THE following remarks and suggestions relative to this immensely popular instrument will doubtless interest and profit very many of our readers, we commend the article to their careful

our readers, we commend the article to their careful perusal:

A hundred and one makers of Organs, Coitage, Parlor, Cabinet, American, School Organs, etc etc., are each claiming, to make the best instrument in the world. Belifficoinparatively a new instrument as at present constructed, we are convinced the public are much less capable of judging of its merits, or demerits, than of most other instruments. If there is really an essential difference in them, if there are some excelent and some worthlessones, the public should have some critérion for judging of them, some facts which will enlighten them. We cheerfully concede the space for this article knowing that there is hardly a family, cr church, or school in all the land, but is more or less interested in this tople. We are also aware of its being a great misfortune, a real calamity, to any of them to purchase an inferior or worthless Organ, ruinous to good playing, and often a source of much annoyance

good paying, and often a source of much annoyance and vexation. We know this article to canante from a caudid and Intelligent source, and thus we give it to our readers.

The question is often asked, what are "reed organs?" We adswer, they are, in most cases, nothing in the world but the old melodeon in disguise. Many of the so-called organs have the same bellows, the same reeds, and the same general internal arrangement. With the bellows turned on edge to gain room, they have simply put on a more pretentious exterior and a more high soundingstands. But an organ, to be in reality an organ, must have a wind chest or reservoir for air separate from the bellows, into which wind-chest the reeds open, and the tome has room to expand and perfect itself into the full round tone, similar to the futte or pipe organ, oven, smooth, firm, and mellow; and this tone fram reeds cannot be obtained in any other way known. Nothing so amoys a true organist as to have the volume of sound swelling and jerking spasmodically with every variation of force on the bellows, which is always the case where the reeds open direct into the bellows or air passages, instead of a wind-chest or sound-hox. And yet some makers even gos of far as to claim this spasmodic or automatic jerking of the bellows on the reeds as an excellence, just as though they did not know that it must very soon throw the reeds out of tune, and injure the bellows; and as though it were not an easier matter to obtain a much botter and more easily managed swell by other methods. The truth is, any organ, so called, or melodeon which has the wind acting directly upon the reads, is nothing more of the fact that they can obtain those that are organs in fact as well as in name, they will buy no more of the objectionable ones. Then again the swell should always be separate and distinct from the bellows, so as not to be acted on by the hand, or soft blowing, but convenient so that the player can use it with the knee, separate from the hands or feet, and thus always under easy cou SHOES. Also a full new stock of Ladles' and Children's Shoes of every description. I sell no auction work and can warrant every pair I sell and being at no extra expense for keeping the same am enabled to sell cheaper than any Shoe House in the County, call and see them all who want good and neat Shoes.

Thankful for the liberal paironage which the public have long accorded met hope to be able to merit a continuance of the same.

Remember the place on the Corner opposite the Post Office and the Mathodist Church.

By J. H. Schols & Dear Shile For over fifteen years thave been froubild with a severo cough and usually two or three times a year with more or less hemorrhage, which to ether, for the last lew years, has kept me thin in flesh and too weak to do business of any kind without suffering. In August 1841 had a very severe hemorrhage, and, according to the judgment of a good New York physician, I was classed as beyond the reach of medicine, and was advised to be prepared so far as property matters were concerned, to be ave this world at short notice. The physician (and my good friends) said that the first could I took must prove lated. Early in January I took a severe cold, and for tunately was occupying rooms at No. 42 BOND STREET, directly over your office. I think about the Icth of January I pround a bottle of your. Pulmone Syrup and commenced taking it freely. My feet and limbs were very much swollen, and all the symptoms of a speedy doch seemed to accompany my cold. I sent for my forther physician, and state d to hum that I was taking your metelness, and after showing them to him, and having the color of them, & he replied: "You can take them if you like, they will do you no harm." He said. You know what I told you last summer, and say the same now, if you have any business to close up, do not put it off." He said to other triunds that he round see no hope to me," and my friends and relations concluded my time had coars. At this time I was taking freely of your medicine, but had not seen you. The dector called a few times, and found my time the dector, and that to see he had come and the seen you first came to my roun and made the sexualization to you give me but hit the encolorigement, but on the contrary, express d sad doubts of my eve being helped out of my then seen. toom and made the examination, you gave me but his the caucaragement, but on the contrary, express d sad doubles of my ever being helped out of my then seeming dufficulties. The second time that you called, finding nee still gaining, you cave me encouragement, saying, 'may symptoms were improving; the Pulmanic Syring, Scaweed Fone and Mandrake Fills had acted like a charm." My circulation, my cough, my app tite, all began to improve, and I could wilk about my room a little. You visited me nearly every Tuess day, and found me improving, and ted me not to go out of my room until the first day of May. It took no old while under your treatment, my appoints became first-rate, and you told me to eat everything I wisned of a nutritious nature, and to exercise about the room as much as possible. I followed your advice, and to the sarples of m, old physician and friends, I seem much better than I have been to several years, and breathe better than I ever expected a person could with one lung, the left being completely dried up. I feel very grateful to you, and consider your advice and modelines invaluable.

DR SCHLECK—Dear Sir.—About two years ago! wa taken with a very troublesome cough and a path in my breast; savan or eight months passed away without my doing anything for mysel. Then I applied to a physician, who attended me to about three months without rendering me 'any, soyrie. I also chained the advice and treatment of a physician in one of our bespitals, and also had the advice and treatment of two other physicians but all to no purpose. During this long space of time! was nearly dead; several times my friends came to see me and witness my exit into the spirit-world. I was confined to my bed two months at one time. My breathing was exceedingly short. I gave up several times all hope of gotting bette; and as regarded getting well, that was entirely out of the question. And to think this day I am well and hearty! I was advised by some of my friends to try Dr. Schenek's Medicines. I accordingly bought bottle after bettin, until I reached the ninth; then I found a decided change in my lough for the better. I suffered sevenely from palpitation of the fieart, and two weeks after I commenced taking your modeline this difficulty ceased.

When I first want to Dr. Schenek's office it was with DR SCHENCK-Dear Sir . - About tw i commenced taking your medicine this difficulty ceased.

When I first went to Dr. Schench's office it was with difficulty that I could get up into his reception room, I was so weak and so swelled; my skin was as saliow as though that the jaundice; I left dull, heavy and skeepies. Dr. Schench, after oxamini g me, salt both my lungs were affected, and gave me but little hope; but his medicines, in about I wo weeks, teek right hold of me; it seemed to go right through my whole system. The l'ulmonic Syrup, Sea-Weed Tonic and Mandrake Pills, all took right hold in the right place. The Pills brought away great quantities of bile and slime; the Syrup loosened the matter in my lungs, which came off very free; the Sea-Weed Tonic gave me an appetite, and everything seemed to taste good.

To show what great power the medicines have in purifying my system, and to show how bad I was diseased, beside all the bile that passed my bowels, and the great quantities of phlegm and matter I expectorated, I broke out all over in large bolds, that would continue to gather and run for about six weeks, and I had at one time over twenty-five bols. I have nothing of the kind now, and feel like another person altogother. I can safely say that I have not enjoyed such health for five years as I do now, and cannot praise you and your medicines enough. May G dabundantly bloss and proserve you! is the sincere desire of one who has been so wonderfully relieved through your agency; and If any one desires to know with regard to the truthfulness of this report, if they will call upon any of my friends, or upon me, No. 4 Drydon Place, near Thompson street, below Cadwahder, Philadelphia, they will be perfectly satisfied with the validity of the case.
