From Rev. W. D. Seigfried, Pastor of Twelfth Bap-tist Church, Phila. A NEW INVENTION. WETTING THE IFEET is the most prollic cause of disease and death known to humanity. It is almost sure to bring on a cold; and colds, neglected, and often when not neglected, lead to fevera-or to fought and latal consumptions. It is in recognition for this 'with this true the invention taken to the country to for verse heart the inventior taken to wiles were recommended by friends, and some of them tested, but without relief. Your Heofiand's German Bittgrs were recommended by persons who had tried them, and whose, favorable mention of these bitters induced me to try thom. I must confies that I had an aversion to Patent Medicines from "the "thousand and one" quack "Bitters," whose only alues seems to to pain off sweetened and drugged livour upon the fevers-or to cough and intal consumptions. It is in recognition with his visit that the inventive tased of the country he for years been devising some method, or attempted to devise it, for keeping the feet dry, and yet that should not givenneouvenience to the wearer, Rubber shoes, in one form or another, have hitherto been our reliance, but it is well known, as among their many evils, that while they keep the feet dry from external moisture, they sweat thom over much, and by thus inducing an undue, tenderness increase a susceptibility to colds rather than, otherwise. They are also cumbersoms to the feet, and within are very expensive. The demand is for something that shall make, the ordinary Book and Shoe impervious to water, without affecting their degance or durability, and, it possible, without adding sensibly to the cost of their manufacture. These, it will be conceded, are most important features, and we conscientiously affirm that they are absolutely attained in the invention herowith presented to the public.

The invention consists in inserting between the iner and outly sole, when the boot is making, a thin Mistalle Platz, exceedingly ductile, combining flexibility with toughness, very light, and every way apapled to the oad desired, while the additional expense is merely nounial. It furnishes a perfect barrier against the admission of wet or dampers, though the feet may be exposed ever so, long upon wet prevenues or damp ground.

To ladles and children the Mistallia Soles will be of
