SEELY'S Patent Metallic Sole. A NEW INVENTION.

ETTING THE FEET is the most proline cause of disease and death known to humanity. It is atmost sure to bring on a cold, and golds, neglected, androften when not neglected, lead to fevers or to coughs and latal consumptions. It is in recognition of this ruth that the inventive talent of the country ha for years been devising some method, or attempted to devise it, for keeping the feet dry, and yet that should not give inconvenience to the wearer. Rubber shoes, in one form or another, have hitherto been our reliance; but it is well known, as among their many evils, that while they keep they feel dry from external moisture, they sweat their Fowler much, and by thus inducing an undue tenderness increase in susceptibility to colds rather than otherwise. "Phey are also cumbersome to the feet, and withat are very expensive. The demand is for omething that shall make the ordinary floot and shoc lupper lous to water, without affecting their elegance or duraufity, and, it possible, without adding sensibly to the cost of their manufacture. These, it will be conceded, are most important features, and we conscientiously affirm that they are absolutely attained in the invention here with presented to the public. The invention consists in inserting between the 1-ri ner and outer sole, when the boot is making a thin Merathic Plane, exceedingly ductile, combining flexibility with toughness, very light, and every way apapted to the ond desired, while the additional expusse is merely nominal. If furnishes a perfect barrier against the additional expusse is merely nominal. If furnishes a perfect barrier against the additional expusse is merely nominal. In the passion of the public collision of the combining flexibility with toughness, very light, and every way apapted to the ond desired, while the additional expusse is merely nominal. It furnishes a perfect barrier against the additional very way apapted to the ord desired, while the additional very way apapted to the ord desired, while the daditional very way apapted to the ord d W ETTING THE FEET is the most

the admission of wet or dumpness, thought the teet may be exposed ever so long upon wet pavements or damp beround.

To ladies and children the Metallic Soles will be of inciculable value, as from their habits of life and delicacy of dross, they are particularly exposed to the long train of ills that attend upon an inadequate protection to the feet.

These Soles have already been tried by the best of all tests actual use, and the testimonials to their merits, freely proficered, indicate that they must be speedily and universally adopted by the public. The factor Metallic Soled Boots and Shoes are being, introduced into the leading Boots and Shoes are being, introduced into the leading Boots and Shoes to set throughout the United States, and will supplant all forms of overshoes, except bossibly for, deep mud or snow, as they become known. Be suce to get them and taken, no other. If your shoemaker does not happen to have them, he can procure them without difficulty. If he will not, then send yourself to the inventor one dollar and thirty conts, and obtain six pair, assorted estes, with right to use, which will be promptly towarded by mail or express pre-paid, and, which rando made up by apy shoemaker low will not. Agendies will be established in every city and village, and supplied with Soles and proprietary stamps, at schedule prices, and liboral a mmission allowed on sales. Also General Agencies for States appointed on application, with proper testimonials to the inventor.

Dr. Schenck.—Dear Str: Take picture in sending you a cettideate in addition to many you have already received from shiftering humabity. I tan scarcely find language sufficiently strong to express my "heartifft; gratification of the wonderful cures your MANDRAKE, BILLS and SEAW EED TONIC have effected in the cure of one of the most stubborn cases of the affection of the liver. For three years I suffered beyond description; all my friends, as well as myself came to the conclusion that my time in this life was short. Such was the terrible condition to which I was reduced that life to me had become a 'hutchen'; inly whole system was in a state of inflammation; I could not est. I could not sleep; my whole body was filled with pain; swelling would arise in my wrists and ankles, revidering them totally useless. On several occasions I was attacked with a rush of blood to the head which would fell me to the ground, and Twould be carried away for dead. I applied to several eminent physicians of our city, who administered all the medicines that they thought would reading, cits of his food and a law is a law resolved to the feed my city our advortisement in my hands, I called on you I you skaminab mean and told in the 'hellish and Tonic for your advice, and, as you predicted, amagorishing citre was effected.'-I continued your word that in one week I would find myself another man.
