In a column or so of nonsensical twaidle, the Herald informs its readers that the Democratic party is about to be buried. We have heard this old cry that the Democrate is dead so frequently, during the last five years, that it has no terrors for us any longer. Some inquisitive Radicals are in doubt as to whether the Volunteer furnishes brains for the Journal of Commerce or the Journal of Commerce for the Volunteer. How is it.

The history of the Republican party is such a hist as no other party ever acquired, and after it has run race it will be spoken of with loathing and contosing all tree partiets, and no man of ordinary sensibility will acknowledge that he ever belonged to it - Volunte Have you any sense of deceney at all? Since 1856 in every State in which free discussion wasn't a crime the Republican Party has been largely in the majority. Its organization contains a very great prependerance of the wealth, inteligence and respectability of the country. We will make a canvass of any town or city that finy be mained, and if the result does not show that a large majority last year; Carbondale, third ward, with its 120 concernic majority last year, and its 265 this year; Carbondale, third ward, with its 120 concernic majority last year, and its 265 this year; Dunmore, with its 80 Demogration of the south, district of Fulston township, with its 113 taxables and 100 Democratic majority—these majority—these majority—these mindreous similar districts show the perpetention of enormous faults Have you, any sense of decency at all? and that a large majority of the other kind are in the party opposed to it, then we will agree that our observation has been extremely limited. Why the Chairman'of your State Cantral Committee in his circular to the faithful, very candidly admitted that our newspaper circulation vastly exceeded that of your party. It won't do for editors to dispute that this fact is conclusive as to the relative merits of the two parties. And yet you say that no man of ordinary sensibility will acknowledge that he hastover belonged to the Republican Party! Pray have the men who make up your majorities in-Borks, York and Luzerne counties much more refined sensibilities than those that compose ours in Philadelphia and Pitts-

Patriots and martyrs, who driven from their homes and families to seek asylumns of refuge in holes and caves; and whose steadfast faith and undaunted loyalty were of incalculable service to the Nation. And not a man of all these to day but hates in his soul the hated name of Northern Democracy, knowing as he does that the last hope of slavery and treason is wrapped up in that wicked organization. If the Volunteer will say that the Dick Taylors, the Mayor Munroes, the Andy Johnsons and every negro-hating, treasonoving rebel from Maryland to Georgia, are with the Democratic party, we will agree with it. They belong to it and it belongs to them, as fully and as naturally as sin belongs to the devil. But no greater insult could be

We see in the Lowistown Gazette that the Copperheads had engaged in perpetrating the most stupendous frauds in Millin county, in order to gain an advantage over the loyal citizens of that county in the offices, balloted for this full. We trust the Republicans will not leave the matter rest with the result at the polls where these frauds were committed, but that they will prosecute those who have been engaged in the perpetration of the same. Gen. Banks on the Situation Gen. Banks, in his speech at Boston, on eccepting the Congressional nomination on the 16th, made the following remarks: He elieved in the great doctrine of equality of rights and the equality of men, but he went one step further than many with whom he was associated, when he spoke of equality of rights and equity of power; he referred only to the loval people of this country.-The enemies of this country; the men who have led this government into the inapproiable danger which hovers over our own institutions and republican institutions through out the world, shall nover be restored to political power by any vote or voice of his; peculiar fondness for "coming at" us whon- he would never coase to remember that the authority of the people was delegated; he was confident that the great final object of

This remark Ledger, published in the Journal of last week, in which it was alleged that President Johnson had propounded certain questions to during the campaign by a very zealous his Attorney General Stanberry, asking whether the Executive would be justified in egarding the United States Congress as a 'Rump Congress' representing only a portion of the Union, and recognizing allother Congress that might be convened, repesenting the Copperheads of the North and the Rebels of the South, as the true Congress, is pronounced bogus. It is said that and that it was manufactured by him without a shadow of authority. Flint gives as his authority a person high in office, and asks: "suspension of public opinion", until such time as he deems it proper to give further explanations. It is a significant fact in this concction, that while Mr. Johnson and his Atorney General have denied the truth of of things which the telegram pre-supposes; or does not entertain the revolutionary purpose attributed to him. He makes no dis- be claimer of his off repeated assertion that the present Congress is not a legitimate body. There is strong reason to suspect that the President did actually prepare the questions indicated under the impression that the October elections would result in a Copperhead

and Copper-Johnson endorsement of his adninistration, and that if the election had gone as he hoped and believed, the 'questions' would have been sent and answered in a way to suit his notions. We all know that Clymer felt certain of his election, and the President was equally sanguine ... So -ure did Mr.-Johnson feel of a successful result, that he evidently intended to follow up his triumph immediately by an apparently authoritative declaration that the present Congress was an illegal body and that anything it might do between the pening of its last session and the 4th of March, in the way of impeachment, would feat have only welded have only warmed it into a more compact and the blows of sucmass. Indian Summer.—Although it is early n the senson, there is but little doubt that ve have entered upon that delightful season. of the year called Indian Summer. In a little time it will have passed away and cold winds and perhaps drifting snows will be upon us. The clear skies and bland airs of these pleasant days are propitious for the Mariner as they will enable him to perform the balance of his labors before necessity will As summer is the time for labor, so winter s the time for thought and reflection. Both may be appropriated as sources of enjoyment, for apart from the privations of the suffering poor, even when the winds begin to how!, the land is filled with plenty and there is comfort and happiness in every iome. Our lines have fallen in the pleasant places of the carth, and the Almighty has more than lavished upon us the richest supplies of His beneficence. We do not fully appreciate these blessings. We are ungrate I for the many favors bestowed upon us. We are a strange people, and do not recognize properly the source from which we de rive our existence and support. In this country not only is the climate healthful and salubrious, but there is comparatively little destitution and want. Disease and postilence soldom visit us except in a mild and controlable form, and as for famino, we have never felt its biting and terrible ravages. Truly we ought to be grateful for all these offered to the true Union, men of the South, things. At this pleasant, delightful season,

INDUSTRIAL HALL. The display was very fine, although not so extensive, as at previous exhibitions. Many of our ladies, as will be seen by the following references to the articles on exhibition, manifested a grent deal of interests in adding to this feature of the Fair. To many of our merchants the Society must feel indebted for filling up vacant places, with tasteful arrangements of their different "stocks in trade."

A. B. Ewing exhibited a number of "Pictures,"—representations of "Game Fish," "Washington at Valley Forge," &c. and a quantity of very fine Wall Paper. His diplay of furniture was particularly noticed by visitors, as being of the first manufacture and finish. It consisted of Lounge Sofas, Chairs finished in Rep., and others in Mohair.
