The Keystone Washing Machine PATENTED MARCH 6th 1866, BY J. E. SMITH. Manufactured by Wm. Morrișon, West Street, Carlisle, Pa. THIS machine differ from all others In the working. The Gothes are thrown into a slatted cylinder in which are a number of loaded wood-on balle; by simply turning a crank for a few minutes, the clothes are washed perfectly clean.

No person will have any other machine after having soen this one. While the old fashloned rubbing machines require some skill to operate them and are very laborlous, tiring arm and head, the Keystone can be readily operated by a boy, requiring the smallest amount of physical force.

I only ask a trial of my machine and if it does not give entire satisfaction no money will be asked.

And best selling Subscription Books published!

We are the most extensive publishers in the United States, (having six houses), and therefore can affect to soll books cheaper and pay agents a more liberal commission than any other company.

Jour books do not pass through the bands of General Agents, (as nearly all other subscription works de), therefore we are enabled to give our cauyassers at works per cont. which is usually allowed to General Agents. Experienced canvassers will see the advantages of delding directly with the publishers.

Our series embraces the most popular works on all subjects of importance, and is selling rapidly both North and South.

Old agents, and all others, who want the best paying agencies, will please send for circulars and see our works with those of other publishors.
