

**LAST NOTICE.**—Taxpayers remember that on all taxes remaining unpaid on the last day of August, 1869, will be added.

C. MELLINGER, Texas.

**FRANK LESLIE'S LADY'S MAGAZINE.**—The first number of this magazine is published, and the first issue is given to the public. It is a monthly magazine, and contains a great variety of interesting articles, and illustrations. The wonder is how such a large and handsome magazine can be gotten up for only \$3.50 a year. Address Frank Leslie, New York.

**The Little Corporal.**—For August is brim full of interesting reading for boys and girls. No work of the kind is as useful as this. Parents, if you desire to amuse and instruct your children, the *Corporal* will aid much in your intentions. A. L. Sewell & Co., Publishers, Chicago, Ill.

A contemporary says: "There is a man up in our country who pays for big paper in advance. He has never seen a sick day in his life, never had any corns or tooth-a-his bones never got it; the frost never kills his corn or beans; his babies never cry in the night, and his wife never scolds." Reader, are you the man?"

**PRESERVING SEASON.**—The time for preserving fruit is now at hand, and sugar will be in demand in every family. There will doubtless be a rise in this necessary article, and while we are getting our jars ready it would be advisable to lay in a stock of sugar at the same time. It can be purchased at reasonable prices at Blairs' western grocery store "South End," or at Masonneville's West Point.

**OAKVILLE CAMP MEETING.**—The Oakville Camp Meeting will commence Wednesday next, the 4th of August, and continue eight days. The grounds adjacent to the railroad, about one mile above Oakville Station, and about seventeen miles west of Carlsbad. We understand that all trains will stop at the camp during the continuance of the meeting.

**DRESS PARADES.**—A Dress Parade of the entire command at Carlsbad Barracks was had every Wednesday and Sunday evening at sunset. The strength of the post is now about 250 men, and when drawn up in line they make a very imposing array. The music furnished by the post band under Prof. Tu. H. Held, is superb. We append last Sunday evening's programme.

1. Airs from Puritan.

2. Overture from Robert E. Diable.

3. Morning Journals, Dedicated to the

4. Quickstep.

**DEATH OF A COLORED GIANTESS.**—Mary Goode, a colored woman died of dropsy in Carlsbad. She was 38 years of age and weighed almost four hundred pounds. Mary was a native of Adams county, came to Carlsbad several years ago, and has been residing in the alley in rear of our office. Mr. A. B. Ewing, the undertaker, informs us that the coffin in which she was buried had to be made of wood an inch in thickness and was heavily lined, was 20 inches in depth and 30 inches across the shoulder. The interment was made in the colored cemetery where the body was carried by ten men.

**DIVORCE.**—We take the following divorce case from the Chicago (Ill.) Journal, of July 20th.

In the case of Matilda A. Light, nee McNaughton, against Austin Light, a decree of divorce was granted. They were married at Carlsbad, Pa., on April 10th, 1864, and had five children. It was charged that the defendant had treated his wife with great cruelty, and that, although unable to do so, he neglected to provide for her family. Also, that he threatened to remove her furniture at the house No. 54 North State Street. On June 4, 1867, Mrs. Light was brought before the county court for application of her husband, charged with being a lunatic. The jury, however, failed to seat, and then turned a verdict that she was sane. She could not be got rid of in that way. The common council subsequently granted her a free license to peddle, in order to support herself.

**LEAD POISONING.**—The Journal of Applied Chemistry condemns, in strict language, the practice of putting up articles of diet in envelopes of tin foil. The tin foil, it contends, contains lead poison, and is very injurious to the health of those who eat articles that have been enclosed in it. The warning given to tobacco chasers against the use of "tin cut" put up in this style is worthy of attention. By oxidation the nicotine of tobacco becomes nitric acid, which acts on lead, producing a salt which is very poisonous and not unfrequently shows its deleterious effects among consumers of "the weed" in form of paralysis of the facial nerves.

**HARVEST HOME.**—The Annual Harvest Home will be held at the Fair Grounds of the Cumberland County Agricultural Society. Saturday, August 14th, 1869.

Refreshments on the grounds. All are invited.

By order of the Society.

John Lays, Secretary.

July 23rd.

**I LIST OF GRAND JURORS FOR.**

August Term, and Termes and sessions of the

for trial and of Quarter Sessions of the

for the trial of grand juries, and

for the trial of grand juries, and
