SEWING MACHINES _____

THE SINGER MACHINE THE SINGER TABLE THE SINGER MACHINE.—No other multiples of the Machine has see rapidly won favor in the household. The very large sales of their opposite Tanchine has shown by official returns the property of the many large same their forms of the company, and this fact or rough has been wing to districtly. It is simple in construction easily operated all its parts glidly smoothly and noiselestly along—not hable to cet out of order, how-suppactly for a great range and variety of work, sewing all kinds of cloth and with all kinds of thread and with the numerous attachments for heuming, cording, tucking, quilting, trimming, binding, braiding, &c., and embroidering of many ingenious, tasteful and difficult design; is the most perfect of all family sewing machines. Any one who will take the trouble to examine the merits of the different machines claiming attention, can soon discover whether we claim too much for ours. It would avail us notifing to make-the above assertions if we were not ready to prove them, and all we ask is a tial, for observation alone can justly cauvey a clear impression of the many kinds of work of which our New FAMILY MACHINE is capable.

THE FOLDING CASES,

THE FOLDING CASES, Which open with spacious tables to sustain the work, and which fold into tables or boxes to protect the machines, when not in use, from dust and meddlesoms flugers are made from choice woods, combollished by pleasing designs, thus making our new family machine not only an ornamental piece of furniture, but in some of the more elaborately finished machines, a work of real art. THE ATTACHMENTS,

Of our new family machines, above referred to, are not only numerous, but highly useful for the purpose for which they were intended. They need only a trial to show their great value. Among the most recent of the attachments is the EMBROIDER ER.

EMBROIDERER.

Of the different atlachments of our new family machine which have secured the attention and approval of our customers that for embroidering, like the Hemmer is one of the few instruments which will most please and estigity the observer of its real value. It is so stuple in structured, that any one who can sew on our machine can use it, and without lustruction. It may be attached to redetached from the machine in an instant. Without a lengthy description, and even then, it would be difficult to describe the great variety of work that this little instrument will do. The reader must not suppose that what we speak of is a mere chain stitch operation, which is sometimes a humorously termed embodiery. If desired, three colors of any kind, of thread may be used at any or time, an. the colors or thread may be used at any or time, an. the colors or thread may be used at any or time, an. the colors or thread may be dealt, any or thread may be used at any or time, and the colors of the send of the send of the will of the operator, by removing the speels in use and patting others in thoir stendy-thus as many or as few colors may be used as the operator wishes, in the embroidering of any garment wishes, in the embroidering of any garment great variety of results are produced by Humon-nein which the Crainons are required. Bifferent results may be produced, while the leaders warm of the send of the control. public attention. Our manufacturing machines, for other purposes, are too well known to need comment.

MACHINE TWIST.—We have recently onlarged our Silk Mills in Newark, N. J., and faintsh them with the latest and most improved machinery, which is being operated by highly, skilled labor, which is being operated by highly skilled labor, which we will soil by measure, rather than is written. The system of seiling by weighting slik in the process if dyeing as me only to greatly injure its quality, but his a best wing in the silled labor, we will soil by measure, rather shall be wrong impression about its quantity. In this respect we mean to be above suspicion. The manuer in which he sizes of silk are granted as a silled of the silled laborated and the silled laborated and the silled laborated and the silled laborated and the silled laborated article will not, we think, be soon surpassed. Kenthered and beauty of finish of the manufacturing from the squality of raw silks, the ovenness of thread and beauty of finish of the manufacturing and inhall all the silled laborated article will not, we think, be soon surpassed. In the soon laborated article will not, we think, be soon surpassed. It had been soon to be looked to rather than weight. We are now silk manufacturers on a large scale, and feel that had a large trade can only be retained by us in furnishing a superior article at a fair price. In other than select than use, purchasers may rest assured that it is inferior in quality, deficient in quantity, or both.

PATENT MEDECINES. Ayer's:

HAIR VIGOR, For restoring Gray Hair to its natural

though not always, cured by its use. Nothing can restore the hair where atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the bair revent the hair from turning gray or fulling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the bair, the Vigor can only benefit but not liarm it.

If wanted merely for a HAIR DRESSING, othing else can be found so desirable Containing neither oil or dye, it does not oil white cambric, and yet lasts long on nd a grateful perfume. Prepared by Dr. J. C. Ayer, & Co.,
