said I was past cure, and that my lungs were too far gone for any one to cure me. But at this time I was on my feet about the house, not able to do much of anything. In Nevember last I grew worse, and the consumption diarrhea bet in and hasted about eight weeks. We had tried all and everything that I could grasp at like a d, ling person for my diseases—consumption and liver complaint—but of no avail.

In January, 1863, I was

I had given up all hopes of ever getting well agair, and made my peace with God, to be ready whenever be called for me.

On the 7th of January, 1563, my husband called on Dr. Schenek, 32 Bond street, New York, and stated to him my case, with a request for him to call and sen which he did, and examined me with the respiromet r. When he was about to go I asked him if he could cure me? His reply was; "I cannot tell, both lungs are diseased, and the bronchial tubes are affected on both sides." And yet he seemed to think there were tungs enough left to effect a cure if the diarrhea c. u.d be stopped. He said morder to do this, he would have to give me Mandrake Pills in small doses at first, to carry off the morbid matter, and then, with astringents, he hoped to check it, which he did, but the constant cough ug, mght sweats, and diarthea had presented to think if could live to get enough reliable to the total me was afraid my vital powers were too much prostrated ever to rally, and yet he seemed to think if could live to get enough reliable to the work of the morbid matter, and then, the hope and with the constant cough ug, mght sweats, and diarthea had presented to think if could live to get enough reliable to the work of the morbid matter, and then, with astringening high proposition cooking. The public are specially requested to call and see it, as we are confident it will fully recommend the listed.

Mr. SEGESMUND THALBERG, the great planist, says :-- I have examined your new Plano-fortes, said I ordially approve of its system of construction. Its principle, by which great increase of vibratory power is obtained, being very simple and perfectly philosophical. The tone is grand and noble; it has great capacity for sustaining the sound or singing, and its volume of tone or power I have never heard excelled in depth, purity, and sympathetic sweetness. Wm. HENRY FRY, late musical critic of the N.Y. Tribune says:—I have examined your newly invented

Plano-Fortes. They morit all the praise given to them by Messrs Thalberg, Gottschalk, Strackosch, Mason and others. As regards structure, they are original and philosophical; in purity, volume, and continuity of tone; in vocal versimilitude, that crowning excel lence which enables the planists to "sing" on the i strument, your Pianos ever deserve the highest rank Your invention, in my opinion, is destined to work ont the world.

From the N. Y. Herald, Sept. 5.—Upon a careful ex amination of Drigg's Piano-Forte, we find the results obtained are a very fine singing tone, great purity and brilliancy lhroughout the entire instrument, not ofter found in Pianos constructed upon the old plan.

The N. Y. Times, July 12, says:—We have now an instrument without an equal. It can sing with a smooth delicacy, perfectly unattainable on any other instrument; an ordinary player obtains with no exer tion, the fullness of a Grand Plane-Forte, and they

must speedily supersede the old styles.

Gentlemen:—Having thoroughly examined and tested the Plane-Fortes invented and patented by M . B. Driggs, I am of the opinion that the tone result g from his improvements, as exhibited in the in opth and brilliancy, equals that of the best Gran lano Fortes, and excels them in pure, musical inton ation and actual tone, power thus approximating closer to what I consider perfection in the instrumen than has yet been achieved by any other system of Yours respectfully,
