But the light winds play with the beat at will :t float, the length of its rusty chain. Like the weary march of the hands of tim That meet and part at the noontide chings -By the dripping bow of the old canoe.

O many a time, with a careless hand, I have pulled it away from the pebbly strand, And pad lied it down where the stream rue Where the whirls are wild and the eddies a And looked below in the broken tide. To see that the frees and houts were two That were uirrored back from the old canoe.

But now as I lean o'er the crumbling side, And look below in the sluggish tide, he face that I see there is graver grown And the laugh that I hear has a sober tone And the hands that lent to the skill wings Unye grown familiar with sterner things. As "Paster, faster! your horses creep like snail-, drive for your life!" cried the impatient Morley, as the noble unificals the so slandered clashed along the pebbly turnpike road, while the speckes flow from their from hour like a flight of the flies. The postillings when the state of the lion, with voice and whip put them to the top-off-their speed; and the chaise, in its rapid course, left behind it. in trail of light, as though the wheels had been ignited. A high and steep hill in front at length enforced a more moderate gait, when Morley, as if struck by a sudden recollection; turned as it struck by a statuen reconcerton, turned his head towards his companion, a lovely young formle, who, pale, silent and motionless, reclined on his shoulders.

"Kate, my love," said Morley, tenderly, "Tear this will prove too much for your delicate form.

"Tear this will prove too much for your delicate fame.
There was no reply. Morley leaned his face towards hers, and by the moonbeams, saw that her features were fixed, her open woys gazing on vacancy, while the tears which had recently streamed from them will be a comment of the word of heaven?" exclaimed Morley, "what smeans this! Kate, beloved, addred! do you not hear me? will you not speak to me—to Morley, your Morley."

The name he uttered like a charm, disselved-the-spell, that bound her. A long the selved-the-spell that bound her.

A long drawn sigh, as if struggling from a breaking heart, escaped her cold quivering lips; a fresh fountain of Gears burst forth; and with an hysteric sob, she fell upon the bosom of her lover. The alarmed but enraptured Morley folder her in his arms, and bent to kiss away her tears—when with a sudden start, the disengaged herself from his em-

"Dearest, Vest Kate," he roplied, "do you with increased enrustness.
"Truly—devoted—madly!" cried Morley on his kness. "By the heaven that is shining over us—"

"It am serrous—I im not mad, Morley; no inconsistent," no flekle," she subjoined, reading the impression that was rising on Morley's countenance. "That I love, and in that love I am capable to chinge, do not Morley, insult me by doubting even by a look. "Cense, girl I cense!" said the old man, ouddavoring through the weakness of ageand in infirmity, and the workings of agenizing feelings, to be firm; "forbear, and answer me truly; is this gentleman your husband?"

Kate was about to reply, but Morley stepped forward. "I am not," said Morley, blessed with that lady's hand; she has re-fused it until it is given with your sanction; and without that sanction dearly as I love her, and hoples as I may be of your consent; I will never hereafter ask it."

Your father, young gentlemat, before you saw the light of heaven, had entailed my hate upon all his off-springs. I had nourished this buter feeling even against you who had never offended mg, and whom every one else loves. This very day the cherished hostility of years had given away before my desire to secure my daughter's happiness."—I fold-that age-was creeping on me, and but the morning of this blessed day, I-had resolved over the holy book to prove my contrition for my, sinfully blessed day, I had resolved over the holy book to prove my contrition for my sinful harbouring of hatred toywards my fellow creatures by uniting you, my children, in marriage. The tidings of my daughter's clopement scattered to the winds all my better thoughts, and rovived my worst in tenfold strength. I folt, at least thought so, the approach of my malady to a region where it would soon prove fatal. No time was to be lost; my will was hastily drawnout; I bequeathed my beggared daughter, but the father's curse. It would have been signed this night, for over this book I had igned this night, for over this book I had taken an oath never to forgive her who could abandon her father."

Coon Fight in Kentacky

Coon Fight in Kentacky.

A coon fight is one of the glories of life in Kentucky. The programme is this: Some one announces to the gentlemen planters of an extended neighborhood that he will give a barbecue and coon fight on a certain day, at such a place, and they are invited to bring themselves, their friends and their dogs; for his coon is a veteran, and will make a big flight. This brings a large gathering of men and dogs to enjoy the feast and the fight. The coon is placed in a barrel with one head out, had flat so that cannot betaken on the flank or rear, and the dog that brings out the coon—and it takes cannot betaken on the flank or rear, and the dog that brings out the coon—and it takes one of pluck to do that—wins the bet.

He had with him a miserable yellow cur, which went steaking about with its fall between its logs stauping and shying at every dog that offered tokens of friendly introduction. In the midst of the uproar, Yankee quittly remarked:

Good Natured Profile—Be good-natured if you can, for there is no attraction so great, no charm so admirable. A face that is full of the expression of aniability is always-beautiful. It needs no paint and no powder. Cosmetics are superfluous for it. Rouge cannot improve its cheeks, nor lily-white mend its complexion. When you guze into, the face of a noble-hearted man or woman, it is not the shape of the features you really see, nor yet the tint of the brilliance of the eye. The first immed of these, the silver gray or black, is exceedingly rare, and furnishes the most valuable fig known to commerce single skins solling in London for two hundred dollars,—gold—each. To sportsmen, however, the red and and the grey are the most interesting species. We have no conception—in this country of the trouble and expense to which the hunting men in lengthnd but themselves for a supply of oxys. They will set uside lands—worther to make, affilicial covers for their fove, as many as at thousand of which were imported in 1849. Naturalists are clearly mistaken, as all Southern hunters know, in the assertion that red foxes are found everywhere on his continent for there is not a better au thenticated fact, that the first red foxes seen in Maryland were imported by our fox hunting ancestors from England long before the revolution, and turned down on the eastern shore of the Chespeake; to which section of the State they were confined for several years, until, during an unusually severe winter, they crossed the bay on the ice to the western shore; there were certainly no red foxes in Mississippi as late as 1838, for the writer hunted there regularly three times a week, for flye seasons, and never saw one.—Where yer the red makes his appearance the grey for five seasons, and deversaw one.—Where ver the red makes his appearance the grey disappears sooner or later, the red drives him out; and where two exist together in the same neighborhood, the grey falls a victim to the hounds, where the red, from superior staunchies and game, more frequently escapes.

The supplanting of the grey by the red fex is much to be regretted. An ordinary pack of hounds can generally kill the former in from one to two hours, and his I mer in from one to two liours, and his mantier of doubling in circles and rarely running more than four of five miles from the starting point, affords n'uch better spart than the red fox, who will frequently make a bee line of from twenty, reaching even to fifty miles, from the spot where he is bounced." To kill grays we want musical dogs of inecitium speed, making well together; for the red, your dogs cannot be too fast, if they will but keep the line of seent; to find these two qualities combined is difficult to find.
